ANTIMETABOLITES
AND CANCER
AAAS Symposium Volume
6" x 9", 318 pp., 54 illus., clothbound, 1955
Price $5.75,
AAAS Members' prepaid price $5.00

“This volume presents the great variety of techniques and disciplines being brought to bear on the problem of cancer therapy and the vitality of the chemotherapeutic approach to cancer. This is an important book and merits the careful consideration of cancer investigators, biochemists, pharmacologists and general biologists.” Cancer, Jan-Feb 1956.

“All who are concerned with the problems of chemotherapy in malignant disease and those who wish to broaden their knowledge of the challenging subject of antimetabolites will find a wealth of information in this edition. . .

“The text is clearly written and readily understandable by those who have a good working knowledge of biology and chemistry and are familiar with terms which are currently used in the medical sciences; it is particularly recommended to the attention of those engaged in research, teaching, and treatment of cancer, and in study of the problems of growth.” American Journal of Public Health, Feb 1956.

PERSONNEL PLACEMENT

POSITIONS OPEN

Senior Laboratory Technician. Plant pathological anatomy; master's degree or bachelor's degree and experience. Salary $3000 up. Secretary, Department of Plant Pathology, University of California, Riverside, California.

POSITIONS REQUIRING DEGREES IN MEDICINE OR SCIENCE: (a) Physiologist, Ph.D. also qualified pharmacology, research appointment, outstanding midwestern medical school; exceptional research facilities; teaching appointment may be arranged; to $3500. (b) Pharmacology Instructor; young male Ph.D. trained also in physiology, experienced in handling, measuring devices, electronic equipment as used in cardiovascular research; large hospital affiliated important eastern university medical school; $5000-$5500. (c) Chief Biochemist; initiate and coordinate research program, 360-bed medical school affiliated hospital; research at clinical and basic levels; $7500-$8000; large city; Midwest. (d) Bacteriologist; head active department, supervise staff of four technicians; newly constructed and beautifully equipped laboratory, 400-bed teaching hospital; $400 or better; large city; Pacific Northwest. (e) Organic Chemist; Ph.D., will consider well-trained recent graduate; work on synthesis directed toward finding new compounds of medicinal value; well-equipped, pharmaceutical house; $7200 minimum. Woodward Medical Personnel Bureau, 185 North Wabash, Chicago.

RESEARCH CHEMIST

To supervise a radiochemical and analytical laboratory and conduct independent research on the development and application of new analytical procedures to the radiochemistry of biological and environmental material. Salary to be arranged.

Pleasant working and living conditions, with hospital and retirement benefits. State all particulars in first letter to File 5C.

ATOMIC ENERGY OF CANADA LIMITED

Chalk River, Ontario, Canada

DEPARTMENT OF ZOOLOGY, DUKE UNIVERSITY. Applications for part-time positions in teaching and research are invited. Applicants with a master's degree and teaching experience will be favored. These openings provide generous opportunities for participating in course work and research toward the Ph.D. Inquire of Dr. L. E. Gray, Chairman, Department of Zoology, Duke University, Durham, N.C.

6/8, 22; 7/6

SMALL ANIMALS FOR RESEARCH

An outstanding producer of small animals for research will consider the appointment of an associate. Duties to include contacting research groups, acting as technical adviser on the farm, possible development of strains not now bred, and some administrative responsibilities. Training in bacteriology, biology, or animal husbandry desirable. Interest, personality, and enthusiasm important. After demonstrating ability, consideration will be given to active interest in the organization. Write fully as to training, experience, family, and expected income. Box 126, SCIENCE.

Rapid centrifugal preparation
with the Spinco Model L
ULTRACENTRIFUGE

FULLY AUTOMATIC features make the Spinco Model L Preparative Ultracentrifuge operationally self-supervising. Simple speed- and time-controls are preset by operator and electronic unit brings rotor to speed, times run, and decelerates with smoothly operating automatic brake.

Various sizes and types of interchangeable rotors mount in operating chamber with instantaneous coupling. Time between runs, using pre-loaded rotors, is less than a minute. Speed and vacuum are established almost simultaneously. Acceleration time for the 40,000-rpm rotor is only four minutes.

SAFETY FEATURES include automatic overspeed cutout; interlocks to prevent running at high speeds without vacuum in chamber and prevent breaking vacuum or opening chamber while running at high speeds. Rotor chamber is encased in thick double steel guard.

UNIT IS SELF-CONTAINED, of worktable height, and requires only electric connection for installation. Spinco electric drive and gearing system are of types proved in more than 100,000 hours of actual field operation. Self-balancing feature eliminates weighing of loaded tubes. Controllable refrigeration holds rotors and contents at any temperature down to -5 C.

In operation, the Model L applies forces up to 144,000 times gravity on 162 ml of material at a maximum speed of 40,000 rpm. Individual rotor tubes have sealing caps—are available in plastic or metal. Rotors provide second vacuum seal in quickly-detachable cover with integral lifting device. Wide selection of rotors is available with largest holding 1700 ml—
