Nature of Pigments Derived from Tyrosine and Tryptophan in Animals: H. Kikkawa, Z. Ogita, S. Fujito

New Era of Geodesy: W. A. Heiskanen

News and Notes
Quantitative Aspects of Provenance and Environment of Sedimentary Rocks; and Regular Departments

Book Reviews
Information Theory in Biology; Nobel Prize Winners in Medicine and Physiology: 1901–1950; Rutherford, by Those Who Knew Him; Modern Chemical Processes; Biochemistry; Metabolic Interrelations; Introduction to Atomic Physics; New Books; and Miscellaneous Publications

Technical Papers
s-Triazine Derivatives—A New Class of Fungicides: C. N. Wolf, P. H. Schuldt, M. M. Baldwin
Antithyroid Activity of Some S-Substituted Thiouracils: H. W. Barrett and G. L. Elliott
Epiphyseal Plate Lesions, Degenerative Arthritis, and Dissecting Aneurysm of the Aorta Produced by Aminonitriles: S. Wawzonek et al.
Purification of Angiotonin (Hypertensin): C. A. Kueher and M. E. Honey, Jr.

Communications
Some Glass Apparatus Improvements: A. D. Mack
A Defense against New Ideas: P. W. Bridgman
Cycle Analysis through Industry Study: G. T. Altman
