ARTICLES  Ancient Mesoamerican Civilization: R. S. MacNeish  531

A long archeological sequence from Tehuacán, Mexico, may give new data about the rise of this civilization. •

Domestication of Corn: P. C. Mangelsdorf, R. S. MacNeish, W. C. Galinat  538

Archeological excavations have uncovered prehistoric wild corn and show how it evolved under domestication.

Crystalline Deamino-Oxytocin: D. Jarvis and V. du Vigneaud  545

The biological activities of this potent analog of oxytocin appear to be related to size of ring.

COVER

Mitotic apparatus isolated from the sea urchin, Lytechinus variegatus, in hexanediol. In this phase-contrast view of the metaphase mitotic apparatus, the chromosomes are visible midway between the two poles. Spindle fibers are visible in the mid-polar region but other achromatic fibrous components are not in focus (about X 2240). See page 380.
