ARTICLES
Ancient Mesoamerican Civilization: R. S. MacNeish

Domestication of Corn: P. C. Mangelsdorf, R. S. MacNeish, W. C. Galinat

Archeological excavations have uncovered prehistoric wild corn and show how it evolved under domestication.

Crystaline Deamino-Oxytocin: D. Jarvis and V. du Vigneaud

The biological activities of this potent analog of oxytocin appear to be related to size of ring.

Mitotic apparatus isolated from the sea urchin, Lytechinus variegatus, in hexaneodiol. In this phase-contrast view of the metaphase mitotic apparatus, the chromosomes are visible midway between the two poles. Spindle fibers are visible in the mid-polar region but other achromatic fibrous components are not in focus (about x 2240). See page 580.
