Contents

The Inflorescences of Maize: O. T. Bonnett .................................................. 77
A New University: William Seifriz ................................................................. 87

News and Notes
Ichthyologists and Herpetologists; and Regular Departments ...................... 91

Book Reviews
Antiseptics, Disinfectants, Fungicides, and Chemical and Physical Sterilization; The Chemical Structure of Proteins; Contributions to the Theory of Riemann Surfaces; Notions Elémentaires de Chimie Générique; Handbook of Freshwater Fishery Biology; and New Books ................................................................. 99

Miscellaneous Publications .............................................................................. 102

Technical Papers
Theoretical Foundations of Audio-Visual-Tactile Rhythm Induction Therapy Experiments: Theodore C. Kahn .................................................. 103
Ionie Permeability and Osmotic Swelling of Cells: T. H. Wilson ..................... 104
Aseonyeete Spore Mutants and Their Use in Genetic Studies: George Bistis and L. S. Olive ................................................................. 105
Oak Wilt Fungus Labeled with C14: Paul F. Hoffman and Bert M. Zuckerman ............... 106
Waxy Constituents of the Saw Palmetto, Serenoa repens (Bartr.) Small: Edward A. Wilder and Eugene D. Kitzke .................................................. 108
Relationship of Adrenalin to Tissue Sulphhydryl Compounds: U. D. Register and R. G. Bartlett, Jr. ................................................................. 109
Action of T2r+ Bacteriophage on Host-Cell Membranes: Leonard F. Barrington and Lloyd M. Kozloff ................................................................. 110
The Effect of Pasteurization on the Stability of Phosphates Can Be Used as a Test for Hieated Milk: Socrates A. Kaloyereas .................................................. 111

Communications
Pleuropneumonia-like Organisms Isolated from Bronchopneumonia of Cattle: G. R. Carter ................................................................. 113
The Heparin-like Activity of Certain Inorganic Anions: Joseph H. Bragdon and Richard J. Havel ................................................................. 113
Rapid Separation of Diamond from Other Forms of Carbon: F. S. Phinney ................................................................. 114

Armed Forces Institute of Pathology ................................................................. 11A
Meetings & Conferences .................................................................................. 14A–18A
