Left, spectrum of a 0.21 mm. thickness sample of spectro-grade cyclohexane demonstrates the importance of high resolution for routine quantitative analysis.

Right, the C-H stretching band of methane illustrates the increased research data obtainable with high resolution spectroscopy.

Beckman IR... highest resolution for routine quantitative analysis and advanced theoretical studies.

High resolution of the Beckman IR-7 does more than merely separate closely spaced neighboring bands. Note, for instance, how the apparent intensities of the two cyclohexane bands increase with higher resolution. The relatively greater increase in the intensity of the 903 cm\(^{-1}\) band at higher resolutions is the result of its narrower half-bandwidth. These two commonly analyzed samples demonstrate the importance of high resolution in both low and high frequency regions and, for both gas and liquid samples. Comparative spectra were run with identical samples; slit width and resolutions, were varied as noted. X High resolution is essential for all areas of spectroscopy; for studies of molecular motion and structure, for differentiating between substances which exhibit similar spectra, and also for providing increased sensitivity and absolute accuracy for quantitative analysis. A further long-run advantage of high resolution is the increased potential for transferring data from one instrument to another. For more information about high resolution spectrophotometers, including indene spectra, write for Data File 38-26-02.
Costs are far less when you buy Bausch & Lomb!

You get extra years of use out of this all-time best selling school microscope. And your investment is protected for life.

STANDARD TEACHING MICROSCOPES take all the punishment your students can give them—proved by years of maximum use. And now the new exclusive Bausch & Lomb force-proof clutch and lifetime ball-bearing focus make them even more student-proof!

Like all B&L instruments, they're made in America, to the world’s highest standards. They’re guaranteed for life against defects in workmanship or materials. A nation-wide network of B&L dealers provides you with prompt service.

That’s why it costs you far less to buy B&L.

GET YOUR FREE COPY!
of this data brochure covering the world’s finest teaching tools for the balanced science program.

Bausch & Lomb

Please send Brochure D-152, "Recommended Instrumentation for Life Science Teaching."

NAME, TITLE .................................................................
SCHOOL ......................................................................
ADDRESS ..................................................................
Scientists in the News

**M. Carl Walske**, theoretical physicist serving as a member of the U.S. delegation to the Geneva test-ban conference since 1959, has been appointed scientific representative of the Atomic Energy Commission in London. He succeeds **Louis B. Werner**, who has accepted the position of vice president of Hazelton Nuclear Science Corporation, Palo Alto, California.

**John D. Dwyer**, director of the department of biology at St. Louis University, has received the J. Henri Fabre award from the French Government for his studies of French tropical plants.

**Martin Barr**, professor of physical pharmacy and pharmaceutical research at the Philadelphia College of Pharmacy and Science and associate in dermatology at the University of Pennsylvania's Graduate School of Medicine, has been appointed professor of pharmacy and chairman of the department at the Wayne State University College of Pharmacy.

**Howard L. Hamilton**, professor of zoology at Iowa State University, has been appointed chairman of the university's department of zoology and entomology.

**Bernard N. Halpern**, director of the Allergy and Immunology Research Center, Hôpital Broussais, Paris, has been appointed professor and head of the department of experimental medicine, Collège de France, Paris.

**Merle Lawrence**, professor of otolaryngology and physiology at the University of Michigan Medical School, has been named director of the university's new Kresge Hearing Research Institute.

**Mahlon B. Hoagland**, associate professor of bacteriology and immunology at Harvard, has been named the university's first Ruby Boyer Miller fellow in medical research.

**Arthur P. Long**, retired colonel and chief of the preventive medicine division of the Army Surgeon General's Office, has been appointed professor of environmental medicine and codirector of the International Center for Medical Research Training at the University of California.

**Donald H. Loughridge**, physicist and head of the physical research department at General Motors Research Laboratories, has been appointed director of applied research management with the Aerospace Corporation, El Segundo, Calif.

**Jesse L. Bollman**, emeritus consultant in medical research at the Mayo Clinic and director of research for the Rochester (Minn.) State Hospital, has received the Julius Friedenwald medal of the American Gastroenterological Association.

**Ragnar Granit**, director of the Nobel Institute for Neurophysiology, Stockholm, and visiting professor at the Rockefeller Institute, New York, has received the Anders Jahre prize of Oslo University and the third Saint Vincent prize for Medical Sciences awarded by the Academia di Medicina of Turin.

**Olaf A. Hougen**, professor of chemical engineering at the University of Wisconsin, has been appointed dean of the university's graduate school and coordinator of research.

**Mariano Guiducci**, organic chemist at the Squibb Institute for Medical Research, is the first winner of the institute's annual fellowship award. The $15,000 grant provides for leaves of absence of up to 39 months in order to allow staff members to obtain advanced degrees.

**Larry Stein**, research psychopharmacologist at Wyeth Laboratories' Basic Medical Sciences Research Division, has received the A. E. Bennett Neuropsychiatric Research Foundation award.

**Roland H. Alden**, chief of the University of Tennessee's division of anatomy, has been named dean of the university's School of Biological Sciences.

**Preston Cloud, Jr.**, of the U.S. Geological Survey, has been appointed chairman of the department of geology at the University of Minnesota. He succeeds **George A. Thiel**, who is retiring.

**Martin A. Elliott**, director of the Institute of Gas Technology, has been appointed academic vice president of the Illinois Institute of Technology.

**Philip N. Powers**, head of Purdue University's department of nuclear engineering, has been appointed vice president of the Purdue Research Foundation.

**Luis Sequeira**, on leave from his duties as scientific director of the United Fruit Company's Coto Research Station, Costa Rica, has been appointed associate professor of plant pathology at the University of Wisconsin College of Agriculture.

Recent Deaths

**K. S. Krishnan**, 63; physicist and director of India's National Physical Laboratory, a member of the Indian Atomic Energy Commission, and chairman of the Board of Nuclear Science; 13 June.

**Francis F. Lucas**, 76; metallographist and microscopist with Bell Telephone Laboratories from 1902 until his retirement in 1949; 20 June.

**Ernest S. Reynolds**, 76; research associate professor at the University of Miami's Institute of Marine Science; 31 May.

**Thomas A. Stephenson**, marine biologist and professor of zoology at the University of Wales since 1940; 3 Apr.

**Frederick T. Thwaites**, 77; emeritus professor of geology at the University of Wisconsin; 7 June.

*Erratum:* Seven lines were improperly placed in last week's news report on Project Chariot. The last two sentences of the first paragraph under the heading "CNI conclusions" (p. 2001) should have appeared at the end of the paragraph beginning "AEC officials . . ." in the preceding column. That paragraph would then read:

"AEC officials claim that the [CNI] report is neither as accurate nor as complete as the general public might suppose. They point out, for example, that the CNI assertion that the strontium-90 yield might be 10 times greater than the AEC believed likely was based on a misreading of an AEC-sponsored study. This study gave 5 percent as the most probable portion of the total radioactive yield that might get into the fallout. But it also estimated that for the particular fallout constituent CNI was concerned with, strontium-90, the most probable figure would be 25 percent. Thus the figure could be underestimated, at most, by a factor of 4, not by the factor of 10 calculated by CNI."

*Erratum:* In the report "Simple method for measuring heart vector of isolated animal hearts" (Science 133, 1831 (9 June 1961); by C. V. Nelson, the data for the rabbit heart experiments are given incorrectly in the first sentence of the last paragraph on page 1831. This sentence should have read: "In four rabbit heart experiments in the larger sphere, the average peak vectors were 235 μa-cm for QRS and 100 μa-cm for T."
Meetings

Forthcoming Events

July
24-29. Medical Electro-Radiological Societies, Latin Federation of, 5th congr., Paris, France. (C. Prroux, Secretary, 9 rue Daru, Paris 8)
24-30. Urology, 12th intern. congr., Rio de Janeiro, Brazil. (J. Silva de Assis, Secretary, P.O. Box 1275, Belo-Horizonte, Brazil)
27-1. Macromolecular Chemistry, intern. symp., Montreal, Canada. (Organizing Committee, P.O. Box 816, Sarnia, Ontario, Canada)
28-29. Linguistic Soc. of America, Austin, Tex. (A. A. Hill, Box 7790, University Station, Austin 12)
30-2. Soil Conservation Soc. of America, Lafayette, Ind. (H. W. Pritchard, 838 Fifth Ave., Des Moines 14, Iowa)
31-4. American Crystallographic Assoc., Boulder, Colo. (W. M. Macintyre, Univ. of Colorado, Boulder)
31-4. Biophysics, 1st intern. congr., Stockholm, Sweden. (B. Lindström, Dept. of Medical Physics, Karolinska Institutet, Stockholm 60)

August
1-26. Functional Analysis, 8th American Mathematical Soc. summer institute, Stanford, Calif. (P. D. Lax, AMS, 190 Hope St., Providence 6, R.I.)
3-5. Canadian Chemical Conf. and Exhibition, 44th, Montreal. (Chemical Inst. of Canada, 48 Rideau St., Ottawa 2, Ont.)
4-5. Pennsylvania Acad. of Science, 36th summer, Grove City. (J. J. McDermott, Franklin and Marshall College, Lancaster, Pa.)
6-10. Occupational Medicine and Toxicology, 3rd Inter-American conf., Miami, Fla. (W. B. Deichmann, School of Medicine, Univ. of Miami, Coral Gables, Fla.)
6-12. Atmospheric Ozone and General Circulation, symp., Arosa, Switzerland. (H. U. Dutsch, 20 Carl Spittelerstrasse, Zürich 53, Switzerland)
6-12. International Congr. of Pure and Applied Chemistry, 18th, Montreal, Canada. (L. Marion, Natl. Research Council, Ottawa 2, Canada)
7-9. International Committee of Electro-Chemical Thermodynamics and Kinetics, 13th meeting, Montreal, Canada. (N. Ibl, Eidg. Technische Hochschule, Laboratorium für Physikalische und Elektrochemie, Universitätstrasse 6, Zürich 6, Switzerland)
beside the STILL waters...
there's always the LOUGHBOROUGH ALL GLASS WATER STILL

Two highly productive models available:

4 LITERS PER HOUR and 8 LITERS PER HOUR

COMPACT • INGENIOUS • EFFICIENT

COMPACT: Only 3 components: condenser, boiling reservoir, immersion heater (automatic overload protected).

INGENIOUS: Reservoir fills from tap and automatically maintains constant water level. Cooling water in condenser recycles to boiling reservoir — preheated. Steam trap allows only vapor to enter condenser — no solids.

EFFICIENT: Distillate produced is pyrogen-free and analyses have shown it to contain less than one part in 10 millions of iron, copper, chromium or nickel.

30 JUNE 1961
7–11. High Temperature Chemistry and Thermodynamics, symp., Montreal, Canada. (L. Brewer, Dep. of Chemistry, Univ. of California, Berkeley)
8–11. Poultry Science Assoc., State College, Pa. (C. B. Ryan, Texas A & M College, College Station)
8–16. Society of Protozoologists, Prague, Czechoslovakia. (N. D. Levine, College of Veterinary Medicine, Univ. of Illinois, Urbana)
12–19. Fast Reactions, summer school, Cambridge, England. (Secretary of the Summer School, Dept. of Physical Chemistry, Lensfield Road, Cambridge)
13–18. Microchemical Techniques, intern. symp., University Park, Pa. (H. J. Francis, Jr., Pennsalt Chemical Corp., P.O. Box 4388, Chestnut Hill Post Office, Philadelphia 18, Pa.)
13–18. Theoretical Aspects of Magneto-hydrodynamics, seminar, University Park, Pa. (Conference Center, Pennsylvania State Univ., University Park)
13–19. International Assoc. of Applied Psychology, 14th congr., Copenhagen, Denmark. (Congress Secretariat, 19 Sankt Peterstræde, Copenhagen K.)
14–19. International Medical Conf. on Mental Retardation, 2nd, Vienna, Austria. (Miss E. Langer, Div. of Maternal and Child Health, State House, Augusta, Maine)
14–19. Symposium on Radiation, Vienna, Austria. (World Meteorological Organization, 1 Avenue de la Paix, Geneva, Switzerland)
14–25. Israel Medical Assoc., 5th world assembly, Jerusalem, Israel. (Beth-Harfeh, 1 Heffman St., Tel-Aviv, Israel)
14–26. Plant Pathology, conf., Lafayette, Ind. (J. F. Schafer, Dept. of Botany and Plant Pathology, Purdue Univ., Lafayette)
14–26. World Eucalyptus Conf., 2nd, São Paulo, Brazil. (Intern. Agency Liaison Branch, Office of the Director General, Food and Agriculture Organization, Viale delle Terme di Caracalla, Rome, Italy)
15–17. International Assoc. of Milk and Food Sanitarians, Jekyll Island, Ga. (H. L. Thomasson, P.O. Box 437, Shelbyville, Ind.)
15–18. Technical Assoc. of the Pulp and Paper Industry, 12th testing conf., Montreal, Canada. (TAPPI, 155 E. 44 St., New York 16)
19–30. Agricultural Economists, 11th intern. conf., Cuernavaca, Mexico. (J. Ackerman, Farm Foundation, 600 S. Michigan Ave., Chicago, Ill.)
21–23. International Hypersenscences Conf., Cambridge, Mass. (F. Ridell, Avco Research Laboratory, 301 Lowell St., Wilmington, Mass.)
21–24. Biological Photographic Assoc., Chicago, Ill. (Mrs. J. W. Crouch, Box 1668, Grand Central P.O., New York 17)
21–24. International Conf. on Photocoagulation, Itahaca, N.Y. (E. Burstein, Dep. of Physics, Univ. of Pennsylvania, Philadelphia)
21–27. International Assoc. of Dental Students, congr., London, England. (D. H. Clark, Royal Dental Hospital, Leices-
ter Sq., London, W.C.2)
21–2. International Congr. of Practical Medicine, Merano, Italy. (Bundesärztekammer, 1 Haidenkampfstrasse, Cologne, Germany)
21–6. Pacific Science Congr., 10th, Honolulu, Hawaii. (Secretary General, 10th Pacific Science Congr., Bishop Museum, Honolulu)
22–25. International Pharmacological Meeting, 1st, Stockholm, Sweden. (A. Wretlind, Karolinska Institutet, Stock-
holm 60)
22–30. International Conf. on Protozoology, Prague, Czechoslovakia. (N. D. Levine, College of Veterinary Medicine, Univ. of Illinois, Urbana)
(See issue of 16 June for comprehensive list)
