Congress of Anatomists; Forthcoming Events; New Products ................................................. 426

Cover
Shell of a pectinid bivalve through which a gastropod has drilled a hole 3 millimeters in diameter. The shell was collected by the Danish *Galathea* Expedition 1950–52 in the Australian Bight at a depth of 440 meters, and was made available by the Zoological Museum, Copenhagen. The photograph was made by S. M. Boone and M. R. Carriker.
