Selective Localization of Tetracycline in Mitochondria of Living Cells:
H. G. du Buy and J. L. Showacre ............................................ 196

Letters from W. Wiemer and W. H. Olendorf; H. Gloor; J. Cattell; R. H. Simmons;
L. S. Minckler; M. S. Gordon; G. N. Jones and R. Rodale; C. E. Kellogg
and Z. Griliches; R. W. Dexter .................................................. 198

Soap in the “neat” phase, a mesomorphic or “liquid crystalline” condition through
which most soaps and detergents pass at some stage during manufacture. In this phase
the soap is neither crystalline nor liquid; it possesses some of the characteristics of both
states (about $\times 190$). [Miami Valley Laboratories, Procter and Gamble Company]
