Bacteriologist, Ph.D. or M.D. with training and interests in tuberculosis for research asso-
ciation in broad program on the biology and
therapy of pulmonary disease in man and sub-
human primates. Reply to Director, The Christ
Hospital Institute of Medical Research, Cinc-
nati 19, Ohio.

Biochemist wanted to head biochemistry division of research department at leading specialty hos-
pital. Address inquiries on or before March 15 to Martin
Secretary, Department of Research, 218 Second
Avenue, New York, N.Y., or call Greven
6-9660. 6/12

(a) Clinical Investigator and, also, Medical
Writer; former will travel 1/3 to 1/2 of his time
and pay for household expenses, to his own conveni-
ence; medical writer should have excellent
writing skills, medical background, degrees for
both positions; $12,000-$15,000. East. (b) Microbiologist and Virologist, Ph.D. degrees de-
sirable; experience principally in tissue culture
and serology; research laboratories, large city in
the East; four medical schools. (c) Biochemist,
Ph.D., well qualified in enzymology and ultra-
microtechnique; will conduct research and serve
as head of clinical tissue department; new building,
important unit of large medical center affiliated
with school of medicine; large city, Midwest. (d) Physician to handle clinical re-
search liaison, medical and international medical
staff; duties consist principally of handling cor-
respondence with clinical investigators in Europe
regarding studies of products; possibility of for-

BIOCHEMIST, Ph.D.
Biochemist with industrial or uni-
versity experience to pursue funda-
mental program in Atherosclerosis.

MANUFACTURING ENGINEER

Successful M.S. experience in chemical engi-
neering to fill the position of Manufacturing
Engineer, in a small high tech company. Must be
able to work in supervisory capacity. Excellent
opportunities. Send resume to: Advanced
Chemical, Inc., 7800 15th Ave., N.W.,
Washington, D.C. 20012.

(b) Biocultivator: M.S., Ph.D. experi-
enced in cancer research, new research facility,
Boston, Mass. (c) Biologist: M.S., Ph.D., to head
laboratory, full approved 300-bed general hospital; Chicago
area. (d) Biochemist: M.S., Ph.D., to head
clinical section, supervise eight; research oppor-
tunity; must have hospital experience; to $10,
000. Midwest and affiliation with medical School.
(e) Biochemist: M.S., Ph.D., to head
laboratory, supervise eight; hospital experi-
tence; must be familiar with radioisotopes; to
$10,000. Midwest and affiliation with medical School.
(f) Biocultivator: M.S., Ph.D., to head
laboratory, supervise eight; hospital experi-
tence; must be familiar with radioisotopes; to
$10,000. Midwest and affiliation with medical School.
(g) Biologist: M.S., Ph.D., to head
laboratory, supervise eight; hospital experi-
tence; must be familiar with radioisotopes; to
$10,000. Midwest and affiliation with medical School.
