**Personnel Placement**

**POSITIONS WANTED**

**Academic Administrator** available, grant administration, new construction management, university or college development program activities. For vitae and references write Box 191, SCIENCE.

6/18

**Basic Research** aerospace, research/teaching. Ph.D., physiology, minors: nutrition and biomedical engineering. M.S., nutrition. Box 193, SCIENCE.

6/18, 25

**Biologist**, graduate Canadian and British universities. Eight years of teaching, graduate supervision. Research teleost physiology, limnology, oceanography, microbial ecology. Interested applications computers in ecology. Seeks position research and teaching. Box 196, SCIENCE. X

**Business Administrator** available. Science-oriented executive seeks challenge in university, medical college, or research organization. Significant background in hospital, medical college, and industry. Am effective in administration, systems, and procedures, new graduate administration, personnel. Box 197, SCIENCE.

**Physician**, Scientist, Executive planning early retirement from government; broad and high level experience; prefer part-time, consulting, or short-term work; novel and challenging projects welcomed. Box 184, SCIENCE.

6/11, 18, 25

**POSITIONS OPEN**

(a) **Biochemist**, direct busy dept. 500-bed hospital: ample research/teaching opp; MdW: $12,000. (b) **Microbiologist**, supv. infections and chemotherapy research group; executive exp.; leading drug mfr.; E: $15,000 up. (c) Biology Assoc. Prof., lib. arts college; SE; $6000 to $10,000. (d) **Biochemist**, supv. dept., private clinical lab; W: $15,000 to $20,000. (e) Clinical Research Scientist, direct dental product development program; large drug firm; E: $15,000. (f) **Microbiologist**, supv. dept.; teach, conduct research; hosp. to 625 beds; MdW; $15,000. Woodward Medical Personnel Bureau, 185 North Wabash Avenue, Chicago, Illinois 60601. X

**MICROBIOLOGIST**. Ph.D., recent graduate with experience or training in tissue culture and virology. Responsible research position with rapidly expanding veterinary biological and pharmaceutical manufacturer located in Midwest. Good working conditions, including a profit-sharing program, and an excellent opportunity for advancement. Please send complete resume and approximate salary requirement in first letter. Box 198, SCIENCE

(a) Ph.D. Biochemist, direct department, research, teaching. Central hospital; from $13,000. (b) Ph.D. Microbiologist, virology, aerochemical experience. West Coast; $14,000 up. (c) M.S./Ph.D. Chemist, analytical/physical; head laboratory; East; to $13,000. (d) M.S. Microbiologist, industrial; R&D; Central; to $12,000.

**RESEARCH BIOCHEMIST**

**UNIVERSITY OF OTTAWA CANADA**

**CHAIR OF PHARMACOLOGY**

Applications are invited for the Chair of Pharmacology, Faculty of Medicine. Candidates should hold an M.D. or a Ph.D. degree. The department is responsible for undergraduate course in pharmacology for medical students. Facilities are available for accepting graduate students for M.Sc. and Ph.D. degrees. Inquiries together with a curriculum vitae should be addressed to J. J. Lester, M.D., Ph.D., Dean, Faculty of Medicine, University of Ottawa, Ottawa, Ontario.

**BOOZ-ALLEN APPLIED RESEARCH**

*Applied Mathematicians
Operations Analysts
Applied Physicists*

**CAREER APPOINTMENTS**

Booz-Allen Applied Research today serves many of the nation's top governmental, military and private organizations. Responding swiftly to their most complex technical problems, we have worked to solve them with a blend of interdisciplinary talents, modern analytical techniques, and wide-ranging research experience.

This has proven a most successful combination, both for our clients and for BAAReC. A good indicator of our success is our current need for new talent to respond to still greater challenges...in astrophysics, communications, transportation, computer technology and naval warfare, to cite just a few. Creative, perceptive scientists and engineers are invited to investigate these new avenues of career opportunity. Please send your resume to Mr. Robert M. Flint, Director of Professional Appointments.

An Equal Opportunity Employer
IMMEDIATE OPENINGS for
RESEARCH
NEUROPHYSIOLOGIST

Excellent opportunity for Ph.D. in neuroscience to work with a small group of engineers and psychologists on basic research problems aimed at developing models for information processing in the nervous systems. Requires some background or interest in mathematics and systems analysis, and interests in sensory information processing in either invertebrates or vertebrates. Applicants should be able to conduct experiments involving intra- and extra-cellular electrophysiological recording. Present primary interests are in optomotor response in invertebrates, and general tactile and visual system study in invertebrates. However, the future course of the program is quite flexible. A primary goal is the development of neurophysiological programs to be conducted in connection with a real-time computer-controlled facility that can handle and present spatial-temporal sensory-motor signals in the many sensory-motor modes simultaneously. Interested applicants are invited to submit resumés to:

R. U. Contu
STANFORD RESEARCH INSTITUTE

BIOCHEMIST IV

Career vacancies in Blood and Blood Products Unit, Biologic Products Section with the Michigan Department of Health. Salary range $9,354 to $11,818 annually. Promotional opportunities. All Michigan civil service benefits, including an outstanding state contributory insurance program, excellent retirement plan, longevity bonus, and liberal vacation and sick leave allowance. Must have three years of professional experience in the application of biochemical and/or bacteriological techniques and possession of a doctorate with specialization in biochemistry. To lead and supervise fundamental studies on isolation and purification of newer blood proteins from venous blood and placental tissue; followed by development of pilot plant methods prior to introducing procedure into larger modern blood fractionation plant; available for consultation to other members of Division of Laboratories in the field of biochemistry. Publication encouraged. Send resume to Mr. F. B. Krupiarz, Personnel Officer, Michigan Department of Health, Lansing, Michigan 48913.

An equal opportunity employer.

FELLOWSHIPS

Graduate Fellowships in Biochemistry

A limited number of positions leading to Ph.D. still available for academic year 1965-66. Varied department research programs include mammalian and microbial metabolism, enzymology and nucleic acid biochemistry. Annual stipend starts at $2400 plus dependency allowance and tuition. Address further inquiries to Head, Department of Biochemistry, University of Maryland, School of Medicine, Baltimore, Maryland 21201.

The Market Place

Your Book Published

If we think your manuscript has unusual possibilities, we will publish it on a straight royalty or partial subsidy basis. Send manuscript for free editorial report or write for Brochure sx. Pageant Press, Inc. 101 Fifth Avenue, New York 3, N.Y.

PERKIN-ELMER

Electron Spin Resonance Spectroscopist

An outstanding opportunity with the world's leading manufacturer of analytical instruments. Responsibilities include guidance for product improvement and marketing programs.

The individual we are seeking should be capable of leading applications research and development programs on a new and unique ESR spectrometer.

Perkin-Elmer offers a broad and generous benefit program including cash bonus, paid sick leave, retirement, major medical, and income protection plans.

Submit resume to Mr. Dale L. Wornstaff, The Perkin-Elmer Corporation, Main Ave., Norwalk, Conn. Phone (203) 847-0414. An equal opportunity employer.

How can you improve on perfection?

"How can you improve on perfection?", pathologists and technicians asked us skeptically when we introduced our new model of the AO "820" Microtome. They were certain that no one, not even American Optical, could improve the sectioning performance of the incomparable "820" they had been using for years. We knew they were right! We knew we couldn't improve the way the "820" sectioned tissue so we didn't try; we didn't change a thing in its time-proved operating principle! But we knew other improvements could be made. We completely restyled the "820" to give it an attractive, functional look in keeping with today's modern laboratory. The feed indicator was moved from the back to the front where it could be more readily seen. A new wheel-locking device added an extra measure of convenience and safety. The cover was made to swing back to completely expose the interior for easier cleaning and lubrication. Yes, today's "820" is improved. But, it is still basically unchanged. It's the same old "820". It sections tissue in the same old way and with the same incomparable ease and precision. Carry a spare! How old is your present "820"? Perhaps now is the time to purchase a new "820". Our factory can recondition your old microtome as a spare for rush period emergencies. Send for "820" Microtome brochure, or see your AO Sales Representative.
