GET YOUR ADVANCE COPY
of the General Program-Directory
of the AAAS Atlanta Meeting
by first class mail – early in December

The General Program-Directory of the 122nd Meeting of the AAAS in Atlanta, Georgia, Dec. 26–31, 1955, will be available to anyone, at cost, within the first week in December—whether he can attend the Meeting or not. You will want the General Program-Directory for your reference shelf.

Program content
1. The four-session symposium, “Atomic Energy and Agriculture,” arranged by ORINS.
2. The three-session program of the International Geophysical Year.
3. An AAAS-sponsored “Congress” on the shortage of young scientists and science teachers.
4. Programs of the 17 AAAS sections (symposia and contributed papers).
5. Programs of the more than 60 participating societies.
6. The Special Sessions: AAAS, Academy Conference, Conference on Scientific Editorial Problems, National Geographic Society, Phi Beta Kappa, RESA, Sigma Xi.
7. Details of the Municipal Auditorium—center of the Meeting—and hotels and campuses.
8. Titles of the latest foreign and domestic scientific films to be shown in the AAAS Science Theatre.

Directory content
1. AAAS officers, staff, committees for 1955.
2. Complete roll of AAAS presidents and their fields.
3. The more than 265 affiliated organizations.
4. Historical sketch and organization of the Association; the Constitution and Bylaws.
6. AAAS Awards and Grants—including all past winners.
7. Membership figures by sections.
8. Section committees (Council members) in detail.
9. Local committees.
10. Future Meetings of the AAAS through 1962.
11. New and current activities of the AAAS.

Advance Registration
Advance registration has these decided advantages: 1) You avoid delay at the Registration Center upon arrival; 2) You receive the General Program-Directory in ample time to decide, unhurriedly, which events and sessions you particularly wish to attend; 3) Your name is posted in the Visible Directory as the Meeting opens.

The following coupon may be used both by advance registrants and by those who wish only the advance copy of the General Program-Directory.

— THIS IS YOUR COUPON FOR AN ADVANCE COPY OF THE GENERAL PROGRAM-DIRECTORY —

1a. □ Enclosed is $2.50 for my advance Registration Fee which brings me the Program-Directory, Convention Badge, and all privileges of the Meeting.

1b. □ Enclosed is $1.50 for only the Program-Directory. (It is understood that, if I should attend the Meeting later, the Badge—which is necessary for all privileges of the Meeting—will be secured for $1.00 more.)

THE RICKETTSIAL DISEASES OF MAN

- This symposium volume is a comprehensive survey of the general field of Rickettsial diseases in man. Among the contributors appear the names of many of the foremost American authorities in this important and relatively new field of medicine.
- The first group of papers includes discussions of the taxonomy, biology, isolation, and identification of vectors, and reservoirs of infection of the Rickettsial diseases of man. The second group of papers is devoted to discussions of serological reactions, the Weil-Felix reaction, the complement-fixation and agglutination reactions, and the preparation and standardization of Rickettsial vaccines. The final group of papers treats of insecticides, methods of their application, and mite control.

To: AAAS Publications  
1515 Mass. Ave., N.W., Washington 5, D.C.

Please accept my order for one copy of The Rickettsial Diseases of Man (7½ x 10½, clothbound). My check in correct payment is enclosed ($5.25 to A.A.A.S. members, $6.25 to those who are not members; including postage.)

THE JOURNAL OF BIOPHYSICAL AND BIOCHEMICAL CYTOLOGY

This new publication of The Rockefeller Institute is edited by: Richard S. Bear, H. Stanley Bennett, Albert L. Lehninger, George E. Palade, Keith R. Porter, Francis O. Schmitt, Franz Schrader, and Arnold M. Seligman.

The purpose of this new Journal is to provide a common medium for the presentation of morphological, biochemical, and biophysical studies of the structure of cells and their components and the function of these components. Papers are favored which integrate information derived from the newer approaches to the problems of cell biology such as histochemistry, cytochemistry, electron microscopy, and x-ray diffraction.

In general, articles submitted should be limited in length to 25 printed pages. though occasionally longer papers may be published. Short notes of 1500 words or less on preliminary findings are also accepted. Manuscripts should be sent to the Editors of The Journal of Biophysical and Biochemical Cytology, The Rockefeller Institute, New York 21, N. Y.

The Journal is issued bimonthly, six numbers constituting a volume. The price is $7.50 per volume and there is no extra charge for domestic or foreign postage. Orders should be addressed to The Journal of Biophysical and Biochemical Cytology, The Rockefeller Institute, New York 21, N. Y.

The current issue is Vol. 1, No. 4, July, 1955; Nos. 1, 2, and 3 can be obtained with a subscription, or as single copies at $1.50 each.

THE LUMINESCENCE OF BIOLOGICAL SYSTEMS

A Symposium Volume of the American Association for the Advancement of Science

Edited by Frank H. Johnson, Princeton University

6 x 9 inches, 466 pages, 161 illustrations; author, genera and species, and subject indexes; bibliographies, clothbound

Retail price $7.00 AAAS Members’ prepaid order price $6.00

This volume includes papers presented by some thirty leading investigators at a conference on Luminescence in April 1954. Fundamental aspects of “cold light”—bioluminescence, fluorescence, phosphorescence, and chemiluminescence—are considered in detail. The latest advances reported here emphasize the general significance of researches in this field and point to problems that are a challenge for future work. The range of material critically examined extends from the purely physical through the biochemical and physical chemical to the purely physiological and ecological. In addition to chemically defined systems in solution, a wide range of organisms are considered, including green plants, bacteria, fungi, Cypridina, fireflies, Gonyaulax and other dinoflagellates, and various higher animals. An important feature is a comprehensive survey and discussion of luminous organisms of Japan and the Far East.

**THE Reco FRACTION COLLECTOR FOR CHROMATOGRAPHY**

**CHECK THESE IMPORTANT FEATURES OFFERED BY THE NEW RECO MODEL F1200**

Two Methods of Collection... timed-flow and volumetric. Fully automatic... whether set for timed-flow or volumetric operation. Collects up to 400 samples... resulting in sharper differentiation of components. Readily Interchangeable Receiver Plates... affording widely varied volumes per fraction. Four Chromatographic Columns Can Be Operated Simultaneously... each delivering into an individual row of tubes. Collects samples on a volume basis as small as 3cc... and up to 90 ml, with standard receiver plates. Timed interval between tubes from 30 seconds to 50 minutes. Samples in full view for ready observation. Accurate... and completely dependable in performance.

**STANDARD EQUIPMENT:** Stand with four stainless steel support posts. Heavy duty worm gear reduction motor with indexing mechanism. Two receiver plates: one holding 400 13 mm tubes, the other 100 25 mm tubes. Three volumetric siphon assemblies. Timer/Controller.

Literature describing the complete line of RECO Paper Partition Chromatographic Equipment and Supplies sent on request.

PERSONNEL PLACEMENT

POSITIONS WANTED

(a) **Bacteriologist**; Ph.D.; 5 years head, bacteriology and mycology, large Eastern concern; seeks industrial research appointment. (b) **Physiologist**; recent Ph.D.; also qualified endocrinology; 1½ years teaching experience; seeks research institute or pharmaceutical appointment; East. (c) **Biochemist**; Ph.D.; also qualified bacteriology; 4 years experience, research biochemist; prefers research in protein investigation; any location. Woodward Medical Bureau, 185 N. Wabash, Chicago. X

Bacteriologist-Biochemist; Ph.D.; research and teaching experience; skilled in Warburg techniques, spectroscopy, chromatography; intermediate metabolism. Box 233, SCIENCE. X

Biochemist; B.S.; 2 years graduate study; 2 years experience adrenal steroid chemistry; desires research position; East. Box 237, SCIENCE. X

Chemist, organic; M.S. equivalent, minor biochemistry; 3 years food research and development. 4 years very local experience; desires work on research team; age 33; family. Box 236, SCIENCE. 9/9

(a) **Certified clinical chemist**; Ph.D.; 8 years, head, university department of chemistry; 3 years, chief, chemistry department, 600-bed hospital. (b) **Electron microscopist** trained in biological sciences; 7 years, research scientist, state department of research, Medical Bureau. (Bur- natie Larson, Director), Palmolive Building, Chicago. X

Scientificks, vol 198

(b) Two Board Internists qualified hematology or nutrition and 3 internists experienced clinical medicine; research department, large company; day off weekly for teaching, clinical medicine; $12,000-$15,000; East. (b) Statistician to serve as assistant or associate professor, university school of medicine. (c) **Clinical bacteriologist**; Ph.D. or Master's; assistant professor of pathology; large city, medical center. East. (d) Physicist to join staff, biomedical and pharmaceutical company: duties: clinical research, industrial medicine. East. (E) Statistics (Ernest Larson, Director), Palmolive Building, Chicago. X

(b) **Microbiologist**; biochemist, bio-micro; B.S.; woman; age 29; 8 years experience large pharmaceutical company, supervise sterility tests and trouble shooting; seeks interesting and challenging position; available October; salary $7200. Box 231, SCIENCE. X

POSITIONS OPEN

Biochemist; recent Ph.D.; join research team biochemistry in hypersensitivity; Midwestern medical school; new modern laboratory; future for right man. Write background fully, salary expected. Box 230, SCIENCE. 9/2

Biochemist; Ph.D.; clinical chemist preferred; 225-bed general hospital in New England; assits in internist, resident medical technology training programs; possible teaching association with university. Box 235, SCIENCE. 9/9

SCIENTISTS FOR OCEANOGRAPHIC RESEARCH

With Master's or Doctor's degree in physics, geophysics, biology, or mathematical physics. Experience and interest in marine research desirable. For detailed information write for interview appointment with member of scientific staff. Please send your resume. WOODS HOLE OCEANOGRAPHIC INSTITUTION, WOODS HOLE, CAPE COD, MASSACHUSETTS

(b) **Toxicologist**; Ph.D. with general pharmacology, physiology knowledge, take charge toxicological work, new pharmaceutical compound; plan, carry out animal experiments; administrative duties; East. (b) **Biochemist**; familiar with body chemistry; research; responsible for preparation of proprietary, modes of action of drugs; Ph.D.; product development laboratory, noted concern; Midwest. (c) **Associate bacteriologist**; head branch laboratory; state health department; 6 months training program at full salary; M.S. or equivalent experience; East. (d) **Anatomist**; organize department; graduate level classroom and laboratory teaching; prefer qualified histologist; new dental school, affiliated well-known Eastern college. (e) **Research Assistant in Virology**; M.S. or equivalent experience; work on animal, egg inoculations, serological determinations; handle infectious human, animal pathologic; potentially section head; pharmaceutical house; East. Woodward Medical Personnel Bureau, 185 N. Wabash, Chicago. X

BIOLOGISTS

Established medium-size pharmaceutical firm has several attractive positions available in basic research. Company has just completed the latest step in a continuing expansion of its research program—a modern, air-conditioned, completely equipped research building in a mid-New York State rural community in popular hunting and fishing area. Complete employee benefits.

**PHARMACOLOGIST**—Ph.D. or M.D., male, 30-40 years of age, to head division of Pharmacology. Training in pharmacodynamics and several years experience in application of pharmacological techniques to development of new medicinal agents essential. Some supervisory and administrative experience desirable.

**ViroLOGIST**—B.S. or M.S. in Virology or Bacteriology, familiar with animal inoculations, some experience in new Virology section. Two or more years experience in any related work wanted and some experience in other essential: serological examinations, animal inoculations, tissue culture preparation, and chick embryo inoculation.

Please forward résumés to Personnel Department, Eaton Laboratories, Division of The Norwich Pharmacal Company, Norwich, New York.

AN EVALUATION OF RELATIVITY THEORY AFTER A HALF CENTURY

By C. A. Muses, M.A., Ph.D.

'Dr. Muses' study embraces several aspects of value both to technical and non-technical readers. It first of all provides an introduction to often little known historical aspects of relativity theory, throwing welcome light on the work of H. A. Lorentz, and its fundamental importance.

Secondly, it provides a clear-cut, understandable explanation of the theory in the light of its key concepts and their analysis.

Thirdly, modern contributions, such as the work of Hlavaty, are analyzed in terms of their usefulness and physical meaning, thus completing perhaps the most useful phase of a useful book, namely, its discussion of the directions in which the most advanced thinking on relativistic interpretation is tending.

Fourthly, certain original data are for the first time published, such as the relation of Cerenkov radiation to electronic aspects of relativity theory.

How to put the HEX on cylinder costs

Ever try to roll a hex-shaped item?

That’s why we put hexagonal bases on the PYREX graduated cylinders we make for lab use. The hex means more stability, no-roll—longer life for your cylinders.

But, the base is an obvious feature—one of those Corning “extras” that comes from years of design experience. Of more importance is the accuracy you get with PYREX graduated cylinders.

Each cylinder is individually calibrated and graduated. And whether you require cylinders to meet A.S.T.M. Standards or Bureau of Standards accuracy, there is a PYREX cylinder to serve your purpose.

The Lifetime Red calibrations on certain models provide exceptional legibility. These graduations are permanently etched through a red layer of glass—cannot be affected by scratching or loss of filler. They stand out clearly, make for easy reading.

All PYREX cylinders have fire-polished, chip-resistant rims. And, being made of PYREX brand glass No. 7740, they stand up under chemical attack, thermal shock and physical knocks—provide years of dependable, economical service.

PYREX® laboratory ware

... the tested tool of modern research

A special beaded rim below the pourout on Catalog No. 3046 is extra insurance against breakage since it keeps the lip from being a point of contact.

PYREX cylinders come in shapes, sizes and types to meet every laboratory use. Details (including prices) are spelled out in Bulletin LP34: “Laboratory Glassware.” This 200-page catalog also contains information on the complete Corning line of laboratory glassware. Send for your free copy.

Order PYREX cylinders from your regular supply dealer. The day you get your first delivery is the day you start putting the hex on cylinder costs.

CORNING GLASS WORKS

1., 2., 6.—No. 3046—Lifetime Red, graduated, single metric scale with pourout, hexagonal base, and reinforcing bead.

3., 7.—No. 3042—Lifetime Red, graduated, single metric scale with pourout and hexagonal base.

4.—No. 2982—Graduated, single metric scale with penny head $ stopper and hexagonal base.

5.—No. 3022—Graduated, single metric scale with pourout and hexagonal base.
Tooled to save costs.
AO Rapid Scanning Spectrophotometer now priced at $2396.00.
Reflection Attachment; $297.00.

NEW PULSING ATTACHMENT
This new electronic attachment permits a choice of one, six or sixty scans per second. Some slow chemical reactions cause the normal 60 cycle scan to produce partially overlapping or blurred spectrum curves. For studying such reactions, this attachment produces well separated, meaningful curves.

NEW REMOTE INDICATING SPECTROPHOTOMETER
Allows placement of indicator unit up to 50 feet away from the sample chamber. For use on control problems of flowing materials such as dyes or petroleum products. If your process control check is located some distance away from the point where actual changes are made, this new remote feature can be a valuable tool.

FAST, ACCURATE, EASY TO OPERATE—a laboratory workhorse that adds the element of instantaneous results to routine analysis, investigative and general spectrophotometric work.

RAPID SCANNING FEATURE allows rapid analyses of transparent or opaque materials; gaseous, liquid or solid. Allows monitoring of flowing processes. Allows following of color changes and transient phenomena. How? The AO SPECTROPHOTOMETER traces 60 separate curves per second on the face of a cathode ray recording a “moving picture” of color changes taking place in a specimen over the entire visible spectrum (all wave lengths from 400 to 700 millimicrons).

Sample chamber accommodates transparent samples up to 100mm thick. An accessory reflection attachment enables the instrument to produce data from opaque surfaces as small as one inch square.

Permanent records can be made with any of the standard 5” oscilloscope cameras.
