The Need for Skepticism ................................................................. 75

Higher-Pressure Mass Spectrometry: T. W. Martin, R. E. Rummel, C. E. Melton ........................... 77
A basic physics tool finds new chemical uses when modified to study reactions up to 1-millimeter pressure.

Piezoelectric Micromanipulators: G. W. Ellis ................................................ 84
New electrically operated micromanipulators add automatic high-speed movement to normal manual control.

Molecular Designing of Materials: A. R. von Hippel ........................................ 91
Science, guided by molecular understanding, takes up the challenge to create materials for the future.

Cell Disruption by Ultrasound: D. E. Hughes and W. L. Nyborg .................................... 108
Streaming and other activity around sonically induced bubbles is a cause of damage to living cells.

“Gulliver”—A Quest for Life on Mars: G. V. Levin et al. ........................................... 114
Radioisotopes are used in a miniature instrument designed to detect life during early probes of the planet.

Science and Foreign Policy Formulation ..................................................... 122

Langmuir’s Work: Physics, Chemistry, and Engineering Intimately Intertwined: E. U. Condon ................................................................. 126
Stars and Stellar Systems, reviewed by J. B. Irwin; other reviews ........................................... 127

Fluorine Compounds of Xenon and Radon: C. L. Chernick et al. ........................................ 136
Azeotropic Freeze-Drying: H. E. Wistreich and J. A. Blake ............................................... 138
Simple Apparatus for Ultrafiltration: D. A. Burns, J. N. Budna, J. M. Chamberlin ....................... 138
Defect in Small Millipore Filters Disclosed by New Technique for Isolating Oral Treponemes: W. J. Loesche and S. S. Socransky ......................................................... 139
Jamin and “True” Meniscal Resistances: A Single Meniscus Apparatus: H. R. Jacobs .................. 140
Application of a Time Series Statistic to Physiology and Psychology:
P. H. Leiderman and D. Shapiro ................................................................. 141
Experimental Morphine Addiction: Method for Automatic Intravenous Injections in Unrestrained Rats: J. R. Weeks ......................................................... 143
Method for Continuous Infusion of Fluids into the Chorioallantoic Circulation of the Chick Embryo: D. B. Drachman and A. J. Coulombre ....................................................... 144
Sodium Iodide Crystal Dosimeters for Use in Surveys of Regions of High Background Radiation: F. X. Roser and T. L. Cullen .................................................. 145
Use of Iodine-131 To Measure Movements of Small Animals: A. G. Johanningsmeier and C. J. Goodnight ................................................................. 147
Prediction of Ultrafiltration Membrane Performance: W. E. Clark ......................................... 148
Computer as Aid in Describing Form in Gastropod Shells: D. M. Raup .................................. 150
Two-Dimensional Gel Electrophoresis: S. Raymond and B. Aurell ......................................... 152
Anion-Exchange Properties of Plant Root Surfaces: D. E. Williams ....................................... 153
Particle-Size Analysis of Valders Drift in Eastern Wisconsin: G. B. Lee,
W. E. Janke, A. J. Beaver ........................................................................ 154

New Products ............................................................................. 156
Guide to Scientific Instruments ................................................................. 173
Addresses for Guide to Scientific Instruments ......................................................................... 321

Crystals of xenon tetrafluoride grown at room temperature on the window of a 22-
millimeter diameter silica spectrophotometry cell. See page 136.
Science 138 (3537), 75-381.
