What will the world be like in 2055?

In this new book, Sir George Thomson ventures a forecast of what science can accomplish in the next hundred years—the foreseeable future. These are not the wild guesses of science-fiction, but the informed predictions of a Nobel Prize-winning physicist. His approach is level-headed; his writing is clear and non-technical; the new world he portrays is strange and exciting. Some of the things which can happen are:

- Monkeys trained to harvest oranges and cotton
- Dinner cooked by rays of the sun
- 90-year-olds looking and feeling like 25
- Dust cloths relegated to museums
- Travel time from New York to London shortened to 90 minutes
- Domestic workers subsidized by the government
- Sea sick pills a must for space travel
- Greenland freed of ice and a vegetable garden in the Sahara
- Atoms to heat city apartments

This is a look into the future by a seer who is a scientist. His crystal ball is a sound knowledge of what we can and can’t do. His is a utopia that we can live to see.

THE FORESEEABLE FUTURE

By Sir George Thomson

$2.50, at your bookseller's

CAMBRIDGE University Press

Ranging from a 400 ml all glass unit to an 8 liter capacity stainless steel apparatus, Machlett's diverse line of freeze-drying equipment are all self contained and do not require a dry ice chamber or condenser. However, trap should be used for protection to pump.

While all of the apparatus can be autoclaved as a unit, the macro and super drying units hold enough dry ice and solvent for overnight operation. Their large inner cooling chambers also lend themselves readily to shell freezing.

VIRTIS FREEZE-MOBILE

R36-693-3 This convenient assembly illustrated above is mounted on a sturdy stainless steel cart with casters. It consists of the macro unit and super trap (both described below), McLeod Gage (without mercury) and a 1-3 H.P. Booster pump ........ $755.00

Freeze-Mobile as above with Super Drying Unit ........ $865.00

VIRTIS SUPER UNIT

R36-693-2 Super Drying Unit has 18 drying ports each capable of removing 450 ml of water and has an 8 liter solvent chamber $275.00

VIRTIS MACRO UNIT

R36-693 Macro Unit has 12 drying ports each capable of removing 100 ml water and has a 2.8 liter solvent chamber ........ $145.00

VIRTIS MICRO UNIT

R36-693-1 Micro Drying Unit has 6 drying ports each capable of removing 25 ml of water and has an 800 ml solvent chamber .... $75.00

R36-693A Standard Trap for Macro and Micro Units .......... $42.00

R36-693-4 Super Trap for use with Super Unit .......... $75.00

GET YOUR ADVANCE COPY

of the General Program-Directory
of the AAAS Atlanta Meeting
by first class mail — early in December

The General Program-Directory of the 122nd Meeting of the AAAS in Atlanta, Georgia, Dec. 26–31, 1955, will be available to anyone, at cost, within the first week in December—whether he can attend the Meeting or not. You will want the General Program-Directory for your reference shelf.

Program content
1. The four-session symposium, "Atomic Energy and Agriculture," arranged by ORINS.
2. The three-session program of the International Geophysical Year.
3. An AAAS-sponsored "Congress" on the shortage of young scientists and science teachers.
4. Programs of the 17 AAAS sections (symposia and contributed papers).
5. Programs of the more than 60 participating societies.
6. The Special Sessions: AAAS, Academy Conference, Conference on Scientific Editorial Problems, National Geographic Society, Phi Beta Kappa, RESA, Sigma Xi.
7. Details of the Municipal Auditorium—center of the Meeting—and hotels and campuses.
8. Titles of the latest foreign and domestic scientific films to be shown in the AAAS Science Theatre.

Directory content
1. AAAS officers, staff, committees for 1955.
2. Complete roll of AAAS presidents and their fields.
3. The more than 265 affiliated organizations.
4. Historical sketch and organization of the Association; the Constitution and Bylaws.
6. AAAS Awards and Grants—including all past winners.
7. Membership figures by sections.
8. Section committees (Council members) in detail.
9. Local committees.
10. Future Meetings of the AAAS through 1962.
11. New and current activities of the AAAS.

Advance Registration
Advance registration has these decided advantages: 1) You avoid delay at the Registration Center upon arrival; 2) You receive the General Program-Directory in ample time to decide, unhurriedly, which events and sessions you particularly wish to attend; 3) Your name is posted in the Visible Directory as the Meeting opens.

The following coupon may be used both by advance registrants and by those who wish only the advance copy of the General Program-Directory.

— THIS IS YOUR COUPON FOR AN ADVANCE COPY OF THE GENERAL PROGRAM-DIRECTORY —

1a. □ Enclosed is $2.50 for my advance Registration Fee which brings me the Program-Directory, Convention Badge, and all privileges of the Meeting.

1b. □ Enclosed is $1.50 for only the Program-Directory. (It is understood that, if I should attend the Meeting later, the Badge—which is necessary for all privileges of the Meeting—will be secured for $1.00 more.)

2. FULL NAME (Dr., Miss, etc.) .................................................................

GARDEN SPICE and Wild Pot-Herbs

By Walter C. Muenscher, Emeritus, Cornell University; and Myron A. Rice, horticultural expert at Yale University. Wood engravings by Elfriede Abbe, artist and scientific illustrator at Cornell University.

A beautiful book for those who want to know and grow herbs

"AT LAST we have a modern book to rival the great herbals of the fifteenth and sixteenth centuries. Here are pictures which are a delight to the eye, yet so distinctive of the plants they portray that the better one knows these herbs, the more he will treasure the pictures as portraits of old friends. The botanical descriptions, the notes about the uses of the herbs, and suggestions about growing them in the garden are all pithy and accurate... There has been no better nor more beautiful book on herbs in modern times and it is to be doubted if a serious competitor will appear for many years."—Edgar Anderson, Engelmann Professor of Botany in Washington University and Director of the Missouri Botanical Garden

218 pages, 56 full-page wood engravings, and 14 smaller illustrations 8½ x 11 inches $5.75

Educational edition at $4.30 available for classroom use only

Comstock Publishing Associates, A Division of Cornell University Press, Ithaca, N.Y.
PERSONNEL PLACEMENT

POSITIONS OPEN

(a) Pharmacologist, Ph.D., to serve as group leader; would have responsibility for pharmacology screening program; pharmaceutical company. Michigan Director, newly created post; well-known company specializing in fine chemical specialties, presently developing pharmaceutical division; research-minded physician interested in dermatology preferred. (b) Physiologist, particularly interested in gastro-enterology or in another subdivision of physiology, qualified to conduct independent research; assistant, associate, or full professor; $6000-9000. (c) Medical Writer, bachelor’s in biology, 2-3 years experience required; $550-650; New York City. S11-3 Medical Bureau (Burneice Larson, Director), Palmolive Building, Chicago, X.

GRANTS

NATIONAL RESEARCH COUNCIL OF CANADA

The National Research Council of Canada will award for 1956-57 approximately 90 Fellowships for fundamental research in Science and Engineering. Of these, 50 will be tenable in the Council’s laboratories in Ottawa, Saskatoon, and in 15 laboratories of the Canada Department of Agriculture at various centers. 15 laboratories of the Canada Department of Mines and Technical Surveys in Ottawa and Victoria, and 10 in Canadian university laboratories.

Applicants should not be more than 35 years of age and should possess a Ph.D. degree from a recognized university, or expect to obtain such a degree before taking up an award. There are no restrictions regarding nationality of candidates, but successful candidates must meet all Canadian immigration requirements.

The annual stipend, which is free of income tax, is $2300 for a single Fellow and $2400 for a married Fellow. An allowance toward the cost of travel is also paid.

The fields in which Fellowships are available are in the laboratories of the National Research Council, the Department of Agriculture, and the Department of Mines and Technical Surveys. Descriptions of laboratories in which Fellowships are available may be obtained on request, together with application forms. Applicants who are interested in Fellowships in the Universities may write directly to the Universities, or to the National Research Council for information. The closing date of the competition is 15 February 1956.

Booklets and application forms may be obtained from Awards Officer, National Research Council, Ottawa 2, Canada.

BOOKS AND MAGAZINES

AN EVALUATION OF RELATIVITY THEORY AFTER A HALF CENTURY

By C. A. Muses, M.A., Ph.D.

"Dr. Muses' study embraces several aspects of value both to technical and non-technical readers. It first of all provides an introduction to often little known historical aspects of relativity theory, throwing welcome light on the work of H. A. Lorentz, and its fundamental importance.

Secondly, it provides a clear-cut, understandable explanation of the theory in the light of its key concepts and their analysis.

Thirdly, modern contributions, such as the work of Hilavaty, are analyzed in terms of their usefulness and physical meaning, thus completing perhaps the most useful phase of a useful book, namely, its discussion of Gabor’s radiation in electronic aspects of relativity theory."—Mathematics Magazine

MACHLETT

Your assurance of the finest laboratory supplies, scientific instruments, chemicals and glassblowing

E. Machlett & Son  220 E. 23rd St.  N. Y. 10, N. Y.

1038  Science, Vol. 122
Electrothermal Heating Tapes consist of one or more fabric bands of resistance wire, separated or bordered by bands of high-temperature-resisting glass fiber yarn. The width and length of the various tapes are carefully determined by the current carrying capacity of the resistance wire. Temperatures of 400°C and over can be reached inside a glass tube of 2mm wall thickness.

No. 55809 Powerstat, Variable Transformer, for controlling temperature of Heating Tapes. Has input of 115V, 50/60 cycles. Maximum output rating 7.5 amps. each $23.00

DEALERS' INQUIRIES INVITED

Three Types Available

1. UNINSULATED—Current-carrying resistance wires are in direct contact with the surface to be heated. It is possible to look through this tape and it is of great value for research work when wound on a transparent surface.

2. INSULATED ON ONE SIDE—This tape is also applied with direct contact between the resistance wire and the surface to be heated . . . but heat losses to atmosphere are greatly reduced by the addition of a layer of knitted glass yarn on one side.

3. INSULATED ON BOTH SIDES—This tape is composed of two insulation layers with current-carrying bands in the center. May be safely wound on metal making it specially suitable for heating steel tubes, valves, nozzles and other conducting surfaces.

The tape is simply wound around the body to be heated, and is held in position by glass laces at both ends. A suitable control device such as a "Powerstat" or variable auto-transformer should be used with the tapes.

---

STANDARD SCIENTIFIC SUPPLY CORP.
34 West 4th Street • New York 12, N.Y.

ALL THE APPARATUS, EQUIPMENT, SUPPLIES, CHEMICALS AND REAGENTS NEEDED TO RUN TODAY'S MODERN LABORATORIES.
RAPID SCANNING SPECTROPHOTOMETER Tooled to save costs.

Now priced at $2396.00. Reflection Attachment: $297.00.

The AO Rapid Scanning Spectrophotometer traces 60 separate curves per second recording a "moving picture" of color changes taking place in a specimen over the entire visible spectrum (wave lengths from 400 to 700 millimicrons). Allows fast analysis of transparent (up to 100mm thick) or opaque materials; gaseous, liquid or solid. In addition to general investigative work it can be used for following color changes and transient phenomena.

New Remote Indicating Spectrophotometer — The answer to certain control problems on flowing materials such as dyes or petroleum products. Indicator unit can be placed up to 50 feet away from spot where check on process takes place.

New Pulsing Attachment — This new electronic attachment allows a choice of one, six or sixty scans per second. Some slow chemical reactions cause the normal 60 cycle scan to produce partially overlapping or blurred spectrum curves. For studying such reactions, this attachment shows well separated, meaningful curves.
