Editorial  The Keeper of the Gate .................................................. 721

Articles  Physiology of Flowering:  J. A. D. Zeevaart ........................ 723
  Flowering is hormonally controlled, but the nature of the hormone
  remains to be elucidated.

  Recoilless Nuclear Resonance Absorption of Gamma Radiation:  R. L. Mössbauer .... 731
  A new principle yields gamma lines of extreme narrowness for measurements
  of unprecedented accuracy.

News and Comment  Presidential Decree Boosts Arms Agency ...................... 738

Book Reviews  Elements of Queuing Theory, Stochastic Service Systems, Queues, Introduction
  to the Theory of Queues, reviewed by P. M. Morse; other reviews ................. 742

Reports  Origin of Tektites:  H. C. Urey ............................................ 746

  Lunar Synodical Period and Widespread Precipitation:  D. A. Bradley,
  M. A. Woodbury, G. W. Brier .................................................. 748

  Lunar Component in Precipitation Data:  E. E. Adderley and E. G. Bowen ....... 749

  Alveolar Epithelial Cell Mitochondria as Source of the Surface-Active Lung Lining:
  M. Klaus et al. ............................................................................ 750

  Bedrock Geology of the Thiel Mountains, Antarctica:  A. B. Ford and J. M. Aaron .... 751

  Electron Spin Resonance of Nitric Oxide–Hemoglobin Complexes in Solution:
  K. M. Sancier, G. Freeman, J. S. Mills. ....................................... 752

  Sterility in the Mexican Fruit Fly Caused by Chemicals:  J. G. Shaw and
  M. Sanchez Riviello ..................................................................... 754

  Effects of Perceptual Training at Three Age Levels:  D. Elkind, R. R. Koegler, E. Go .... 755

  Nevada Test Fallout and Radioiodine in Milk:  R. E. Lapp ......................... 756

  Anopheles leucosphyrus Identified as a Vector of Monkey Malaria in Malaya:
  R. H. Wharton et al. ................................................................. 758

  Male Sexual Behavior Induced by Intracranial Electrical Stimulation:
  E. Vaughan and A. E. Fisher ..................................................... 758

  Increase in Diffusible Auxin after Treatment with Gibberellin:
  S. Kuraishi and R. M. Muir ................................................................ 760

  Salmonella Species in Turtles:  J. A. Boycott ................................... 761

  Mechanism of Tissue Reconstruction by Dissociated Cells, II: Time-Course of
  Events:  M. S. Steinberg ................................................................ 762

  Utilization of Nitrogen Compounds by unicellular Algae:  E. C. Birdsey and V. H. Lynch .... 763

  Interaction of Olfactory and Other Environmental Stimuli on Implantation in the
  Deer Mouse:  B. E. Elefteriou, F. H. Bronson, M. X. Zarrow .................. 764

  Contamination of Vegetation by Tetraethyl Lead:  H. L. Cannon and J. M. Bowles .... 765

  Sorbitol Translocation in Apple:  K. L. Webb and J. W. A. Burley ................ 766

Departments  Meetings:  International Biological Program; Forthcoming Events .... 768
  New Products ............................................................................. 774

Cover  Cockleburr, Xanthium pennsylvanicum. See page 723. [James McClanahan, California
  Institute of Technology]
