Science in the New Political Climate

ARTICLES
Strong Inference: J. R. Platt

Certain systematic methods of scientific thinking may produce much more rapid progress than others.

Glacier Geophysics: B. Kamb

Dynamic response of glaciers to changing climate may shed light on processes in the earth's interior.

Middle Stone Age Culture in India and Pakistan: H. D. Sankalia

Recent investigations show a distinct culture intermediate between the Early and Late stone ages.

Racial Differences and the Future: D. J. Ingle

Racial differences in intelligence and ability should be investigated rather than assumed not to exist.

COVER

View of the Austerdal Glacier (Austerdalsbre) in western Norway, just north of the Sogne Fjord, the longest fjord in Norway. The ice accumulates on the high plateau (background) and then descends in two precipitous ice falls. The falls join at the bottom and form a typical valley glacier. The dark and light banding on the surface represents the outcrop of a pervasive internal structure in the glacier ice. See page 353.
