COVER

Two Clovis projectile points recovered during the 1962–63 excavations at
Blacketwater Draw, New Mexico. Typically found with mammoth remains,
these points demonstrate the extremes in size (11.3 versus 2.7 cm in overall
length) and the technique of multiple fluting used to thin the base.
See page 1408.
Science 145 (3639), 1385-1489.
