Editorial

Diploma Diplomacy .................................................... 1557

Articles

Animal Cell Cultures: N. P. Salzman .............................................. 1559

Tissue culture is a powerful tool in the study of nutrition, physiology, virology, and genetics.

Nuclear Power Development in the United States: F. K. Pittman .............. 1566

Government and industry are engaged in a joint effort to achieve economically competitive power by 1968.

Protection of Rainbow Bridge National Monument: W. R. Halliday; A. M. Woodbury 1572

An exchange of views on the effects of Glen Canyon dam shows that complex problems remain to be solved.

Clyde Kluckhohn, Anthropologist: T. Parsons ................................... 1584

Science in the News

Missiles vs. Bombers: Congressional Committees Express Some Doubt ............. 1585

Book Reviews

G. G. Simpson’s Principles of Animal Taxonomy, reviewed by A. E. Emerson; other reviews ..................................................... 1589

Reports

Transport of Gases through Hemoglobin Solution: R. E. Collins .................. 1593

Pollination of Saguaro Cactus by Doves, Nectar-Feeding Bats, and Honey Bees: S. M. Alcorn, S. E. McGregor, G. Olin ............................................. 1594

Chemotaxis of Zoospores for Root Exudates: G. A. Zentmyer ......................... 1595

Patterns of Corticosteroid and Pepsinogen Change Related to Emotional Stress in the Monkey: J. W. Mason et al. ............................................. 1596

Hormonal Control of Sex Attractant Production in the Cuban Cockroach: R. H. Barth, Jr. ................................................................. 1598

Nutritional Value of Chemically Modified Corn Starches:
R. L. Whistler and A. M. Belfort ............................................. 1599

Maintenance of Normal in situ Chromosomal Features in Long-Term Tissue Cultures:
G. Yerganian and M. J. Leonard ............................................. 1600

Departments

Ultrahigh-Energy Accelerators: R. R. Wilson .................................... 1602

Eventually physicists will push into the domain of superintensity as well as that of superenergy.

Forthcoming Events; New Products ............................................. 1607

Cover

Thiocarbamide crystal (about X 560). [L. C. Massopust, Marquette University School of Medicine]
