Cover

Shell of a pectinid bivalve through which a gastropod has drilled a hole 3 millimeters in diameter. The shell was collected by the Danish Galathea Expedition 1950–52 in the Australian Bight at a depth of 440 meters, and was made available by the Zoological Museum, Copenhagen. The photograph was made by S. M. Boone and M. R. Carriker. [M. R. Carriker, University of North Carolina]
