Letters from K. Gingold; B. Shishkin; A. S. Zygmuntowicz, M. L. Burrans, C. G. Colburn ................................................................. 1627

Cover
Photograph of oceanic squid at a depth of 700 meters. This picture was taken automatically as the squid pulled on a baited hook (lower center) attached to a deep-sea camera. Such photographs have given information about the distribution of squid with depth. This squid is about 3 feet long. [A. S. Laughton, National Institute of Oceanography, Wormley, Surrey, England]
