## BRONWILL CONSTANT TEMPERATURE CIRCULATOR

Here's everything you need in one compact unit. Smaller, lighter weight and more accurate (to  $\pm 0.01^\circ\text{C}$ ), this new model instantly converts any suitable container to an efficient, closely controlled, constant temperature bath or circulating system. Easy to use—easy to store—always ready for the next bath. Like more information? Just drop us a note and we'll rush complete data.

## LOW-LEVEL IRRADIATION

Editor: Austin M. Brues

A symposium organized by the AAAS Section on Zoological Sciences, cosponsored by the U.S. Atomic Energy Commission and the Division of Biological and Medical Research of the Argonne National Laboratory.

Public debate on global fallout has been acrimonious because scientific facts about radiation and human implications regarding nuclear warfare have become confused. Scientists have consequently been thought guilty of ignorance or of partisanship. The Symposium on Low-Level Irradiation deals in a considered way with the many points of view that have brought this about and indicates possible solutions.

Scientific Background: Introduction—National and Artificial Radiation Background of Man—Meteorological Factors and Fallout Distribution—Genetic Effects—Somatic Effects

Implications: Introduction—Radiation as a Public Health Problem—Responsibilities of the Press—Legal and Political Implications—Science and Morality
