LETTERS

EDITORIAL
Needs of the Humanities .................................................. 1279

ARTICLES
Chronology of the Galaxy: D. D. Clayton ............................... 1281
Ages obtained by radioactivity studies and spectroscopy are not necessarily in conflict.

Alpha-Chymotrypsin and the Nature of Enzyme Catalysis: C. Niemann .................. 1287
The problem of enzyme catalysis is considered in terms of the behavior of a single hydrolytic enzyme.

Scientific Explanation: W. Weaver ..................................... 1289
There are two main types, and their interrelationship has philosophical as well as scientific implications.

Federal Support of Science: A Formula for Cooperation .................. 1300
National Academy Public Policy Committee offers suggestions for eliminating sources of difficulty.

NEWS AND COMMENT
Academy Report—Some Advice for the Scientific Community; Fermi Prize—Joint Committee Eyes the Money; Stanford—Electronics; Presidential Medicine—New Health Commission .................. 1304

BOOK REVIEWS
The World of an Evolutionist: G. de Beer ................................ 1314

REPORTS
Anangula: A Geologic Interpretation of the Oldest Archeologic Site in the Aleutians: R. F. Black and W. S. Laughlin .................. 1321

Xenon Tetroxide: Preparation and Some Properties: H. Selig et al. .................. 1322

Xenic Acid: Reduction at the Dropping-Mercury Electrode: B. Jaselskis .................. 1324

Hydrogen Energy Levels: Perturbation Caused by Proton Structure: W. S. Porter ........ 1324
Simultaneous Studies of Firing Patterns in Several Neurons:  
G. L. Gerstein and W. A. Clark .............................................. 1325

Conglutination: Specific Inhibition by Carbohydrates: M. A. Leon and R. Yokohari  1327

Melatonin Synthesis in the Pineal Gland: Effect of Light Mediated by the Sympathetic  
Nervous System: R. J. Wurtman, J. Axelrod, J. E. Fischer .......................... 1328

Differences in the Amino Acid Composition of a Third Rabbit Antibody:  
M. E. Koshland, F. M. Englisberger, R. Shapanka .................................. 1330

Nerve Fibers and Terminals: Electron Microscopy after Nauta Staining:  
R. W. Guillery and H. J. Ralston .............................................. 1331

Spontaneous Autoimmunity in Mice: Antibodies to Nucleoprotein in Strain A/J:  
G. J. Friou and P. O. Teague .................................................. 1333

Brucella-Agglutinating Antibodies: Relation of Mercaptoethanol Stability to  
Complement Fixation: R. K. Anderson et al........................................ 1334

Olfactory Discrimination: Electrophysiological Spatiotemporal Basis: M. M. Mozell ...... 1336

Variation in the Monoterpenes of Pinus ponderosa: Laws: R. H. Smith .................... 1337

Dissociation of Olfactory Neural Response and Mucosal Potential: T. Shibuya ............ 1338

Persistence of Bacteria in "Protoplast" Form after Apparent Cure of Pyelonephritis in  
Rats: L. B. Guze and G. M. Kalmanson ...................................... 1340

Induction of Papillary Growths in the Heart: S. Rodbard, Y. Kinoshita, M. Montes ........ 1341

Starch Formation Induced by a Plant Parasitic Nematode: M. L. Schuster,  
R. Sandstedt, L. W. Estes ................................................... 1342

Thalidomide: Effects on Enzymes of Glutamic Acid Metabolism in Mice:  
E. Hirschberg et al. ...................................................................... 1343

Experimental Reversal of Germ Cells in Ovaries of Fetal Mice:  
C. D. Turner and H. Asakawa ...................................................... 1344

Respiratory Distress: Relation to Prematurity and Other Factors in Newborn Monkeys:  
W. F. Windle .............................................................................. 1345

Dissociation and Recovery of a Response Learned under the Influence of  
Chlorpromazine or Saline: L. S. Otis .............................................. 1347

MEETINGS  
Air Pollution: J. P. Dixon; Early Man in the New World: G. A. Agogino, I. Rovner,  
C. Irwin-Williams; Radiation Accidents and Emergencies: L. H. Lanzl and  
J. H. Pingel; Forthcoming Events .................................................. 1349

DEPARTMENTS  
New Products .................................................................................. 1361

This branched papillary growth, lined with endocardium, was taken from a  
cauliflower-like excrescence in the left atrium of the heart. Such growths  
develop at sites which undergo increased friction (hematoxylin-eosin  
stain, about × 33). See page 1341.
