doing column chromatography?

if it's resolution you're after... which sampling is bound to be better?

10 fractions of 20 cc each  or  200 fractions of 1 cc each?

Break a given volume into many small fractions, rather than a few large ones, and you're bound to get sharper differentiation, higher resolution.

Stands to reason... but how? The manual "bird-watching" method is tedious enough for a dozen-or-so collections: downright impossible when you need hundreds.

It's no trick at all though when you mechanize fractionation with the Technicon automatic collector. You can run collections either by time-flow, or, if utmost resolution is required, by drop count. Either way, all you have to do is mount the prepared column on the machine, set it for the desired number (up to 200) of samples of whatever volume you wish (from a single drop up to 28 cc). Then start it and go away.

Come back hours later (or next morning) and find the job all done. Excess material beyond that required for the experiment is automatically diverted to waste when the machine turns itself off on completion of the collection.

for microprojection with finer detail... more brilliance

MICROPROJECTOR
model XI C

You will find that the versatile Leitz MICROPROJECTOR, suitable to either large or small rooms, is dependable, easy to operate and projects brilliant, sharply detailed images. For years it has represented the outstanding instrument in its field.

Some of the outstanding features are:
- Maximum illumination of the image through individual synchronized condensers for each of the four objectives.
- Rapid change of magnifications by click-stop movements of object stage, without losing field or critical focus.
- Low-power survey objective with its own mounting and reflecting prism for surveying large sections.
- Microscope and light source on a single base for permanent alignment, permitting hour-long attendance free operation.
- Coarse and fine focusing knobs on a conveniently placed joint axis.
- Built-in electromagnetic control mechanism for fully automatic carbon feed of arc lamp.
- High aperture, high resolution objectives for sharper, more brilliant images.

ADVANCES IN EXPERIMENTAL CARIES RESEARCH

Edited by: Reidar F. Sognnaes, Harvard School of Dental Medicine

6 x 9 inches, 246 pages, 49 illustrations, index, clothbound, 1955

Price $6.75. AAAS Members’ prepaid order price $5.75.

A Symposium Volume of the American Association for the Advancement of Science

This is the first monograph devoted specifically to the information gained from research on the experimental production and prevention of tooth decay in laboratory animals. Twenty distinguished investigators, representing not only dentistry but also the basic sciences of anatomy, pathology, zoology, biochemistry, nutrition and bacteriology, report and review pertinent experimental work. The book has been unusually well organized to represent a coherent sequence rather than a series of isolated papers, and the whole is summarized skillfully by the Editor in a final chapter, followed by a very detailed subject and author index.

The importance and universality of the caries problem hardly need emphasis. Since clinical trials on humans are time consuming, costly and complicated, this animal work offers a most promising approach. Research reported here is encouraging in two respects. More precise knowledge has been gained regarding the long-suspected relationship between the oral environment and the production and prevention of tooth decay, and new light has been shed on various systemic factors contributing to the development of caries-resistant teeth. The volume will suggest many further lines of research toward an ultimate solution of the problem.

CONTENTS

Production and Evaluation of Experimental Animal Caries: A Review
ERLING JOHANSEN, University of Rochester, and PAUL H. KEYES, National Institute of Dental Research

Location of Experimental Caries on Different Tooth Surfaces in the Norway Rat
ROBERT M. STEPHAN and M. RACHEL HARRIS, National Institute of Dental Research

Genetic Factors in Experimental Rat Caries
H. R. HUNT, C. A. HOPPERT, and S. ROSEN, Michigan State College

Developmental Factors in Experimental Animal Caries
JAMES H. SHAW and REIDAR F. SOGNNAES, Harvard School of Dental Medicine

Dietary Factors in Experimental Rat Caries
F. J. McCLURE, National Institute of Dental Research

Salivary Factors in Experimental Animal Caries
ABRAHAM SCHWARTZ and DAVID WEISBERGER, Harvard School of Dental Medicine

Endocrine Factors in Experimental Animal Caries
WILLIAM G. SHAFER and JOSEPH C. MUEHLE, Indiana University

Intra-Oral Effects upon Experimental Hamster Caries
SIDNEY B. FINN, CLARENCE E. KLAFFER, and JOSEPH F. VOKLER, University of Alabama

Oral Environmental Factors in Experimental Rat Caries
FRANK J. ORLANDO, University of Chicago and the Zoller Clinic

Influence of Antibiotics on Experimental Rat Caries
ROBERT J. FITZGERALD, National Institute of Dental Research

Effect of Various Agents on Experimental Caries: A Résumé
JOHN W. HEIN, University of Rochester

General Summary
REIDAR F. SOGNNAES, Harvard School of Dental Medicine

Now, at a price within range of every user, the "Ortho-Illuminator B" converts any make or model microscope into an integrated unit with built-in illumination on the Koehler principle. Designed primarily for visual microscopy or use with existing photomicrography equipment, the new unit embodies the same precision, operating principles and performance found in standard Ortho-Illuminator and Orthophot models. It is instantly adaptable to widely different operational requirements—simply and quickly aligned with any microscope—adjusted, removed or repositioned without disturbing alignment. Unequaled versatility for instant command of brightfield, darkfield, phase contrast, polarized or fluorescent light. Constant color temperature is maintained while controlling full range of intensity for illumination of maximum numerical aperture obtainable with standard Abbe, Aplanatic or Achromatic condensers. This assures optimum resolution discernible by the human eye and on photographic film.

**Built-in Features Of the Ortho-Illuminator B**

- **INTENSITY FINGERTIP CONTROL** with constant color temperature
- **FILTERS**—Daylight, green, red—plus light balanced at 3200° K color temperature
- **FIELD-OF-VIEW DIAPHRAGM** focussed in plane of the object, adjustable and centerable with conveniently placed controls
- Ideal for photomicrography, micro-projection, drawing, measuring or counting, and demonstrations to small groups.

For complete details on the "Ortho-Illuminator B" and accessories, request Bulletin No. 401-L and price list.

**AIR CONDITIONED TEST CABINET**

**RANGE**—up to 150°F (dry bulb). With refrigeration, dew point temperatures as low as minus 30°F. Control of relative humidity from 5% to 95% is obtained at all temperatures in this range. Air capacity is 200, 400 or 600 c.f.m. Dimensions are 30” x 28” x 24”.

**METHOD**—Air is saturated in the air-conditioning unit at the required dew point temperature and reheated to the desired dry bulb temperature. No moisture sensitive instruments are needed. Recorders obtain a complete record of conditions.

Fastest, easiest way to analyze METAL SPECIMENS

BAUSCH & LOMB

Dynoptic

METALLURGICAL MICROSCOPES

All-new comfort-first design... exclusive performance advantages... make all other metals microscopes obsolete!

NEW EASE! Your hand rests on table for effortless precision focusing and mechanical stage control. Binocular eyepieces inclined at comfortable viewing angle. You remain relaxed, fatigue-free, throughout prolonged examinations.

NEW SPEED! Ball bearings and rollers quickly float the microscope into critical focus, without drift or binding.

NEW ACCURACY! Pressure-loaded ball bearings assure lifelong centration of Roto-sphere nosepiece, for identical repeat settings. Balcote anti-reflection coated objectives provide vivid, detailed images for dependable analyses.

NEW VERSATILITY! Monocular tube, for photomicrography and measuring, readily interchangeable with binocular body. Choice of vertical or transmitted illumination. Optional mechanical stage.

FREE ON-THE-JOB DEMONSTRATION!

See the difference! Feel the difference! Prove for yourself how exclusive B&L advantages help you do your best work faster, more easily.
