An extensive quality control program keeps their tool steel to uniform high quality. One phase of this rigorous testing is colorimetric analysis, "because of its inherent, extreme accuracy." That's why they use the B&L Spectronic 20® Colorimeter, to check the percent concentration of each element in the alloy.

This compact instrument combines operating ease with high spectral purity, for fast, dependable analysis. It gives you split-second readings, with double value as a colorimeter and a spectrophotometer.

If spectrometric analysis can maintain or improve the quality of your product, add a B&L Spectronic 20 Colorimeter to your testing methods. Prices for this versatile testing unit start at only $255.
