Who Teaches Science? ........................................ 779

Measuring the Growth of Science: S. Dedijer .............. 781
Quantitative data on a nation's research effort provide an index for its socioeconomic development.

Are Logic and Mathematics Identical?: L. Henkin ......... 788
An old thesis of Russell's is reexamined in the light of subsequent developments in mathematical logic.

Arthur Holly Compton, Research Physicist: S. K. Allison 794

Who Runs America?—A Theory of Hidden Forces .......... 797

Recent trends in the history of science are illustrated in two new books: I. B. Cohen ................................. 803
Applied Geophysics, USSR, reviewed by J. L. Soske; other reviews .................................................. 804

Chlamydomonas: Colored Excretion Products:
V. J. Cristofalo, L. D. Kornevich, R. R. Ronkin ............ 809

Fate of a Synthetic Polynucleotide Directing Cell-Free Protein Synthesis:
S. H. Barondes and M. W. Nirenberg ........................ 810
I. Characteristics of Degradation
II. Association with Ribosomes ................................ 813
Application of an Additive Model to Impression Formation: N. H. Anderson ................................. 817
Pooled Estimates of Parent-Child Correlations in Stature from Birth to Maturity:
N. Livson, D. McNeill, K. Thomas ............................ 818
X-Ray-Induced Chromosome Aberrations in the Corneal Epithelium of the Chinese Hamster: J. G. Brown .......................... 820
General Disruption Resulting from Electrical Stimulus of Ventromedial Hypothalamus:
F. B. Krasne ...................................................... 822
Antarctica: Geology of the Ellsworth Mountains: J. J. Anderson et al. ........................................... 824
Method of Introducing Tritiated Thymidine into the Tissues of Hydra:
A. L. Burnett, R. Baird, F. Diehl .............................. 825
Archeological Investigations in East Central Arizona: P. S. Martin ............................... 826
Electron Microscopy of Staphylococcus aureus Treated with Tetracycline:
J. H. Hash and M. C. Davies ................................. 828
Penetration of Fallout Fission Products into an Indiana Soil:
D. Telfair and J. Luetzelschwab .............................. 829
Catalysis by Imidazole of Deuterium-Hydrogen Exchange in Amide N-H Groups:
I. M. Kiotz and B. H. Frank .................................. 830
Schistosoma mansoni: Natural Infection of Cattle in Brazil:
F. S. Barbosa, I. Barbosa, F. Arruda ........................ 831
Atmospheric Photochemical Reactions Inhibited by Iodine:
E. R. Stephens, R. H. Linnell, L. Reckner ................ 831

Pathogenesis of Thrombosis: Platelet Contribution: R. G. Mason, Jr. ........................................... 833
Several different platelet agglutinating agents may share a pathway in producing white thrombi.

Meetings: Forthcoming Events ................................ 838
New Products ..................................................... 841

Mt. Gardner, Sentinel Range, Ellsworth Mountains, Antarctica. This rock face, composed of folded quartzite strata, rises over 9000 feet above the tents in the foreground. See page 824.
