Crowded Spectrum .......................... 1223

Articles
Digital Electronic Computers in Biomedical Science: R. S. Ledley .......... 1225
Computers make solutions to complex biomedical problems feasible, but obstacles curb widespread use.

Further Evidence of Vegetation on Mars: W. M. Sinton .................. 1234
The presence of large organic molecules is indicated by recent infrared-spectroscopic tests.

Science in the News
National Standards for Teacher Certification To Be Studied under Carnegie Grant to AAAS; Hesitancy of Europe To Invest in U.S. International Atom Program To Be Studied ............... 1237

Book Reviews
B. Heuvelman's On the Track of Unknown Animals, reviewed by D. H. Johnson; other reviews .................. 1245

Cover
Braunbek coil array used for producing directed magnetic fields up to 1 oersted at the Fredericksburg, Virginia, Magnetic Observatory and Laboratory of the U.S. Coast and Geodetic Survey. In the working space over the pierhead, the applied field neutralizes or modifies the earth's field to simulate that of any locality on the globe or in outer space.
