ARTICLES
Ionizing Waves of Potential Gradient: L. B. Loeb

Luminous pulses in electrical breakdown, with velocities a third that of light, have a common basis.

Circadian Rhythms in Man: J. Aschoff

A self-sustained oscillator with an inherent frequency underlies human 24-hour periodicity.

Onward the Management of Science: The Wooldridge Report: J. D. Cooper

NIH was not cleared on all counts by the Wooldridge Committee, which itself is rated low on methodology.

Scientific Research: The Case for International Support: A. A. Buzzati-Traverso

Financing of science at a supranational level is a stringent requirement for the vast majority of countries of the world.

Research in Patient Care: P. J. Sanazaro; Nucleation Phenomena: A. G. Walton .............................. 1489

COVER

Autograph of branched streamers from a positive point on the impulse potential, intercepted at progressively greater distances toward the negative plane by a transverse film. The tips of each of the branches represent an ionizing wave of positive potential gradient. The gradient propagates itself by photo-electric ionization of the air near the film. See page 1417. [E. Nasser]
