Articles
New World Prehistory: G. R. Willey
The main outlines of the pre-Columbian past are only beginning to emerge.

The Great Fireball of 26 July 1938: C. P. Olivier
A strongly hyperbolic orbit is derived for this body, indicating an origin outside the solar system.

Cover
Domain boundaries in a magnetic substance: a thin film of nickel-iron alloy was formed by evaporating the alloy in a vacuum and condensing it, in the presence of a strong magnetic field, on a glass slide. After condensation, the film was slowly demagnetized by applying a cyclic field at right angles to the original field (about x 300).
