Radioactive

Krypton 85

OBTAINABLE
MIXED WITH RARE
AND OTHER GASES
— from the foremost producer
of atmospheric gases!

- Produced under continuous mass
spectrometer control.
- Fast nationwide delivery.
- Guaranteed ultra-high purity.
- Scientifically blended and tested mixtures for any need.
- Quality based on more than 50 years of rare gas know-how.
- Complete technical service.

The Nalgene Automatic Dispensing Pipettor is a "constant volume" dispenser precision engineered for extreme accuracy. Use it for fast, repetitive dispensing of fixed quantities. Use several—one for each solution—where procedures require repeated dispensing of different reagents. It delivers the exact amount, automatically, every time. Simple to use with one hand... easily disassembles in seconds for refilling or cleaning. Unbreakable... resists virtually all chemicals. All dispensers have 8-oz. reservoir bottle with choice of 1, 2, 3 or 5 ml measuring chambers. Price, each... $4.50

The Nalgene Safety Pipet Filler takes the hazard out of handling volatile, corrosive, poisonous liquids —eliminates the danger of mouth contact. Draws up any quantity... dispenses precise amount. Unbreakable, corrosion proof, chemically inert. Compact and lightweight—easily operated with one hand. Fits snugly over top of pipets up to 20 ml sizes. Price, each... $4.50

Be safe... be sure... be accurate with Nalgene Pipetting Aids. Ask your lab supply dealer or write for complete catalog of Nalgene labware, Dept. 2103, The Nalge Co., Inc., Rochester, N. Y. 14602.
Germ-Free Enclosures for Swine, Sheep, or Small Animal Research

A new variation from the standard enclosures for germ-free animal research and care has been developed by Labco Division of Partsco, Inc. The new unit is a modification of the successful Labco designs for bench type units recently announced and are specifically designed for the permanent care of swine.

The lower portion of the stainless steel housing provides normal living quarters for the small pigs or lambs. A liftout grill on each side of a stationary stainless steel tray provides access to the lower housing area. The animals may be lifted to the top tray for inspection or medical treatment within a totally germ-free environment. Food, water and medication can be introduced to the area through a door in the unit which enables complete sterilization of all material entering the controlled area of the enclosure. Write for complete information on germ-free laboratory enclosures, standard and custom.

BACTRONIC COLONY COUNTER

All-Transistor Electronic Colony Counter
Marks as it Counts Automatically
In Open and Closed Petri Dishes

Four precision counting devices make this instrument indispensable for routine colony counting and in phage and bacterial genetics: an Electronic Marking Probe; A Plug-in Marking Grease Pencil or Plug-in Marking Pen; and a Pushbutton Counter.

Colonies are accurately recorded in a single probing action that leaves an identifying puncture in the agar. The Electronic Probe picks up radio impulses on contact with any agar medium and actuates the counting mechanism. Electrical splattering is completely eliminated by the low voltage input. Where puncturing is undesirable, the Plug-in Grease Pencil or Marking Pen is used to mark the back of the plate as it counts.

Plates are flooded with brilliant white light that is cool, soft and easy on the eyes. Specimens are illuminated in bold relief against a contrasting agar background, revealing colony morphology. Even pinpoint colonies are easily discerned.

The instrument has an automatic numerical reset to zero, a sterilizing Probe Well and a magnifying lens.
CONSTANT TEMPERATURE CIRCULATORS

The various circulators in the Haake N Series differ from other average systems in that they were specifically designed for tempering applications where higher operating temperatures or a greater rate of liquid circulation are needed. All models in this series can be used with oils at temperatures as high as 250-300°C. Temperature stability is ±0.01 to ±0.05°C. Pumps are available for pressure and/or suction circulation at maximum rates of 7 gal/min. All Haake thermostats are equipped with fast, magnetic-setting thermoregulators and with a cooling coil for circulating tap water—to obtain control at, or below, ambient temperature.

The pumps are designed for operation at temperatures down to −60°C, and accessory cooling systems using ice, thermoelectric principles or compressors can be supplied on request.

THE AUSTRALIAN NATIONAL UNIVERSITY
INSTITUTE OF ADVANCED STUDIES
DEPARTMENT OF GEOPHYSICS
SENIOR FELLOWSHIP

Applications are invited for the post of Senior Fellow in the Department of Geophysics (Head of Department, Professor J. C. Jaeger).

The Department possesses a very well equipped palaeomagnetic laboratory, operates an extensive network of seismological stations, and has a wide range of other activities. Further information about these may be obtained from Professor Jaeger.

The salary and range of a Senior Fellow are fixed within the limits £A3,300–3,850. After each five years of service the Senior Fellow will be entitled to 12 months’ study leave on full pay with a grant of up to £A1,300 towards expenses.

It may be possible to consider also applications from persons interested in appointment at a higher or lower status than that of Senior Fellow.

Superannuation is on the F.S.S.U. pattern. Reasonable travel expenses are paid and assistance with housing is provided.

Further details should be obtained from the undersigned at Box 4, G.P.O., Canberra, A.C.T., with whom applications close on 30 April 1964.

Registrar
Institute of Advanced Studies

LAND AND WATER USE

Special Reference to Mountain & Plains Regions

Wynne Thorne, Editor

AAAS Symposium Volume No. 73. May 1963
6” by 9”, 364 pages, references, index, $8.00
(AAAS members’ cash order price $7.00)

Arranged by the AAAS Section on Agriculture

This symposium volume reports papers by leaders in research, and policy discussions relating to the nation’s land and water resources, presented at the AAAS meeting in Denver, Colorado, in December 1961.

The volume centers on problems associated with the increasing competitive demands for use of publicly owned lands. The historic uses by livestock and timber processors are being challenged by groups concerned with recreation, wildlife, and water production. Adjustments in public land use in relation to uses of adjacent or intermingled privately owned lands need further consideration if the total benefits from these resources are to be maximized. These and other problems of land and water are explored by recognized leaders in the field.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

1515 Massachusetts Avenue NW,
Washington, D.C. 20005
ANALYTICAL CHEMIST

Excellent opportunity for chemist at the B.S. or M.S. level with experience in analytical instrumentation and clinical chemistry. Duties will relate to the development of new and the modification of existing diagnostic procedures.

ORGANIC CHEMIST

Excellent opportunity for chemist at the B.S. or M.S. level with experience in organic synthetic chemistry. Duties will involve organic synthetic research and development under the direction of a senior scientist. Applicant should be familiar with modern laboratory equipment and instrumentation.

RESEARCH PHARMACIST

Opening for qualified candidate to perform research and development work on a variety of dosage forms. Ph.D. or equivalent with some industrial experience desirable, but creativity and sound background in formulation and experimental design are more important. Excellent employee benefits. Adjacent to unsurpassed cultural and academic centers and recreation areas. Please send resume to Dr. James E. McDowell, Director of Pharmaceutical Research. Equal opportunity employer.

Cutler Laboratories
Berkeley, California

Traineeships for Graduate Work in Pharmacology. A 4-year program of course work and research training leading to the Ph.D. degree is offered. Research opportunities include the action of drugs on kidney, circulation, autonomic ganglia, connectivity, behavior, metabolism, and drug transport. Annual stipend (U.S. citizens) $2400 plus tuition, plus $500 for each dependent. Early applications are strongly advised. Applications must be filed by October 15, 1964. Detailed information on request. Write: Department of Chemistry, School of Medicine, State University of New York at Buffalo, 15 The Circle, Buffalo, N.Y. 14214.

3/6, 20: 4/7
on theoretical development and collaboration with researchers.

Send Dr. Forbes, Biotechnologist, to:

1. Fisheries Research Board of Canada,

2. The University of Michigan,

3. The University of California, Berkeley.

**FELLOWSHIPS**

Biophysics Training Program Fellowships

Applications are invited from candidates with M.S. or Ph.D. degrees in either physical or biological sciences. A major aspect of the program is the conduct of a specific research project and current studies include problems in radiobiology, photochemistry, and metabolism of biological data and molecular engineering. Training stipends in the range of $5000-6500.

Further information from:

Dr. G. L. Brownell, Head, Physics Research Laboratory, Massachusetts General Hospital, Boston, Massachusetts.

Graduate Fellowships in Biochemistry

Teaching and research appointments leading to Ph.D. available for academic year 1964-1965. Varied departmental and research programs include mammalian and microbial metabolism and enzymology, neurochemistry, biochemistry, and toxicology. Excellent facilities in new building. Annual stipends start at $2400, plus dependency allowance and tuition.

Address further inquiries to Head, Department of Biochemistry, University of Maryland, School of Medicine, Baltimore 1, Maryland.

Fellowships, Postdoctoral fellowships available to individuals (Ph.D., M.D., or equivalent) seeking research training in general field of metabolism including diabetes, endocrinology, renal function, steroid biochemistry, Stipends $5000 to $6500, partly tax-exempt, and allowance for dependents. Apply to Dr. R. E. Bailey, Department of Medicine, University of Oregon Medical School, Portland, Oregon.

**PREDOCENTAL FELLOWSHIPS IN PHYSIOLOGY**

Support is available for study leading to the M.S. and Ph.D. degrees in physiology. Opportunities are available to do graduate work in endocrinology, cardiovascular or respiratory physiology, radiation biology, etc. Write to Dr. H. E. Bredbeck, Department of Physiology, Colorado State University, Fort Collins, Colorado.

**THE POSITION MARKET**

**Positions Open**

**APPOINTMENT IN BIOLOGY**

Dalhousie University invites applications for two positions in the department of Biology. Appointments will be made at the rank of assistant professor. For a recent Ph.D. the starting salary will not be less than $8500.

Biologists working in experimental zoology, histology, electron microscopy, or developmental biology.

Address correspondence to Head, Department of Biology, Dalhousie University, Halifax, N.S., Canada.

**RESEARCH ASSISTANT**

Under general supervision of the Board's laboratory in Grande Rivi
e, Quebec, to assist in a program to investigate the non
collective spoilage or deterioration of fish. Residents in the area in this laboratory is located are French speaking.

Preference will be given to applicants with a bachelor's degree, honors course, or demonstrated research ability.

An appointment will be made in either the scientific or technical classifications at a salary commensurate with qualifications and experience. Refer to Competition HX-33.

Submit complete résumé to:

Dr. Forbes, Fisheries Research Board of Canada.

**PHARMACOLOGIST**

($10,640—$14,065), Ph.D. or M.S. with experience in Toxicology of inhaled substances for research in Environmental Health. This is a long-range program to provide opportunities in research in a laboratory atmosphere that encourages creativity and freedom to plan and publish research results. U.S. Civil Service benefits and requirements apply. Résumé should be sent to: Professor Robert A. Taft Sanitary Engineering Center, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

For further information call Chief, Laboratory of Medical and Biological Sciences, 1035 Laidlaw Way, Cincinnati, Ohio, Telephone: 871-1820, Ext. 645.

**PHARMACOLOGISTS**

Several administrative (nonresearch) positions open for pharmacological evaluation of metabolic and toxicity data on drugs. Starting salaries from $6,575 to $14,065 depending on extent of academic training and applicable experience.

Similar positions open for biochemists qualified for toxicological evaluation.

M.S. required. Ph.D. preferred, with experience in drug research or evaluation. U.S. citizenship required.

Send résumé and application (Standard Form 37 from any post office or Federal agency) to Personnel Office, Food and Drug Administration, Washington, D.C. 20204.

**RESEARCH ASSISTANT**

Under the general guidance of senior scientists at the Board's laboratory in Halifax, Nova Scotia, on research related to biochemical and bacteriological changes in fish; identification and physiology of myxozoans and other marine parasites. Preference will be given to applicants with a bachelor's degree or demonstrated research ability. Refer replies to Competition HX-32.

Submit complete résumé to:

Dr. Forbes, Fisheries Research Board of Canada.

**FISHER SCIENTIFIC COMPANY**

711 Forbes Avenue
Pittsburgh, Pa. 15219

"An Equal Opportunity Employer"

**ENDOCRINOLOGIST SECTION HEAD**

Seeks imaginative creative scientist to conduct and supervise original laboratory research in development of new drugs having reproduction and gonadal hormone related actions. Should have Ph.D. in physiology, anatomy, zoology, or related field with research experience or thesis in research laboratory. Prefer 1 to 5 years of postdoctoral research experience. Opportunities abound for both expanding laboratory facilities and animal rooms. Send résumé to:

Dr. Dorsey E. Holtkamp
Head, Dept. of Endocrinology
THE WM. S. MERRELL COMPANY Division of The Dixon-Merrell Inc.
Cincinnati, Ohio 45215

Attending Anatomists Meeting, Denver-Hilton Hotel; Federation Meeting, Palmer House Hotel

An equal opportunity employer

**PART-TIME EDUCATIONAL WRITER**

Here is an opportunity for an experienced teacher to increase his or her income through the spare-time preparation of manuscripts on technical subjects. Successful applicant will demonstrate an ability to analyze subject matter, a teacher's intuition, and a fluent style. Work will be in close association with established subject matter authority, proofread with prepared program instruction materials and a New England educational system but not necessary. Send full details of qualifications and references to:

Mr. Lee W. E. Incorporated, Newburyport, Massachusetts.

**RESEARCH ASSISTANT**

Under the general guidance of senior scientists at the Board's laboratory in Halifax, Nova Scotia, on research related to biochemical and bacteriological changes in fish; identification and physiology of myxozoans and other marine parasites. Preference will be given to applicants with a bachelor's degree or demonstrated research ability. Refer replies to Competition HX-32.

Submit complete résumé to:

Dr. Forbes, Fisheries Research Board of Canada.

**POSITIONS OPEN**

**CLINICAL INSTRUMENT DEVELOPMENT**

Degreed Clinical Chemist, Biochemist, or Medical Technologist with several years clinical lab experience, including instru-

ment design or modification. To be Project Leader for clinical instrument development in R & D department of America's largest manufacturer-distributor of lab apparatus. Career position, salary commensurate with ability, fine benefits, relocation and travel, and location. Send complete résumé in confidence to R. W. Chapman.

A simple way to answer this question would be to say "ask the man who owns one." Because thousands of users have found out "why" for themselves. But, let's start off by asking you some questions: Have you ever needed more working distance? . . . an increased real field-of-view? . . . or increased depth-of-focus? Have you ever wanted a flatter field? . . . or more image brightness? If your answer is "yes" to one or more of these, then DynaZoom® is for you! * For instance,

**WHY ZOOM?**

by achieving a desired magnification using a lower power objective and the plus magnification of the DynaZoom system—you increase the working distance—the real field-of-view is increased—the depth-of-focus is increased and you have a much flatter field of view. * Or, in dark field and fluorescence microscopy—by using a lower power eyepiece in combination with the DynaZoom system and a higher power, higher N.A. objective, you get greatly increased image brightness—brightness that is an absolute necessity in these methods.

* Obtaining high magnification through the use of the DynaZoom system, rather than using the highest power eyepiece—adds no field curvature and there is no change in eye relief. * DynaZoom provides the only means of getting "in-between" magnifications, exactly . . . through a continuously variable range. * And more . . . many more capabilities are yours . . . that only the DynaZoom system can offer. And best of all . . . IT’S FREE . . . because it’s standard on Bausch & Lomb DynaZoom microscopes at no extra cost. * Ask for a demonstration and see for yourself. Write Bausch & Lomb Incorporated, 64203 Bausch Street, Rochester, New York 14602.

In Canada, write Bausch & Lomb Optical Co., Ltd., Dept. 642, Scientific Instrument Division, 16 Grosvenor St., Toronto 5, Ont.

_BAUSCH & LOMB_  
FIRST MAJOR ADVANCEMENT IN MICROSCOPY IN 60 YEARS... _DynaZoom_. 
New...

Micro Model

10 ml extraction chamber

**Thomas**

**Micro Manometric**

**VAN SLYKE BLOOD GAS APPARATUS**

Micro Manometric Blood Gas Apparatus, Thomas-Van Slyke, Magne-Matic®. With 10 ml extraction chamber which permits up to 95% reduction of sample size used in Van Slyke-Neill methods. Accuracy of determination is retained; standard error can be held within ±0.25%. Analyses are generally more rapid than macro method. Technique is expected to become the preferred method even when size of sample available is not a factor. See D. D. Van Slyke and J. Plazin, Micromanometric Analyses (Williams & Wilkins, Baltimore, 1961).

**Extraction Chamber.** Of borosilicate glass, with 18/7 ball at lower end. Capacity 10 ml, graduated at 0.1, 0.3, and 10 ml. Cup at top graduated 0 to 2 ml in 1/10 ml. Straight bore stopcock is high vacuum type. No water jacket is required.

**Pipets.** Micro pipets 8205-L and 8205-M with long stainless steel tips are required for the technique but are not included. No. 8205-L delivers samples into the cup, and 8205-M delivers directly into the extraction chamber through the stopcock bore to avoid loss or aeration.

**Magnetic Agitation.** The micro Van Slyke model utilizes the same magnetic agitation as the standard macro Thomas Magne-Matic® Van Slyke Manometric Apparatus (see p. 278 of our 1961 catalog).

**3593-D. Micro Manometric Blood Gas Apparatus**, as described. Complete with two Kel-F coated Stirring Bars, 1/2-inch long but without pipets or mercury. For 115 volts, a.c. or d.c. 447.00

**8205-L. Pipet, Micro, Van Slyke-Plazin,** with stainless steel tip; to deliver 50 and 25 microliters ........................................ 3.50

**8205-M. Ditto,** but with stopcock; to deliver 100, 50 and 25 microliters ........................................ 21.80

**3593-F. Conversion Assembly,** consisting of all necessary components for conversion of macro Magne-Matic® Manometric Van Slyke Apparatus to micro model for those who wish to adapt procedures to the newer technique. Consisting of 10 ml extraction chamber, clamps and holder, thermometer, and two 1/2-inch stirring bars ........................................ 64.40
