Contents

Review of Some Methods of Flow Measurement: W. A. Wildhack ........................................... 191
Irradiation of Parts of Individual Cells, II: Robert B. Uretz, William Bloom, Raymond E. Zirkle ................................ 197
Rudolf Hübner: His Life and Scientific Work; William R. Amstrong .......................... 199

News and Notes
Recent Advances in Astronomy; Philippine Science; and Regular Departments ......................... 202

Book Reviews
Silicones and Their Uses; Methods of Theoretical Physics; Les Groupes Sanguins Chez les Animaux; Automatic Digital Calculators; Microwave Spectroscopy and Microwave Spectroscopy; The Metabolism of Algae; Introduction to Tensors, Spinors, and Relativistic Wave-Equations; An Illustrated Catalogue of the Rothschild Collection of Fleas in the British Museum; Quantitative Organic Analysis via Functional Groupes; Books Reviewed in The Scientific Monthly; and New Books ................................................................. 212

Miscellaneous Publications ................................................................. 217

Technical Papers
Dissociation of Chick Embryo Cells by Means of a Chelating Compound: Edgar Zwilling ...................................................... 219
Crystalline Neoretinene b: John M. Dieterle and Charles D. Robeson ................................. 219
Radical Dissociation of Aryldisulfides: H. Z. Lecher ........................................................ 220
Isolation and Identification of "Bound" Morphin attached to Tissue: R. A. Seibert, C. B. Williams, R. A. Huggins .......................................................... 222
Chemical Similarity and Biological Activity of the Saponins Isolated from Alfalfa and Soybeans: George C. Potter and Fred A. Kummerow ......................... 224
Tumor Induction in Drosophila melanogaster by Injection of e'tu Larval Fluid: M. H. Harnly et al. ........................................................................................................ 225
Serologic Differences in Strains of Herpes Simplex Virus: C. Ray Womack and Brewster P. Hunt ................................................. 227
Nonmarine Miocene Arthropods from California: Allison E. Palmer and Allen M. Bassett ................................................... 228
Inhibition of Virus Infectedness of Certain Plants by Extracts from Capsicum frutescens L.: C. D. McKeen .......................................................... 229

Communications
Glycogen Deposits in Gingival Tissue: Margaret R. Dewar ............................................... 230
Dust-Snow Storm in the Minneapolis-St. Paul Area on 12 March 1954: N. Prokopovich .............................................................. 230
Fluorometric Determination of N'-Methylnicotinimide: Harold L. Rosenthal ..................... 231
New Enemy of the Oyster Drill: Franklin B. Flower .......................................................... 231
Brochosomes and Leafhoppers: G. S. Tulloch and J. E. Shapiro ...................................... 232
Limitations of the Symmetry Criteria for Optical Inactivity and Resolvability: Kurt Mislow ................................................... 232
Some Problems Concerning the Distribution of the Late Paleozoic Gastropod Omphalotrochus: Ellis L. Yochelson .......................................................... 233
Ultra-Fine-Grained Light-Sensitive Film of Optional Density: M. J. Olsen .......................... 234
"I Don't Want To Be Quoted by the Press" ........................................................................... 7A
Meetings & Conferences ...................................................................................................... 10A
