For the Babcock & Wilcox Company:

a Burroughs 205 computer backed the team that introduced atomic power to the merchant fleet...
Readjust condensers? Fuss and fume over balky carbons? Never, with the B&L SpeedMatic... just a full sixty minutes of true color viewing.

You eliminate annoying flicker and flare because carbons remain at proper settings for their full life. Matched objectives and condensers assure you of constant clear, sharp images.

Like to take a good look for yourself? Just mail the coupon for complete details or live laboratory demonstration. No obligation, of course.
