A Minimal Program .......................................................... 343

Chemistry at High Temperatures: J. L. Margrave ............................................. 345
New molecules will be discovered and new theories required to explain events from 1000° to 1,000,000°K.

Culture and Cognition: A. F. C. Wallace .............................................. 351
Cultural anthropologists are now investigating the logical structure of culturally organized behavior.

Congress on higher education . . . Kennedy on milk . . . Sweden on birth control . . .
The FDA on fish flour ................................................................. 357

Matrilineal Kinship, reviewed by R. Burling; other reviews ................................ 363

Taste-Structure Correlation with α-D-Mannose and β-D-Mannose:
R. G. Steinhardt, Jr., A. D. Calvin, E. A. Dodd ........................................... 367

Decrease of Acetylcholinesterase Activity along Peripheral Nerves:
L. Lubinska et al. .................................................................................... 368

Extraction of Distinctive Antigens from Neoplastic Tissue: J. M. McKenna,
R. P. Sanderson, W. S. Blakemore .......................................................... 370

Possible Transpacific Contact on the Coast of Ecuador: E. Estrada,
B. J. Meggers, C. Evans ........................................................................ 371

Retinal Cholinesterase and Glycolysis in Rats Raised in Darkness: R. Liberman ... 372

Simazine: Degradation by Corn Seedlings: R. H. Hamilton and D. E. Moreland ... 373

Identical "Feeding" and "Rewarding" Systems in the Lateral Hypothalamus of Rats: D. L. Margules and J. Olds ................................................................. 374

Hypothalamic Control of Feeding and Self-Stimulation:
B. G. Hoebel and P. Teteibaum .................................................................. 375

Self-Regulated Exposure to Light by Dark- or Light-Treated Rats: R. B. Lockard ... 377

Vertical Extension of Mid-Continent Leonardian Insect Occurrences: P. Tasch ... 378

New Products ......................................................................................... 381

Letters from J. B. Wiesner; J. L. Jenkins and S. Encel ................................ 382

Forthcoming Events .............................................................................. 385

Two collagen fibers reconstituted from solution in phosphate buffer (pH 8.4; ionic strength 0.33M) by salting-out with ammonium sulfate, redissolving, and again salting-out for four cycles. Gold-palladium shadowed; about X 43,000. The electron photomicrograph was made at the Eastern Research and Development Division, U.S. Department of Agriculture, Philadelphia, Pa. [Reproduced from L. D. Kahn, R. J. Carroll, L. P. Witnauer, Biochimica et Biophysica Acta 50, 292 (1961)]
