Fluorescence Microscopy is becoming increasingly important in fundamental research, histology and physiology, as well as clinical and diagnostic routine examinations in haematology, bacteriology and parasitology.

THE ZEISS WINKEL LARGE FLUORESCENCE EQUIPMENT was especially designed to completely fulfill the requirements of modern fluorescence microscopy. Ultra-violet or blue-violet excitation is established by means of special filter combinations, permitting fluorescence observation over the entire range of the visible spectrum. Transparent as well as opaque specimens can be examined with this equipment.

A high-pressure mercury vapor burner produces such intense luminosity that the equipment is not only suitable for observation but also photomicrography. For this type of work we recommend the well-known Attachment Camera with beam-splitting prism for fluorescent light and camera body for 35mm color or black-and-white films.

**LOURDES INSTRUMENT CORP.**

53rd ST. & 1st AVE. BROOKLYN 32, N.Y.
"From the nature of things, ideas do not come from prosperity, affluence and contentment, but rather from the blackness of despair, not in the bright light of day or in the footlight’s glare but rather in the quiet, undisturbed hours of midnight or early morning when one is alone to think!" ... Dr. Frederick Banting.

The young doctor intimately knew despair

A specialist before the age of specialization, he had a new practice complete except for patients. An orthopedic surgeon, he eagerly accepted the chance to teach anatomy and physiology at the local university’s medical school. Teaching required long nights of study for lecture preparation. It was during one such session on the pancreas that his idea came.

A medical journal article reported that the entire pancreas, except the portion called the islets of Langerhans, could atrophy without the patient’s contracting diabetes.

Curious! The doctor recalled another fact: Removing the entire pancreas invariably resulted in diabetes. From these observations came the idea that led to the discovery of insulin by Dr. Frederick Banting, the young orthopedic surgeon, and his colleague, Dr. Charles A. Best.

As with most scientific hypotheses, there lies between inspired idea and proven reality a period of trial and error, an often distinguished time of “almost but not quite.”

And it is in this time all the more important to have extreme control over all known values in order to gain control over the unknowns.

We offer a suggestion: Wherever in research you use glass apparatus, standardize on Pyrex brand laboratory ware. Its extreme chemical stability does not alter the materials you place in it. For 40 years the balanced properties of Pyrex brand ware have helped scientists in their explorations of the unknown.

To experiment, test, compare—and still be sure—standardize on Pyrex ware. Your laboratory supply dealer can fill your requirements.

Research Films
IN BIOLOGY, ANTHROPOLOGY, PSYCHOLOGY, AND MEDICINE

By ANTHONY R. MICHAELIS
Technical Director, Scientific, Industrial, and Medical Photographic Laboratories, Ltd., London

With Foreword by SIR ROBERT WATSON-WATT

1955, 490 pp., illus., $10.00

Research Films is concerned with the techniques and applications of cinematography in the experimental sciences. It is the first comprehensive survey of the field to be written in English in the last forty years. Designed for producers and users of research films, the work describes the methods successfully employed in the past and opens new vistas for the utilization of film as a research tool.

CONTENTS:
Scientific Cinematography and the Research Film:
An Introduction

1. THE BIOLOGICAL SCIENCES: Cinemicrography—Biology—Animal Behavior
2. THE HUMAN SCIENCES: Human Record Films—Anthropology—Psychology and Psychiatry
3. THE MEDICAL SCIENCES: Techniques of Medical Cinematography—Techniques of X-Ray Cinematography—Medicine

Epilogue: Author and Reference Index—Subject Index.

RESEARCH REPORTS from BRITAIN

☐ SCIENTIFIC RESEARCH IN BRITISH UNIVERSITIES
Brief notes outlining the scientific research being undertaken in British Universities and University Colleges. The entries are arranged in alphabetical order of University and an alphabetical name index to all the research workers mentioned has been included.
526 Pages Price $2.36

☐ BRITAIN'S ATOMIC FACTORIES—1954
by K. E. B. Jay, B.Sc.
The story of atomic energy production in Britain. Descriptions of the Uranium Factory at Springfields, the Plutonium Factory at Windscale, the 250 Factory at Capenhurst, and the controlling headquarters Organization at Risley. An appendix gives a short summary of the discoveries in physics and of the physical basis upon which the development of atomic energy rests.
126 pp. 16 plates & 9 diagrams $9.50

☐ GOVERNMENT SCIENTIFIC ORGANIZATION IN THE CIVILIAN FIELD
A revised and enlarged by the Advisory Council on Scientific Policy, including chapters on Historical Background, Past War Developments, The Role of Universities, Overseas Scientific Relations, Colonial Research, Government expenditures on Scientific Research.
47 pp. $0.35

☐ DEPT. OF SCIENTIFIC & INDUSTRIAL RESEARCH
A report of the Committee of the Privy Council for Scientific and Industrial research containing brief reviews of the work carried out by the Research Establishments of the Department of Scientific and Industrial Research.
326 pp. $1.70

☐ BIBLIOGRAPHY OF INDUSTRIAL DRYING
This bibliography is divided into 5 sections and published in 3 volumes. A contents list for the relevant sections is included at the beginning of each volume and a list of sources quoted in the text is given at the end of Volume III.
802 pp. (3 Volumes) $5.12 per set

☐ ANALYSIS OF SYMMETRIC CYLINDRICAL SHELLS
by John McNamee, Ph.D.
Thin-shelled roof construction is now generally accepted as a specialized structural form. This book gives an account of the theory of thin cylindrical shells. The author in his treatment of the static analysis of reinforced concrete structures is illustrated by detailed commercial examples.
85 pp. $2.86

☐ PLASTICS
A collection of 21 reports on research into the chemical, physical and mechanical properties of plastics and high polymers. 472 pp. 162 Illustrations (4 in color)
Bibliography & Index $0.50

☐ NATIONAL COLLECTION OF INDUSTRIAL BACTERIA—CATALOGUE OF STRAINS
The National Collection Industrial Bacteria was established at the Chemical Research Laboratory, Teddington, in 1950 with approximately 200 strains taken over from the National Collection of Type Cultures, Colindale. The collection now contains over 400 cultures which are of industrial or scientific interest. The catalogue lists the cultures which are available for supply to research and industrial laboratories and to educational establishments.
34 pp. $0.41

☐ ENGINEERING DIMENSIONAL METROLOGY
The proceedings of an international symposium held at the National Physical Laboratory in October 1953 deal with workshop inspection, pneumatic gauging, machine tools, gear measurements, education, small-scale metrology, large-scale metrology, and surface finish. They comprise forty papers together with summarized discussions and are profusely illustrated.
696 pp. $8.80

☐ HUMAN RELATIONS IN INDUSTRY—1953-54
The first report of the Joint Committee appointed in March 1953 “to examine current activities concerning the study of human relations in industry and to call attention to problems of special timeliness and promise, on which research, including applied research and field study, might be undertaken or supported by the Department of Scientific and Industrial Research, the Medical Research Council or other bodies.”
15 pp. $0.23

☐ SERVICES RUBBER INVESTIGATIONS USERS' MEMORANDA WITH REVISIONS AND ADDENDA
The present volume, containing much information not to be found elsewhere is divided into nine chapters with the following titles: Properties of synthetic rubbers and rubber-like materials; Natural and synthetic rubbers at elevated temperatures—aging, heat and oil resistance; Natural rubber and synthetic rubbers at low temperatures; Natural and synthetic rubbers as engineering materials; the shrinkage of natural rubber in moulding; Natural and synthetic rubbers—creep phenomenon; Synthetic rubbers—the effect of high-grade aviation fuels; Natural and synthetic rubbers—hardness measurements; natural and synthetic rubbers—identification and determination.
338 pp. $4.67

☐ FERTILIZERS IN FISHPONDS—1954
by C. H. Mortimer, D.Sc.
Brings under one cover abstracts of all available publications and papers dealing with the fertilization of fishponds and kindred matters of pond management and biology.
160 pp. Index $4.67

2 DECEMBER 1955 1111
for Student Laboratory use in Biology, Zoology and Physiology

PHYSIO STIMULATOR

The PHYSIO-STIMULATOR for students is a specially engineered instrument designed for laboratory and research work in Biology, Zoology and Physiology. Direct reading dials indicate the frequency and voltage delivered and a control lever releases the stimulating current either as a single impulse or as a series of impulses. This instrument is of professional quality throughout, yet produced at a price which makes it practical for classroom use, enabling each student to have his own stimulator to carry on his experimentation.

FEATURES

- Operates on 105-120 volt, 50-60 cycle AC
- Direct reading controls:
  * regulate stimulating voltage from 0 to 100.
  * regulate frequency from 8 to 75 pulses per second.
- Expanded ranges on voltage control permit accurate determination of output in segment used for "threshold" measurements.
- Dial controls accurately and easily reset to any position. Experiments can be repeated or continued at future times merely by resetting controls to previous positions.
- Impulse Control Lever:
  * provides in the "up" position a train of impulses exactly to the frequency dialed.
  * provides in the "down" position a single impulse which may be repeated at will.
  * neutral "center" position delivers no impulses.
- Switch circuit provided for operating a Marker.
- Pilot light on "Off" toggle switch
- Compact cabinet measures 6" x 6" x 6"
- Approved 6-ft. rubber covered cord and rubber plug
- Metal case, black crackle finish
- Rubber feet on bottom and back for normal or upright operation.

PHYSIO STIMULATOR, Model N-103-B Complete (Less Leads) .... $37.50
PHYSIO STIMULATOR, Model N-103-B5 provides 5-volt AC for Marker Circuit; Complete (Less Leads) .................. 42.50
OUTPUT LEADS, Black and red colored vinyl insulated handles with 48" leads and molded tip plugs .................................. 2.10

LAB-TRONICS, INC., is an organization of internationally known medical and engineering research scientists dedicated to the development, design, and manufacture of precision apparatus for research in such scientific fields as Physiology, Neurology, Histology, Biochemistry, Pathology, Neurosurgery, Physical-Chemistry, and Biophysics, and employing the most advanced techniques in electronics and engineering.

LAB-TRONICS INCORPORATED
1115 W. WASHINGTON BLVD. - CHICAGO 7, ILLINOIS

The following Schwarz Preparations are available to assist and extend studies in metabolic and enzymic functions:

- ADENOSINE PHOSPHATES
- NUCLEIC ACIDS AND METALLIC NUCLEATES
- NUCLEOTIDES AND NUCLEOSIDES
- PURINES AND PYRIMIDINES
- SUGARS AND SUGAR PHOSPHATES
- GLUTATHIONE COMPOUNDS
- SULFHYDRIYL REAGENTS
- THYMIDINE
- COZYMASE
- L- AND D-AMINO ACIDS, Optically Standardized
- RADIOCHEMICALS, Isotopically Labeled with C14 or S35

These Schwarz Preparations meet the exacting requirements of products intended for use in biochemical research. Write for informative technical bulletins, complete specifications and references to literature.

GET YOUR ADVANCE COPY

of the General Program-Directory
of the AAAS Atlanta Meeting
by first class mail — early in December

The General Program-Directory of the 122nd Meeting of the AAAS in Atlanta, Georgia, Dec. 26–31, 1955, will be available to anyone, at cost, within the first week in December—whether he can attend the Meeting or not. You will want the General Program-Directory for your reference shelf.

Program content
1. The four-session symposium, "Atomic Energy and Agriculture," arranged by ORINS.
2. The three-session program of the International Geophysical Year.
3. An AAAS-sponsored "Congress" on the shortage of young scientists and science teachers.
4. Programs of the 17 AAAS sections (symposia and contributed papers).
5. Programs of the more than 60 participating societies.
6. The Special Sessions: AAAS, Academy Conference, Conference on Scientific Editorial Problems, National Geographic Society, Phi Beta Kappa, RESA, Sigma Xi.
7. Details of the Municipal Auditorium—center of the Meeting—and hotels and campuses.
8. Titles of the latest foreign and domestic scientific films to be shown in the AAAS Science Theatre.

Directory content
1. AAAS officers, staff, committees for 1955.
2. Complete roll of AAAS presidents and their fields.
3. The more than 265 affiliated organizations.
4. Historical sketch and organization of the Association; the Constitution and Bylaws.
6. AAAS Awards and Grants—including all past winners.
7. Membership figures by sections.
8. Section committees (Council members) in detail.
9. Local committees.
10. Future Meetings of the AAAS through 1962.
11. New and current activities of the AAAS.

Advance Registration

Advance registration has these decided advantages: 1) You avoid delay at the Registration Center upon arrival; 2) You receive the General Program-Directory in ample time to decide, unhurriedly, which events and sessions you particularly wish to attend; 3) Your name is posted in the Visible Directory as the Meeting opens.

The following coupon may be used both by advance registrants and by those who wish only the advance copy of the General Program-Directory.

— THIS IS YOUR COUPON FOR AN ADVANCE COPY OF THE GENERAL PROGRAM-DIRECTORY —

1a. ☐ Enclosed is $2.50 for my advance Registration Fee which brings me the Program-Directory, Convention Badge, and all privileges of the Meeting.

1b. ☐ Enclosed is $1.50 for only the Program-Directory. (It is understood that, if I should attend the Meeting later, the Badge—which is necessary for all privileges of the Meeting—will be secured for $1.00 more.)

APPLICATION FOR HOTEL RESERVATIONS

122nd AAAS MEETING

Atlanta, Ga., December 26-31, 1955

The list of hotels and their rates and the reservation coupon below are for your convenience in making your hotel room reservation in Atlanta. Please send your application, not to any hotel directly, but to the AAAS Housing Bureau in Atlanta and thereby avoid delay and confusion. The experienced Housing Bureau will make assignments promptly; a confirmation will be sent you in two weeks or less. As in any city, single-bedded rooms may become scarce; double rooms for single occupancy cost more; if possible, share a twin-bedded room with a colleague—and also save money. Mail your application now to secure your first choice of desired accommodations. All requests for reservations must give a definite date and estimated hour of arrival, and also probable date of departure.

HOTELS AND RATES PER DAY

*Hotels starred have sessions in their public rooms. Most hotels will place comfortable rollaway beds in rooms or suites at 2.50 or 3.00 per night. For a list of headquarters of each participating society and section—and for information on dormitory accommodations at Atlanta University and Georgia Institute of Technology—please see Science, July 22, or The Scientific Monthly, August.

YOUR ad here reaches over 32,000 foremost scientists in the leading educational, industrial, laboratory, and research foundations in the U. S. and 76 foreign countries—at a very low cost.

CLASSIFIED: 18¢ per word, minimum charge $35.00 per Box Number. Rates count as 10 additional words.

DISPLAY: Rates listed below—no charge for Box Number. Monthly invoices will be sent on a charge account basis—provided that satisfactory credit is established.

Single insertion $22.00 per inch
13 times in 1 year 21.00 per inch
26 times in 1 year 20.00 per inch
52 times in 1 year 19.00 per inch

For proofs on display ads, copy must reach SCIENCE 4 weeks before date of issue (Friday of every week).

POSITIONS WANTED

Microbiologist; numerous papers dealing with phage, microbial genetics and viruses; 3 years teaching experience. Box 283, SCIENCE. X

Parasitologist, M.D.; 4 years experience in laboratory and in teaching. Box 283, SCIENCE.

Experimental Embryologist. McMaster University, Hamilton College, Department of Biology. Box 283, SCIENCE.

Ph.D.; M.D.; 4 years teaching experience; 2 years chief of laboratories, large army hospital. Box 283, SCIENCE.

Pathologist; forensic, general; pathology experience. Box 283, SCIENCE.

Ph.D.; M.D.; 4 years experience in laboratory and research. Box 283, SCIENCE.

Ph.D.; M.D.; 4 years teaching experience; 2 years chief of laboratories, large army hospital. Box 283, SCIENCE.

WANTED

For immediate attention—Box 283, SCIENCE.

SECRETARY TO DIRECTOR, X-RAY LABORATORY. Apply to Box 283, SCIENCE.

CHEMICAL LABORATORY MANAGER. Apply to Box 283, SCIENCE.

PERSONNEL MANAGER. Apply to Box 283, SCIENCE.

PHYSICIAN. Apply to Box 283, SCIENCE.

GENERAL LABORATORY MANAGER. Apply to Box 283, SCIENCE.

INSECT PHYSIOLOGIST. Apply to Box 283, SCIENCE.

ASSOCIATE DIRECTOR, LABORATORY. Apply to Box 283, SCIENCE.

CHEMIST. Apply to Box 283, SCIENCE.

LIBRARIAN. Apply to Box 283, SCIENCE.

Haematype Cards

- Never before, such speed and convenience in blood typing and Rh testing. Determine A, B, O and Rho right on the HAEMATYPE CARD itself... sharply reduces time-consuming procedures. So fast and easy, even mass typing is reduced to a simple routine.

  **Dade Serums Assure Accuracy**

HAEMATYPE CARDS are coated with fast-acting Dade serums, your assurance of consistent accuracy. Use with finger, oxidated or clotted blood. Cards dry in 10 minutes and become permanent records for your files. Or they can be presented to donors or patients for their billfolds.

- Because HAEMATYPE CARDS save so much technician time, they are truly economical to use. We suggest you ask your SP representative for a demonstration. Or write us direct for the complete story.

**disposable Hemolet blood lancet**

The HEMOLET, heat sterilized in a sealed envelope and used only once, avoids the possibility of transmitting infectious diseases such as virus hepatitis, homologous serum jaundice and malaria. The HEMOLET saves valuable time, too. There's nothing to load, set, wash or sterilize. Simply tear open the envelope and this sterile, stainless steel lancet is ready for immediate use. It is shaped for firm gripping and its razor-sharp point assures a perfect puncture.
THOMAS Selection of Apparatus...

The 22,000 items listed in our Catalogue and Supplement and carried in our stock have been carefully selected upon the basis of fifty-five years of experience in providing for the needs of laboratories of Chemistry and Biology, both large and small.

All subjected to careful examination

All of the items have been subjected to careful examination and testing by our Technological staff. The choice is therefore based on what we can with assurance recommend as being satisfactory for the purpose intended.

Detailed descriptions

Descriptions are accurate and detailed and include accessory and replacement parts.

A.H.T. Co. Specification items

Many important specialties and groups of items such as lamp-blown and volumetric glassware, rubber tubing, HR-108 rubber stoppers, etc., generally listed under the designation "A.H.T. Co. Specification," are in accordance with our designs or specifications. Such items are in our judgment, superior in design, performance, accuracy, appearance or durability, to similar trade articles.

Trade marked or branded items

We list and stock many articles under the manufacturer's name or brand and, while the maker is primarily responsible for the design and performance of such apparatus, we take full responsibility—having exercised discrimination in our selection—for all trade marked or branded items listed by us.

Miscellaneous items

Many of the remaining items such as spatulas, brushes, corks, files, aprons, dropping pipettes, etc., are offered under neither our name nor that of the maker. They are obtainable in a variety of grades and from competing manufacturers. Many of them are not made primarily for laboratory use. The grades we have selected are of dependable quality and uniformity and will be found highly satisfactory for laboratory use.
