How To Let Go and Still Hold the Line .................................................. 1979

A new top-level government committee will coordinate interdisciplinary basic and applied research.

Radionuclide Fractionation in Bomb Debris: E. C. Freiling .............................. 1991
The fractionation systematics for high-yield bursts at sea-water and coral surfaces are delineated.

Project Chariot: Two Groups of Scientists Issue “Objective” But Conflicting Reports .................................................. 2000

J. P. Greenstein and M. Wintz, Chemistry of the Amino Acids, reviewed by H. S. Loring; other reviews ........................................ 2004

The Iranian Prehistoric Project: R. J. Braidwood, B. Howe, C. A. Reed .............. 2008
New problems arise as more is learned of the first attempts at food production and settled village life.

Electrophoretic Analysis of Immobilization Antigens of Paramecium aurelia:
E. Steers, Jr. ........................................................................................................ 2010

Excitation and Inhibition of Neuronal Firing in Visual Cortex by Reticular
Stimulation: J. M. Fuster ................................................................................. 2011

Auxetic Growth in the Javanese Toad, Bufo melanostictus: G. Church ................ 2012

Synthesis of Bacterial Cellulose from Labeled Precursor:
A. W. Khan and J. R. Colvin ............................................................................. 2014

Nondestructive Method for Estimating Chlorophyll Content of Leaves:
H. M. Benedict and R. Swidler ........................................................................... 2015

Five New Minerals from Moctezuma, Sonora, Mexico:
J. A. Mandarino and S. J. Williams ..................................................................... 2017

Evaluation of the Origins of Strontium-90 Contained in Wheat Plant:
R. Ichikawa, M. Abe, M. Eto ............................................................................. 2017

Science Teaching in Elementary and Junior High Schools ............................... 2019
A study made by the AAAS, with the aid of a grant from the National Science Foundation, is reviewed by the steering committee.

Forthcoming Events ....................................................................................... 2024

Bundles of bacterial cellulose microfibrils produced from isolated labeled precursor. See page 2014. [A. W. Khan and J. R. Colvin, National Research Council of Canada, Ottawa]
