Editorial
Types of Articles for Science ............................................ 55

Articles
Dosages from Natural Radioactivity and Cosmic Rays: W. F. Libby ............... 57
Recommendations for Development of Arid Lands ................................ 61
The Grand Theme of Stephen Polyak: R. Granit ................................ 64

News of Science
New Affiliate of the AAAS; Soviet Invitation; International Observatory Program;
AAAS Committees and Representatives for 1955; Drug Addiction; New AAAS
Chapter; Scientists in the News; Necrology; Education; Grants, Fellowships, and
Awards; and Miscellaneous .................................................. 65

Reports and Letters
Quantitative Analysis for Thorium by X-ray Fluorescence:
A. G. King and P. Dunton .................................................... 72
Pathways of Glucose Metabolism in Corneal Epithelium:
J. H. Kinoshita, T. Masurat, M. Helfant .................................... 72
Acclimation of the Critical Thermal Maximum of the Reptile Urosaurus ornatus:
C. H. Lowe, Jr., and V. J. Vance ............................................ 73
Effect of N-m-Tolylphthalamic Acid on Tomato Flower Formation:
F. G. Teubner and S. H. Wittwer ............................................ 74
Chalconatronite, a New Mineral from Egypt: C. Frondel and R. J. Gettens .... 75
Response of Nasal Epithelium to Odor Stimulation: L. M. Beidler and D. Tucker 76
Manometer Flask for Measuring Respiratory Quotients:
R. G. Stanley and T. Tracewell .............................................. 76
Geologic Application of a Test for Citrate-Soluble Metals in Alluvium:
H. E. Hawkes and H. Bloom ................................................ 77
Statistics: R. P. Silliman ...................................................... 78
Steroid Anesthetic Agent: G. D. Laubach, S. Y. Pan, H. W. Rudel ................ 78

Book Reviews
Clinical versus Statistical Prediction; Pharmacology in Medicine; Standard Values
in Nutrition and Metabolism; Human Heredity; An Introduction to Molluscan Ecology;
Fishes of the Western North Atlantic; Feeding Poultry; Linear Equations in
Applied Mechanics; Le Magnétisme des Corps Célestes; Sponsored Research Policy
of Colleges and Universities; Introduction to the Theory of Neutron Diffusion; Structure
of Molecules and Internal Rotation; The Structural Chemistry of Proteins; A
Short Textbook of Colloid Chemistry; New Books; and Miscellaneous Publications 79

Scientific Meetings
Nuclear Emulsion Research; Society Elections; and Forthcoming Events .......... 85
