ARTICLES
Einstein, Specific Heats, and the Early Quantum Theory: M. J. Klein ............. 173
Einstein's quantum theory of specific heat first showed the power of the new concept of energy quanta.

Miocene Mammals and Central American Seaways: F. C. Whitmore, Jr., and R. H. Stewart .......................... 180
Fauna of the Canal Zone indicates separation of Central and South America during most of the Tertiary.

Biological Formation of Molecular Hydrogen: C. T. Gray and H. Gest .......... 186
A "hydrogen valve" facilitates regulation of anaerobic energy metabolism in many microorganisms.

Science and Antiscience: W. R. Brain ............................................. 192
We have yet to achieve a unifying view on which to base a conception of the nature of man.

NEWS AND COMMENT
Crisis at Berkeley (I) — Education: A New Academy ............................... 198

Report from Europe: Research Climate in Italy, II: V. K. McElheny .............. 205

BOOK REVIEWS
On Developing an "Econosphere": J. J. Spengler ...................................... 208

REPORTS
Cretaceous Mammals from Montana: R. E. Sloan and L. Van Valen .................. 220

Stratospheric Tapping by Intense Convective Storms: Implication for Public Health in the United States: A. N. Dingle .................. 227

Microelectrophoresis with Alternating Electric Fields: L. D. Sher and H. P. Schwan .. 229
Structure of 9,9,10,10-Tetrachloroanthracene: N. F. Yannoni, A. P. Krukonis, J. Silverman .......................................................... 231

A Clathrate Crystalline Form of Silica: B. Kamb ............................................... 232

Wisconsinan Age of the Titusville Till (formerly called "Inner Illinoian"), Northwestern Pennsylvania: G. W. White and S. M. Totten ............................................. 234

Temperature Dependence of Carbon Isotope Composition in Marine Plankton and Sediments: W. M. Sackett et al. .................................................. 235

Polyplody and Environment in Arctic Alaska: A. W. Johnson and J. G. Packer ........ 237

Hemoglobin F\textsubscript{Texas}: Gamma-Chain Variant: R. G. Schneider and R. T. Jones ...... 240

Histone Regulation of Lactic Dehydrogenase in Embryonic Chick Brain Tissue: B. C. Goodwin and I. W. Sizer ................................................................. 242

Cerebellar Disease in Cats Induced by Inoculation of Rat Virus: L. Kilham and G. Margolis .............................................................. 244

Scarp Woodlands, Transported Grassland Soils, and Concept of Grassland Climate in the Great Plains Region: P. V. Wells ............................................. 246

Lesions in the Medial Forebrain Bundle: Delayed Effects on Sensitivity to Electric Shock: J. A. Harvey and C. E. Lints .............................................. 250

Interhemispheric Reversal of Mirror-Image Oblique Lines after Monocular Training in Pigeons: N. K. Mello ................................................................. 252

Comments on Reports: Macaque "Semispecies": J. Fooden; M. Goodman; Primate Blood Groups and Evolution: J. Moor-Jankowski and A. S. Wiener ....... 255
