Authors, Editors, and Referees: W. W. Knokle, E. A. Richardson, A. G. Foraker, J. W. Hedgpeth, A. G. Steinberg; Stone Age Intellect: Y. Schwartz and G. S. Hawkins

EDITORIAL
Group Interactions among Scientists

ARTICLES
Auroral Phenomena: B. J. O'Brien
Paleobiology of a Precambrian Shale: E. S. Barghoorn, W. G. Meinschein, J. W. Schopf
Numerical Analysis vs. Mathematics: R. W. Hamming
Origin of the Moon: H. Alfvén

NEWS AND COMMENT

BOOK REVIEWS
Paleoenvironments and Cultural Adaptations: R. F. Heizer
A Selected Guide to the Literature on the Flowering Plants of Mexico, reviewed by J. Ewan; other reviews by D. L. Jones, C. O. Muehlhause, H. M. Leicester, H. L. Nieburg, A. Hassner, E. Pinney, J. Folger, G. H. Minton

REPORTS
Human Skeletons of Tehuacán: J. E. Anderson
Chloroplast Mutagenesis: Effect of N-Methyl-N'-Nitro-N-Nitrosoguanidine and Some Other Agents on Euglena: D. R. McCalla
Ergoline Alkaloids in Tropical Wood Roses: J. W. Hylin and D. P. Watson
Serotonin and Adenosine Triphosphate: Synergistic Effect on the Beat Frequency of Cilia of Mussel Gills: S. L. Schor
Culture of Dissociated Drosophila Embryos: Aggregated Cells Differentiate and Sort Out: R. J. Lesseps

SCIENCE is published weekly on Friday and on the fourth Tuesday in November by the American Association for the Advancement of Science, 1515 Massachusetts Ave., Washington, D.C. 20005. Now combined with The Scientific Monthly. Second-class postage paid at Washington, D.C. Copyright © 1965 by the American Association for the Advancement of Science. Annual subscriptions: $8.50; foreign postage, $13.50; Canadian postage, 75c; single copies, 35c. School year subscriptions: 9 months, $7.10 in the United States; $7.50 outside the United States. Provide 4 weeks' notice for change of address, giving new and old address and zip numbers. Send a recent address label. SCIENCE is indexed in the Readers' Guide to Periodical Literature.

COVER
The rayed band is an aurora emitted at altitudes above about 100 kilometers when oxygen and nitrogen are bombarded by electrons with energies of several thousands of electron volts. The source of these electrons is not known. The band is a horizontal region of dense luminosity, and the rays are narrow, magnetically vertical columns of light. See page 449. [V. Hess-ler, College, Alaska]
Science 148 (3669), 443-553.
