APPLICATION FOR HOTEL RESERVATIONS

122nd AAAS MEETING

Atlanta, Ga., December 26-31, 1955

The list of hotels and their rates and the reservation coupon below are for your convenience in making your hotel room reservation in Atlanta. Please send your application, not to any hotel directly, but to the AAAS Housing Bureau in Atlanta and thereby avoid delay and confusion. The experienced Housing Bureau will make assignments promptly; a confirmation will be sent you in two weeks or less. As in any city, single-bedded rooms may become scarce; double rooms for single occupancy cost more; if possible, share a twin-bedded room with a colleague—and also save money. Mail your application now to secure your first choice of accommodations. All requests for reservations must give a definite date and estimated hour of arrival, and also probable date of departure.

HOTELS AND RATES PER DAY

*Hotels starred have sessions in their public rooms. Most hotels will place comfortable rollaway beds in rooms or suites at 2.50 or 3.00 per night. For a list of headquarters of each participating society and section—and for information on dormitory accommodations at Atlanta University and Georgia Institute of Technology—please see Science, July 22, or The Scientific Monthly, August.

Mail this now to the Housing Bureau. Rooms will be assigned and confirmed in order of receipt of reservation.
TABLES OF THE CUMULATIVE
BINOMIAL PROBABILITY DISTRIBUTION

By the Staff of the Computation Laboratory of Harvard University

This volume extends by more than six times the previously available range of tabulation of the mathematical function which represents the probability that at least \( r \) successes will occur in a given number of tries. It is expected that it will be useful to statisticians interested in problems relating to sampling and quality work. Six “decimal” place values are printed.

Professor Frederick Mosteller, in his introduction to this volume, provides a full discussion of seventeen applications of the function, ranging from elementary sampling problems to matching and curve-fitting problems. He also discusses the mathematical background of the function and its relation to certain other mathematical functions that are of interest in the field of statistics and probability.

These tables are the first to be computed with the Mark IV Calculator. *Annals of the Computation Laboratory of Harvard University, Volume XXXV.* $8.00

Dehydrated Culture Media
DIFCO
The utmost in efficiency and economy in the bacteriological laboratory is realized through use of Dehydrated Culture Media, Difco.
Convenience—any medium can be instantly prepared.
Stability—media can be kept without deterioration.
Availability—each medium is instantly available.
Completeness—no additional ingredients are required.
Uniformity—successive lots are identical.
Comparability—dependable, comparative studies are possible in widely separated laboratories over long periods of time when standardized Difco Products are employed.

Something NEW has been added to –

Kimble THERMOMETERS

HYDROMETERS

NEW LOW PRICES

**THERMOMETERS:** Here are thermometers designed to stay legible for a lifetime. The colored material used to fill the lines and numbers of the graduations is unaffected by organic materials and acids (except Hydrofluoric). Resistance to alkalis equals that of the thermometer glass itself.

**HYDROMETERS:** Kimble hydrometers are made from tubing having heavy walls in which the glass is evenly and uniformly distributed. Blanks are thoroughly annealed to increase mechanical strength. Scales are inscribed on strong, white ledger paper and are firmly attached to stems.

At the old prices these instruments were an excellent value, but now at the new, low prices they are no less than a sensational bargain.

N.B.S. Specifications are minimum standards for Kimble Thermometers and Hydrometers.

For detailed information about Kimble scientific glassware, call or write E. Machlett & Son today.
