Cover

Fossil forms discovered in the 18th century by German geologist Johann Bartholomew Adam Beringer, a transitional figure in the history of geology. Unaware that these exotic “fossils” had been placed in his dig by colleagues, Beringer published a treatise to interpret them. His discovery of a “fossil” bearing his own name made him aware of the hoax. See book review of Approaches to Paleoecology, p. 592. [From The Lying Stones of Dr. Beringer, Melvin E. Jahn and Daniel J. Wolff, University of California Press, Berkeley]
Science 147 (3658), 556-641.
