(See 16 March issue for comprehensive list)

A Bench-top Chromatography Oven

This bench-top drying oven develops four standard size chromatograms quickly and uniformly while under full view. Temperatures up to 110°C can be pre-set and controlled by the hydraulic thermoregulator.

High-output heating elements are concealed in the base and protected

OVERALL

26" Wide
35" High
15" Deep

9329-B-10 14

from droplets of combustible solvents. By connecting a motor or water aspirator to the exhaust outlet, heated air is gently circulated over the chromatograms for fast, uniform drying, as solvent vapors are evacuated.

Sheets hang on removable rods which easily hook in place inside the oven chamber. A large safety-glass door permits full-length viewing of color development and facilitates temperature reading. The metal-reinforced door is gasket-sealed and closes securely with a positive latch.

The entire oven chamber is fiberglass insulated and constructed of corrosion-resistant stainless steel.

Unconditional 1-Year Warranty
