

# SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

EDITORIAL COMMITTEE : S. NEWCOMB, Mathematics ; R. S. WOODWARD, Mechanics ; E. C. PICKERING, Astronomy ; T. C. MENDENHALL, Physics ; R. H. THURSTON, Engineering ; IRA REMSEN, Chemistry ; JOSEPH LE CONTE, CHARLES D. WALCOTT, Geology ; W. M. DAVIS, Physiography ; HENRY F. OSBORN, Paleontology ; W. K. BROOKS, C. HART MERRIAM, Zoology ; S. H. SCUDDER, Entomology ; C. E. BESSEY, N. I. BRITTON, Botany ; C. S. MINOT, Embryology, Histology ; H. P. BOWDITCH, Physiology ; J. S. BILLINGS, Hygiene ; WILLIAM H. WELCH, Pathology ; J. McKEEN CATTELL, Psychology ; J. W. POWELL, Anthropology.

FRIDAY, JULY 5, 1901.

## CONTENTS :

<i>Some Advances made in Astronomical Science during the Nineteenth Century</i> : PROFESSOR C. L. DOOLITTLE.....	1
<i>Some Unscientific Reflections upon Science</i> : PROFESSOR ALFRED H. LLOYD.....	13
<i>Truman Henry Safford</i> : PROFESSOR HAROLD JACOBY.....	22
<i>Scientific Books</i> :—	
<i>Elliott's Synopsis of the Mammals of North America</i> : GERRIT S. MILLER. <i>The Maryland Eocene Book</i> : DR. JOHN M. CLARKE.....	25
<i>Societies and Academies</i> :—	
<i>Zoological Club of the University of Chicago</i> : DR. C. M. CHILD. <i>The New York Section of the American Chemical Society</i> : DR. DURAND WOODMAN.....	28
<i>Discussion and Correspondence</i> :—	
<i>Ebbinghaus's Theory of Color-vision</i> : C. L. FRANKLIN.....	30
<i>Shorter Articles</i> :—	
<i>Novæ Persei, No. 2</i> : PROFESSOR EDWARD C. PICKERING. <i>Lime and Magnesia in Plant Production</i> : D. W. MAY.....	31
<i>Quotations</i> :—	
<i>Industry and Research</i> .....	32
<i>Current Notes on Meteorology</i> :—	
<i>Cannon-firing to prevent Damage by Hail; Climate of Manila; Equinoxes and Storm Winds</i> : PROFESSOR R. DEC. WARD.....	33
<i>Biological Survey of the Great Lakes by the United States Fish Commission</i> : PROFESSOR JACOB REIGHARD.....	34
<i>The Jubilee of the University of Glasgow</i> .....	34
<i>The Harvard Chemical Laboratory</i> .....	36
<i>Scientific Notes and News</i> .....	36
<i>University and Educational News</i> .....	39

## SOME ADVANCES MADE IN ASTRONOMICAL SCIENCE DURING THE NINETEENTH CENTURY.\*

IN glancing over the field of astronomical achievement during the century recently closed, the most striking feature is undoubtedly the rise and growth during the past fifty years of an entirely new department, one totally unknown and almost undreamed of before the first half of the century had passed, that called by Professor Langley the new astronomy, more technically known as astrophysics. In considering the restrictions which must be regarded in case this address is to be kept within manageable limit, perhaps it would be well to confine my remarks to this new branch of the science. I shall, however, give the chief place to the older astronomy, touching briefly upon the newer phase.

Near the close of the seventeenth century appeared Newton's immortal work called by him 'The Mathematical Principles of Natural Philosophy.' In this treatise the law of universal gravitation as the controlling and governing principle of the planetary system was established by a rigorous course of mathematical reasoning. It was many years, however, before these conclusions were universally accepted. On the continent of Europe particularly, the

\* Annual address delivered before the University of Pennsylvania Chapters of the Society of Sigma Xi, June 13, 1901, by C. L. Doolittle.

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.
