"LAB-AID" EXPEDITERS
— they speed-up laboratory chores

**technicon paraffin knife**

makes work with paraffin-embedded tissues quick and easy. Great for cutting large blocks into small ones; for mounting blocks on a microtome object disc; for squaring up blocks; for separating ribbons in a water bath . . . Hollow stainless steel handle doesn't heat up — easy to keep knife at the right temperature. When not in use lay knife in saddle rest—Blade UP indicates knife hot; Blade DOWN, knife cold.

**technicon microslide dryer**

delivers slides ready for staining in 7 minutes! Just drop slides, in an Autotechnicon Slide Carrier, into the hatch, flip the switch and close the cover. A steady current of warm, filtered air blowing over the slides carries away all moisture, leaving them bone-dry and dust-free. The filter is replaceable. There's no distortion, either — the warm clean air is well below the melting point of paraffin.

**technicon constant temperature water bath**

insures smooth, even spreading of your tissue ribbons. The water temperature is just right — never too hot or too cold, thermostatically held at any set temperature from 20° to 60°C. There's no melting paraffin to distort tissues — no folds or wrinkles, no bubbles due to frequent water change. Temperature stays constant, day-in, day-out. And it's easy to see your sections against the dull finished black interior of the bath.

**THE TECHNICON COMPANY**

How to experiment... and still be sure!

When one qualified investigator can repeat and verify the original observations of another, the cause of science is served.

Thus, both pioneering research and routine control tests depend on reliable materials as well as methods. It is for this reason that Pyrex brand laboratory glassware has become standard in most laboratories.

When you start an experiment using Pyrex ware, you can be sure that variables are not introduced by the equipment. Its high chemical stability provides the necessary protection against contamination. And because Pyrex brand apparatus is designed to withstand both mechanical and thermal shock, you get dependable, long-term performance.

In addition, the 40 years of experience in the design and production of Pyrex brand laboratory ware make it possible to meet the exacting specifications of modern science.

Pyrex brand laboratory glassware frees you to investigate the unknown with confidence. Your laboratory supply dealer stocks it for your convenience. And as always... Corning means research in glass.

PYREX® laboratory ware...
...the tested tool of modern research
The following Schwarz Preparations are available to assist and extend studies in metabolic and enzymic functions:

**ADENOSINE PHOSPHATES**
**NUCLEIC ACIDS AND METALLIC NUCLEATES**
**NUCLEOTIDES AND NUCLEOSIDES**
**PURINES AND PYRIMIDINES**
**SUGARS AND SUGAR PHOSPHATES**
**GLUTATHIONE COMPOUNDS**
**SULFHYDRYL REAGENTS**
**THYMIDINE COZYMASE**
**L- AND D-AMINO ACIDS, Optically Standardized**
**RADIOCHEMICALS, Isotopically Labeled with C¹⁴ or S³⁵**

These Schwarz Preparations meet the exacting requirements of products intended for use in biochemical research. Write for informative technical bulletins, complete specifications and references to literature.

**SCHWARZ LABORATORIES, INC.**
Leading Manufacturers of Yeast Biochemicals and Fine Chemicals
230 Washington Street, Mount Vernon, N. Y.

---

**More Precision in Air Conditioning**

Niagara "Controlled Humidity" Method provides air at precise conditions of temperature and moisture content.

In the range from below 32° F. to 140° F. you may have constant conditions within tolerances of 1° F. and 2% R. H. with control by thermostats alone... simple and inexpensive... no moisture sensitive instruments needed.

This Method uses "HYGROL" liquid absorbent to remove moisture from the air directly. Operation is automatic; the absorbent is re-concentrated, by a new, reliable method, at the same rate as it becomes diluted.

Use it for drying processes, preventing moisture damage to instruments or hygroscopic materials, controlled atmospheres for tests and experiments. Unit capacity ranges up to 20,000 c. ft. m.

Write for Bulletins No. 121, 122, 125; address Niagara Blower Co., Dept. SW 405 Lexington Ave., New York 17, N. Y.
LARGE CYLINDERS for COMMERCIAL USE
Ample stocks in large cylinders of all gases carried at both our East Rutherford, N. J. and Joliet Ill. plants.

MEDIUM-SIZE CYLINDERS for PILOT-PLANT and LABORATORY USE
Three different sizes of cylinders containing approximately 5%, 10% and 30% of the contents of large commercial cylinders. These cylinders are designed for use on benches and in hoods and are readily portable.

“LECTURE BOTTLES” for Research Experiments or Classroom Demonstrations.
71 different gases of highest purity are available in these little cylinders which have a diameter of 2" and an overall length of 15½".

Matheson’s Complete Line of Triple-Tested AUTOMATIC PRESSURE REGULATORS and NEEDLE VALVES assure you of the correct type of control required for each gas.

From Acetylene to Xenon, Matheson has all the gases! Any rare or common gas, or any mixture thereof that you may need in your work is available from the Matheson Company.

Our new catalog listing the prices of 71 gases and mixtures also shows the pressure at which various gases are packed, their purity and the sizes of cylinders in which they may be obtained, as well as the proper type of pressure or flow control to be used. Write for our new price list dated April, 1954.

FLUORIDATION AS A PUBLIC HEALTH MEASURE

Editor: James H. Shaw, Harvard School of Dental Medicine

6 x 9 inches, 240 pages, 24 illustrations, index, clothbound, 1954

Price $4.50. AAAS Members’ prepaid order price $4.00.

A symposium volume of the American Association for the Advancement of Science

The fluoridation of water supplies has become a subject of intense national interest. This volume offers a comprehensive evaluation of our present knowledge of the benefits and possible dangers of fluoride ingestion and the importance of fluoridation in dental caries and human health. Both scientific research and engineering implementation are covered.

This book will prove to be an invaluable reference for the public health worker, the sanitarian, the civic official, the waterworks engineer, and the interested layman. The eminent qualifications of each of the chapter authors should be sufficient to inspire confidence in the unbiased authenticity of the material.

TABLE OF CONTENTS

Resumé of Dental Benefits of Fluoride Ingestion
ZACHARY M. STADT, Contra Costa County Health Department, Martinez, California

Acute Fluoride Poisoning and Crippling Chronic Fluorosis
GERALD J. COX, University of Pittsburgh

Metabolism of Inorganic Fluorides
EDWARD J. LARGENT, University of Cincinnati

Some Public Health Aspects of Water Fluoridation
HAROLD C. HODGE and FRANK A. SMITH, University of Rochester

Medical Aspects of Excessive Fluoride in a Water Supply: A Ten-Year Study
N. C. LEONE, F. A. ARNOLD, JR., E. R. ZIMMERMAN and P. B. GEISER, National Institute of Dental Research, National Institutes of Health; J. E. LEIBERMAN, Office of Biometry, National Institutes of Health; M. B. SHIMKIN, National Cancer Institute, National Institutes of Health; and C. A. STEVENSON, Scott and White Clinic, Temple, Texas

A Long-Term Medical Study of Children in a Community with a Fluoridated Water Supply
EDWARD R. SCHLESINGER, New York State Department of Health and Union University; DAVID E. OVERTON and HELEN C. CHASE, Newburgh-Kingston Fluoridation Survey Project

The External Action of Fluorides and Other Agents on the Teeth in the Prevention of Tooth Decay
BASIL G. BIBBY, Eastman Dental Dispensary and University of Rochester, and FINN BRUDEVOLD, Eastman Dental Dispensary, Rochester, New York

Relative Merits of Various Fluoridation Vehicles
REIDAR F. SOGNNAES, Harvard University

Engineering Aspects of Fluoridation Installation
O. J. MUEGGE, Wisconsin State Board of Health, Madison, Wisconsin

Determination of Fluorides in Water
JAMES G. WEART, Department of Public Health of the State of Illinois, Springfield, Illinois

Some Chemical Aspects of Water Fluoridation
M. STARR NICHOLS, University of Wisconsin and State Laboratory of Hygiene, Madison, Wisconsin

American Association for the Advancement of Science
1515 Massachusetts Avenue, N.W., Washington 5, D.C.

English Agents: Bailey Bros. & Swinfen, Ltd., 46, St. Giles High Street, London, W. C. 2

Science, vol. 120
G.A.B. Interference Filters
(Made in Switzerland)
for isolating narrow spectral bands

Spectral Range: 400-900 millimicrons
Spectral Width: 12-15 m., Transm.: 45-50%
Size: 2" x 2". Other sizes on order.

For Flame Photometry and Color Densitometry
Microscopy and Photomicrography
Colorimetry and Fluorimetry
also in reflectometry, light scattering measurements,
microcolorimetry, refractometry, polarimetry, and in all
other fields requiring monochromatic light in the visible
and near-infrared range.

RESEARCH
BIOCHEMICALS
OF
HIGHEST POSSIBLE PURITY

"VITAMIN FREE" CASEIN
(Hot Alcohol Extracted)
A valuable source of protein nitrogen of exceptional purity for incorporation into diets to produce vitamin deficiencies.

NUCLEOPROTEINS — PURINES PYRIMIDINES
A complete selection of all derivatives.

AMINO ACIDS
A complete selection of more than 100 amino acids.

"VITAMIN FREE" CASEIN HYDROLYSATE
Pre-tested for microbiological vitamin assays.

SLEEPING ACCOMMODATIONS AT 121st AAAS MEETING
Berkeley, California, December 26-31, 1954

The hotel, motel, and dormitory sleeping accommodations—their rates and the application coupon below—are for your convenience in making room reservations in Berkeley. Please send your application directly to the AAAS Housing Bureau and thereby avoid delay and confusion. The experienced Bureau will make assignments promptly; a confirmation will be sent you in two weeks or less. Single rooms may become scarce; double rooms for single occupancy cost more; if possible, share a twin-bedded room with a colleague—and also save. Mail your application now to secure your first choice of desired accommodations. All requests for reservations must give a definite date and estimated hour of arrival and also probable date of departure.

Dormitory Accommodations: NOTE: The 766 units in the University of California dormitories are primarily for students, younger faculty members, and those not on expense accounts. Occupancy, two persons per room; rate, $2.00 the first night, $1.00 per night thereafter, per person.

International House: Singles only, without private bath, $2.50 per night.

For a discussion of the headquarters of the participating societies and sections, please see Association Affairs, Science, July 23, or The Scientific Monthly, August.

THIS IS YOUR HOUSING RESERVATION COUPON

AAAS Housing Bureau
2223 Fulton Street
Berkeley 4, California

Date of Application ..................................

Please reserve the following accommodations for the 121st Meeting of the AAAS in Berkeley, Dec. 26–31, 1954:

First Choice .................................. Second Choice .......................... Third Choice ..........................

(State name of hotel, motel, or other)

Single Room Desired Rate ......... Maximum Rate .........

Double-bedded Room Desired Rate ......... Maximum Rate .........

Twin-bedded Room Desired Rate ......... Maximum Rate .........

Suite Desired Rate ......... Maximum Rate .........

Dormitory Unit(s)—two persons per room at $2.00 each first night, $1.00 per night thereafter.

The name and address of each person, including yourself, must be listed. Attach list if this space is insufficient.

HOTEL AND MOTEL ROOM DEPOSIT

$5.00 per reservation or $10.00 per room (re-funded if cancelled before Dec. 17)

Make checks payable to “AAAS Housing Bureau.”

DATE OF ARRIVAL .................................. DEPARTURE DATE .................

(These must be indicated—add approximate hour, a.m. or p.m.)

NAME ................................................

(Individual requesting reservation) (please print or type)

ADDRESS ............................................

(Street) (City and Zone) (State)

My society (or sectional interest) is: ...................................

I (will) (will not) have an automobile at the Meeting.

Mail this now to the Housing Bureau (address above). Enclose hotel or motel room deposit. Make checks payable to “AAAS HOUSING BUREAU.” Rooms will be assigned and confirmed in order of receipt of reservation.

6A SCIENCE, VOL. 120
THIS IS THE

Coleman Flame Photometer

Measures Sodium, Potassium AND CALCIUM directly, easily and accurately

New and Exclusive Atomizer-Burner . . . Burns common illuminating gas with oxygen for a stable high-temperature flame. No explosive tank gas required. Safe in the most inexperienced hands.

Simple Direct-Coupled Optics . . . No slits to adjust . . . no mirrors or prisms to align. Optical filters provide spectral isolation.

Direct Reading . . . Without internal standards. High temperature flame gives full excitation . . . eliminates need for chemical additives such as lithium.

Easy to Use . . . Safe in any laboratory. The Coleman Flame Photometer is as safe and easy to use as a Burner burner. Flame will not blow out or flashback, and pressure adjustments are not critical.

For users who prefer to conduct flame analysis independent of other procedures or who do not have available one of the above Coleman instruments, a separate indicating instrument . . . the Coleman Galv-O-Meter is offered.
