HIGH INTENSITY
SONIFIER

The Versatile Research And Processing Tool

- Biochemistry
- Virology
- Hematology
- Microbiology
- Pharmacology
- Pathology

Ultrasonically disintegrates cells and tissues with excellent enzyme activity and protein release. Perfect as Homogenizer and Emulsifier.

- Extreme Intensity With Power Selection
- Micro Tip, Continuous Flow
- Sealed Chamber Attachments
- Material Temp. Can Be Kept Below 10°C
- Ideal For Yeast, Staph, Strep, Skin, Heart Muscle, Micrococci, Mycobacteria, All Spores — Candida, Albicans, Bacillus Subtilis, Etc.

Model S-75—$820; Model S-125—$920

Gammascope II

100-Channel pulse height analyzer

WITH 4 OPERATING MODES
- 100 channel pulse height analysis
- Simultaneous single-channel pulse height analysis
- Multiscaling
- Mössbauer analysis

Now a smaller, more versatile version of the low cost GAMMASCOPE Model 101 100-channel pulse height analyzer, with 4 operating modes. New outputs for virtually all digital and analog readout equipment. Gammascope II is ideal for classroom demonstration or exacting experiments.

Operating Modes

100-channel p.h. analysis — high resolution spectrum analysis ... digital scale expansion resolution equivalent to 800 channels for selected portion of spectrum.

Single channel p.h. analysis — select energy range of interest, count pulses in that range on external scaler. Also used in multiscaling and for sampling velocity signal in Mössbauer studies.

Multiscaling — up to 100 channels ... 8 dwell times from 0.1 to 1000 milliseconds.

Mössbauer analysis — includes input for analog signal. Detector pulses, selected by the window, are used by the ADC to sample the velocity signal, providing a count in each channel related to instantaneous velocity. First low-cost, multi-channel analyzer with built-in Mössbauer capability.

For specifications and operating data send coupon.

19 FEBRUARY 1965
A first-class Monochromator for under $900.00

Here is more monochromator than ever before available at twice the price. Advanced Jarrell-Ash optics is one reason. Another is exceptional versatility. Features like two gratings in place which may be interchanged simply by turning an external knob make this new instrument the standard monochromator for general use in every physics, chemistry and biology laboratory. Wide wavelength range from ultraviolet to infrared. Write for complete specifications.

MODEL 400 JARRELL-ASH 0.25 METER EBERT MONOCHROMATOR

APERTURE RATIO . . . f/4.3
RESOLUTION. As good as 1A with 10 micron slits
SLITS . . . . . . . . Focusable for optimum resolution
READOUT . . . . Digital counter
WEIGHT . . . . . . Approx. 12 pounds

A rugged versatile tube utilizing the special EMI CsSb box and grid design. Typical gain of $3 \times 10^4$ at 1100 volts makes it an excellent tube for portable instruments. Variants are available with "S", S-10, and S-20 cathodes as well as with quartz windows for U.V. work.

The characteristics of the 9524-B exemplify the type of performance to be expected from the more than sixty different photomultipliers made by EMI in sizes from 1 to 12" in diameter. Most types are available from stock in the U.S.

(a) Chemistry Ph.D., Physiology minor; cardiovascular, kidney, shock, research and teaching experience; desires industrial or clinical appointment. (b) Cytology Ph.D., clinical mycologist & bacteriologist; 4 years of teaching; 2 years; available for academic appointment. Write, Woodward Medical Personnel Bolteau, 185 North Wabash, Chicago 60601. X

Investigator, established program. Histochimical techniques. Seeks connection with university research institute or foundation. Box 45, SCIENCE. 2/19

Microbiologist, Ph.D. Specialty: medical mycology and bacteriology. Several years of experience. Desires academic position with research opportunity and/or supervision of clinical microbiology. Box 55, SCIENCE. 2/26

Organic Chemist, Ph.D.; 15 years teaching and research experience. Seeks new challenge, medical organic chemistry background. Box 60, SCIENCE. 2/26

Ph.D. with 10 years of teaching, research, and applied experience in health physics, radiation dosimetry, and electronics. Desires responsible position with research opportunities. Box 77, SCIENCE. 2/26

Research Librarian: speaks five languages, understands four more. Offers help in literary researches, abstracting, planning dissertations. Medical art expert, offers diagramming, and so forth. Part-time work. Refer to Science, aid. #33, 1917 G Street NW, Washington, D.C. X

UNIVERSITY OF ALBERTA
Edmonton, Alberta, Canada

ASSISTANT PROFESSOR—BACTERIOLOGY
Applications are invited for the post of Assistant Professor in the Department of Bacteriology. Applicants should have completed postgraduate training and have developed a personal research program. Desirable qualities are: a strong background in clinical and laboratory bacteriology; ability to work with postgraduate students in order to develop a research program for a Ph.D. or M.Sc.; and a strong publication record. Preference will be given to candidates who have demonstrated superior teaching ability. The salary will be competitive, based on qualifications. Applications should include a letter of application, a curriculum vitae, and the names of three referees. Applications should be submitted to: The Chairperson, Department of Bacteriology, University of Alberta, Edmonton, Alberta, Canada. X

PHARMACOLOGISTS

SUPERVISOR AUTONOMIC SECTION
Ph.D. with several years of appropriate experience to head section involved in drug evaluation, utilizing all classical & modern autonomic techniques. Prior experience in computer programming, interest in areas of drug therapy relevant to hypertensive, renal & allergic diseases. Appointment will afford opportunity to contribute new dimensions to existing & proposed fields of basic as well as applied research.

PHARMACOLOGIST/PHYSIOLOGIST/CNS
Ph.D. with sections in CNS is or who wishes to develop capabilities in neuro & psychopharmacological research. Responsibilities will include active involvement in drug evaluation & direction of a creative program in surgical, electrophysiological or psychological techniques preferred, not required. Will consider recent graduate.

In confidence kindly submit complete resume & salary requirements to: Professional Placement Manager

CORPORATION
BLOOMFIELD, N.J.

An equal opportunity employer

19 FEBRUARY 1965

969
BIOCHEMIST AND PHYSIOLOGIST for the DEFENSE RESEARCH MEDICAL LABORATORY, DEFENSE RESEARCH BOARD TORONTO, ONTARIO, CANADA

A biochemist (or biochemical pharmacologist) and a physiologist are required to carry out basic studies of environmental stress involving hyperbaric oxygen, climatic conditions, pressure and acceleration. The Medical Laboratories provide excellent research facilities, unique in Canada, and publication is encouraged.

Qualifications: Candidate must have a Ph.D. or proven research competence, and should have potential for appointment as, or advancement to, a leadership of a research group.

Citizenship: Candidates must be Canadian citizens or British nationals.

Starting Salary: Up to $15,000 a year, depending on qualifications and experience. Please apply in writing to the Defense Research Member.

Send details to: File 65-DRML-1c

BIOMEDICAL ENGINEER B.S. in electrical engineering or physics with M.S., Ph.D., or experience, in biological science and computer technology for clinical pharmacology unit. Position involves providing technical assistance in the acquisition, development, and use of electronic instrumentation to facilitate automation and analysis of data from clinical pharmacologic and toxicologic procedure.

An equal opportunity employer. Please send detailed résumé to:

TECHNICAL EMPLOYMENT COORDINATOR THE UPJOHN COMPANY Kalamazoo, Michigan 2/26

LABORATORY SUPERVISOR

Tissue Culture in upstate New York metropolitan area, to perform serum-virus neutralizations, virus titrations, tests for adventitious agents in tissue cultures and virus inactivation tests. Ph.D. desirable with major training in microbiology and experience in tissue culture techniques. Leading manufacturer of ethical pharmaceuticals. Excellent salary, commensurate with training and experience. Send detailed résumé to Box 52, SCIENCE.

OPPORTUNITIES WITH OAK RIDGE INSTITUTE OF NUCLEAR STUDIES TO PARTICIPATE IN EDUCATIONAL ACTIVITIES AND INTERNATIONAL INTEREST CONCERNING ATOMIC ENERGY AND ASSOCIATED SCIENCES

Information and Exhibits Division

Science Lecturers: Opportunity in physical science to participate in division policy making activities, program content and training, and in administration and organization functions. Salary to $18,000, depending upon experience.

Science Lecturers: B.S./M.S. in Science or Science Education to provide lecture demonstrations in secondary school assemblies and science classrooms. Prefer single male. Base salary $5800-$6400.

Send résumé to:

Personnel Office
Oak Ridge Institute of Nuclear Studies
P.O. Box 115
Oak Ridge, Tennessee

RESEARCH VIROLOGIST

Ph.D. in virology or a closely related area. Areas of interest are cell growth phenomena, virus replication and virus structure. Experience in physical or biological laboratories is essential.

Salary: $5000-$7500.

Send résumé to:

Merck & Company, Inc.
West Point, Pa.

ANNOUNCING 1964 AWARDS

The LAWSON TAIT MEMORIAL TRUST of London, England, made a gift of £9000 to the Pathology Dept. at Edinburgh University. Research will be concerned with the pathology of human thyroid diseases, and the electron micrographs the human kidney.

No part of the program will involve experiments on animals.

For further information re these annual awards, write to: LAWSON TAIT MEMORIAL TRUST, Box 674, Station "F," Charles Street East, Toronto 5, Ontario, Canada.
KEEP UP TO DATE
ON NEW INSTRUMENTS AND EQUIPMENT

Use the attached postcard to obtain the latest available information on instruments and equipment for the laboratory. Tear out the card and circle those items that interest you. Fill in your name and drop the card in the mail. No stamp is necessary. In a few days you will receive the requested information.

HOW TO USE CARD

For Advertisements. Circle the number of the page on which ad appears. Company names appear to the right of the page numbers. Cards on which all numbers are circled will not be processed.

Addresses. Fill in name, position, department, employer, and address on the address side of card. Cards not including position and employer in return address will not be processed.

SODIUM POTASSIUM AND CALCIUM WITH THE EPPENDORF FLAME PHOTOMETER

Direct reading of Sodium, Potassium and Calcium from 0.5 ml of serum or urine is just one of the advantages of this remarkable instrument. In less than five minutes too. Others include "push-button" change-over from Propane to Acetylene, which provides the appropriate flame temperature for each determination, and interchangeable scales which read ppm or mEq of Na, K or Ca.

Long a favorite in European laboratories because of its unequalled performance, the Eppendorf is now available in the United States. A demonstration—without obligation—can be provided by the Brinkmann Technical Representative in your area.

If you are truly interested in a "better" Flame Photometer, write us for literature, prices and the location of our nearest sales facility.

BRINKMANN INSTRUMENTS

Circle 814 on Readers' Service Card
Expandability feature, exclusive with Victoreen SCIPP series, enables user to expand SCIPP 400 single-parameter pulse height analyzers to 1600-channel single-parameter or 1600-channel multiparameter operation as his requirements dictate.

Now — for the first time — there is no need to buy an analyzer with a built-in obsolescence factor. New Victoreen SCIPP series analyzers are designed to grow as your needs grow. SCIPP 400A can perform precision pulse height analysis...yet can be expanded readily to SCIPP-1600TP for multiparameter operation...or can perform other analyses. Other important features of SCIPP series analyzers: 8MC digitizing rate; silicon semi-conductors used throughout. Full details on request. Meantime check condensed specification data below.

### 8MC DIGITIZING RATE • PATCH PROGRAMMABLE

| 400, 1600, 10,000 words (word length 10\(^8\), decimal). | Memory subgrouping, transfer and overlap capability. |
| Patch program can be changed to meet virtually any requirement. | Digital factor-of-two display of memory live, static, static/live. |
| Built-in address and data register. | Single or dual ADC units available — parallel transfer from ADC address register to memory address register. |
| Random parallel access. | Analog function of pulse input ADC's. |
| Serial and parallel outputs. | High-speed readout and readin. |
Does our new Actigraph III have all the features you need for paper radiochromatography?

Yes, plus several you may never have expected.

**Convenient, simple loading and transport mechanism**

Exclusive paper magazine for fast, simple loading. / Accomodates all papers from Whatman 3MM to acetate electrophoresis strips (½-inch to 2-inches wide). / Foolproof paper-strip transport with constant-speed drive offers fingertip selection of speeds. / Vertical paper travel minimizes both detector and window contamination.

**Efficient, 4-pi dual detectors**

Dual detectors scan both sides of paper to give 4-pi detection geometry. / Choice of windowless or ultra-thin window operation. / Four collimator slit widths to produce desired resolution. / Detectors feature reduced gas consumption for economy.

**Versatile, easy-to-operate ratemeter controls**

All solid-state control circuits for long-term reliability and stability. / Ratemeter offers 19 count-rate ranges and 6 response-time constants—all front-panel controlled.

**Precise data-readout options**

Graphic recorder with one-knob control of speed synchronized with strip-transport speed. / Also available with Digital Integrator for quantitating counts in radioactive peaks. / Optional dual-channel recording facilities.

Discover how ACTIGRAPH® III—another in the BIOSPAN™ series of systems designed to meet specific counting requirements—can bring time-saving convenience to your work. Consult your Nuclear-Chicago sales engineer or write us for full information.

Scientists and engineers interested in challenging career opportunities are invited to contact our personnel director.
