Towards More Reliance on Social Science

Articles
Liquid Helium-3: J. G. Daunt
The low-temperature properties of the rare isotope provide a basis for a new theory of liquids.

Oxygen Transport through Hemoglobin Solutions: P. F. Scholander
How does the presence of hemoglobin in wet membrane mediate an eightfold increase in oxygen passage?

Changing Environment of Zoological Research: H. Friedmann
The era of abundance in funds and transportation opens new vistas for research and exploration.

Abraham Flexner, Pioneer in Educational Reform: J. W. Gardner

Science in the News
Soviet Submits New Version of Test Ban Plan; State Department Names Science Officers To Serve Abroad; Vetlesen Prize Established

Book Reviews
Industrial Microbiology and Advances in Applied Microbiology, reviewed by J. W. Foster; other reviews

Reports
Selecting Bacterial Mutants by the Penicillin Method: L. Gorini and H. Kaufman
Sequential Effects of Punishment: N. H. Arzin
Correction of Sample Absorption of Radioactivity: S. A. Berson and R. S. Yalow
A Growth-Stimulating Factor for an Epithelial Cell Line in a Reduced Serum Medium: T. P. Sergeant and S. Smith
Determination of the Earth's Gravitational Field: J. A. O'Keefe
Colors of all Hues from Binocular Mixing of Two Colors: N. Geschwind and J. R. Segal
Interspecific Transformation of Neisseria by Culture Slime Containing Deoxyribonucleate: B. W. Catlin
Effect of Acclimation on the Preferred Body Temperature of the Lizard, Sceloporus occidentalis: D. C. Wilhoft and J. D. Anderson
Simple Telemetering System for Signaling High Rumen Pressures: L. C. Payne

Cover
Three exoerythrocytic schizonts of Plasmodium fallax Schwetz, an avian malarial parasite originally isolated from an African guinea fowl (Numida meleagris major Hartlaub) and capable of infecting many other birds. The parasites lie within a living cell from a tissue culture which was established from the liver of an infected chick embryo (phase contrast, × 2797). [C. G. Huff, A. C. Pipkin, A. B. Weathersby, D. V Jensen, Naval Medical Research Institute]
