SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

FRIDAY, APRIL 12, 1901.

CONTENTS:

George M. Dawson (with plate): Professor Frank D. Adams .................. 561
State Natural History Surveys: Professor E. A. Birge, Professor H. F. Nachtrieb, Professor Frank Smith ...................... 563
The Training of an Electrochemist: Professor Harry C. Jones .............. 569
Appropriations for the U. S. Department of Agriculture: Dr. E. W. Allen ...... 572
The Reduction to Absurdity of the Ordinary Treatment of the Syllogism: Christine Ladd Franklin .................. 574
American Chemical Society: ................................. 576
Scientific Books:—
Re-aussi sur quelques microorganismes des combustibles fossiles: Professor Lester F. Ward ........................... 577
General Books Received: ................................. 577
Scientific Journals and Articles .................................. 582
Societies and Academies:—
Discussion and Correspondence:—
Shorter Articles:—
A New Occurrence of Cassiterite in Alaska: Alfred H. Brooks, Notes on Passerines: Dr. Ch. Wardell Stiles: ................................. 593
Amateurism and Mental Inertia in Public Service: Professor H. H. Thurston ..................................... 594
Museum Methods Abroad: F. A. L. .................. 595
The Scientific Alliance of New York .................. 596
Membership in the National Academy of Sciences .......................... 597
Scientific Notes and News .................................. 598
University and Educational News ................................. 600

GEORGE M. DAWSON.

By the death of Dr. G. M. Dawson, the Dominion of Canada loses one of her ablest and most distinguished men of science and one whose loss will be felt for many years to come. George Mercer Dawson was the eldest son of the late Sir William Dawson and was born at Pictou, Nova Scotia, on August 1, 1849. In 1855, his father, having received the appointment as Principal of McGill College, left Nova Scotia and came to live in Montreal. The wide college grounds, lying then on the outskirts of the town and backed by Mount Royal, at that time covered with its original forest growth, formed an environment full of interest and delight to the boy, whose mind turned to the study of nature from the first, a study which was made doubly fascinating in his case by his father, who was always ready to encourage him in his work, explain his difficulties and talk with him as a friend.

At the age of ten he entered the High School at Montreal, where he took a high place among the boys of his class. There were, however, at that time, near what is now the center of the city of Montreal, a number of ponds in which the boys from the High School used to go rafting at lunch hour. On one of these occasions he received a drenching and remained in his damp clothes through the afternoon; a chill was induced, which led to spinal trouble,
