Editorial
Where Shall We Meet? .............................................. 575

Articles
Architecture of the Human Lung: E. R. Weibel and D. M. Gomez ............... 577
Use of quantitative methods establishes fundamental relations between size and number of lung structures.

Evolution of Intelligence and Vocal Mimicking: R. J. Andrew .................. 585
Studies of large-brained mammals promise to elucidate some problems of human evolution.

News and Comment
Soviet SpaceFeat: Repercussions in the United States ........................ 590

Book Reviews
J. R. Partington's A History of Chemistry, reviewed by L. Pearce Williams; other reviews ........................................ 594

Reports
Possible Virus-Induced Genetic Abnormalities in Tree Fruits: G. Nyland .......... 598
Determination of the Mixing Ratios of Water Vapor and Carbon Dioxide in the Stratosphere: S. F. Rohrbough .................................. 599
Neuroepithelial Component of the Urethra and Urogenital Junction of the Rat: P. L. Risley and C. N. Skrepetos ......................... 600
Eye Movement during Active and Passive Dreams: R. J. Berger and I. Oswald .......... 601
Antarctic Peninsula Traverse: J. C. Behrendt and P. E. Parks, Jr. ................. 601
Action Spectrum for Developmental Photo-Induction of the Blue-Green Alga Nostoc muscorum: N. Lazaroﬀ and J. Schiﬀ .................................................. 603
A Mechanism of the Indole Defect in Experimental Phenylketonuria: C. M. McKea,n S. M. Schanber, N. J. Girman ................................. 604
Chemical Effect of Ionizing Radiation on Cytosine: C. A. Ponnamperuma, R. M. Lemmon, M. Calvi n .................................................. 605
Molecular Changes in Deoxyribonucleic Acid Induced by X-rays: H. E. Guda, W. J. Frajola, M. A. Lesser ........................................ 607
Flight Behavior of a Fly Alighting on a Ceiling: W. G. Hyzer ................. 609
Staggerer, a New Mutation in the Mouse Affecting the Cerebellum: R. L. Sidman, P. W. Lane, M. M. Dickie ........................................ 610
Polyoma and Papilloma Viruses. Do They Have 42 or 92 Subunits?: C. F. T. Mattern .................................................. 612
Preliminary Experiments on a Microbial Fuel Cell: J. B. Davis and H. F. Yarbrough, Jr. .................................................. 615
Conditioning of Induced Electroencephalographic Sleep Patterns in the Cat: W. Wyrwicka, M. B. Sierman, C. D. Clemente ............................... 616
A Law for Loudness Discrimination: J. L. Stewart .................................. 618
Angular Displacement of the Visual Feedback of Motion: J. Gould and K. U. Smith .................................................. 619
Relationship of Erythrocyte to Leukocyte Antigens in Chickens: L. W. Schierman and A. W. Nordskog .................................................. 620
Neurochemical Differences between Two Strains of Mice: J. W. Maus ............... 621

Letters from W. Gray and D. Page; T. B. Nolan; H. I. Fusfeld and D. Rothman; E. J. H. Corner .................................................. 571

Lifelike Forms in Meteorites: H. C. Urey ........................................ 623
Are fossils present in carbonaceous meteorites? The evidence is suggestive but as yet inconclusive.

Meetings: Forthcoming Events .................................................. 628

New Products .................................................. 632

Cover
Zenker-fixed, celloidin-embedded, phyloxin-stained section (280 µ thick) of the normal human lung (× 20). The architecture of the human lung is discussed on page 577. [Robert R. Wright and Charles M. Stuart, San Francisco Medical Center, University of California]
Science 137 (3530), 571-632.
