Editorial
Means and Ends ........................................... 1725

Articles
Senescence in Plant Development: A. C. Leopold ............... 1727
The death of plants or plant parts may be of positive ecological or physiological value.

Cryogenics and Nuclear Physics: R. P. Hudson .................. 1733
Solid-state and nuclear physics advance together through research at ultralow temperatures.

The International Geophysical Month: R. A. Helliwell and L. H. Martin ........ 1737
Short periods of cooperative study can consolidate the gains of the International Geophysical Year.

Science and the News
Congress Looks at Scientific Consultants; A Successor for Mr. Rayburn; Reprieve for WNTA ................. 1739

Book Reviews
Lord Rothschild's A Classification of Living Animals, reviewed by G. G. Simpson; other reviews ....................... 1745

Reports
Oviparous Hermaphroditic Fish with Internal Self-Fertilization: R. W. Harrington, Jr. ................. 1749
Influence of Dead-End Pores on Relative Permeability of Porous Media: I. Fatt .................. 1750
Ancient Agriculture in the Negev: P. Mayerson; M. Evenari et al. ........ 1751
Formation of the Periostracum in Mercenaria mercenaria: R. E. Hillman ........ 1754
Luminescence Potency of the Cypridina System: F. H. Johnson, O. Shimomura, Y. Saiga .................. 1755
Glucose-6-Phosphate Dehydrogenase and Detoxification of Hydrogen Peroxide in Human Erythrocytes: G. Cohen and P. Hochstein .................. 1756
Reactivity Cycle of Somatosensory Cortex in Humans with and without Psychiatric Disorder: C. Shagass and M. Schwartz .................. 1757
Choline Sulfate in Higher Plants: P. Nissen and A. A. Benson .......... 1759

Association Affairs
128th Annual Meeting: Program Summary ....................... 1760

Forthcoming Events ........................................ 1765

Cover
Luminescence at micro concentrations of the enzyme-substrate system ("luciferase-luciferin" system) of the ostracod crustacean Cypridina (0.14 μM luciferin and 1.2 μM luciferase in the flask). In the foreground, specimens are luminescing after storage for 2 months with Dry Ice. See page 1755. [F. H. Johnson, Princeton University]
