SCIENCE is published weekly on Friday by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. Now combined with The Scientific Monthly®. Second-class postage paid at Washington, D.C. Copyright © 1965 by the American Association for the Advancement of Science. Annual subscriptions $8.50; foreign postage $1.50; Canadian postage, 75c; single copies, 35c. School year subscriptions: 9 months, $7.10 the
Hageman Factor: Alterations in Physical Properties during Activation: V. H. Donaldson and O. D. Ratnoff ........................................ 754

Selective Mitochondrial Damage by a Ruby Laser Microbeam: An Electron Microscopic Study: R. L. Amy and R. Storb ........................................ 756

Papain Membrane on a Collodion Matrix: Preparation and Enzymic Behavior: R. Goldman et al. ........................................ 758

Recombination in Bacteriophage T4: A Mechanism: E. Simon ........................................ 760

Cestode in North Dakota: Echinococcus in Field Mice: P. D. Leiby ........................................ 763

Periodic Respiratory Pattern Occurring in Conjunction with Eye Movements during Sleep: E. Aserinsky ........................................ 763

Trans-Aconitic Acid in Range Grasses in Early Spring: R. Bureau and P. R. Stout ........................................ 766

Eimeria tenella: Cultivation of the Asexual Stages in Cultured Animal Cells: W. H. Patton ........................................ 767

Lymphoma Growth in vivo: Electronic Discrimination between Tumor and Stroma Cells: G. Haughton et al. ........................................ 769

Absence or Singular Specificity of Carotenoids in Some Lower Fishes: D. L. Fox and G. F. Crozier ........................................ 771

Gastric Secretion: Mechanism for Production of Hydrogen Ions: H. P. Gregor and J. M. Berkowitz ........................................ 773

Alternative Forms of Triosephosphate Dehydrogenase in Chromatium: G. A. Hudock, D. B. Mellin, R. C. Fuller ........................................ 776

Protein Synthesis in Enucleated Eggs of Rana pipiens: L. D. Smith and R. E. Ecker ........................................ 777

Brain Transplantation: Prolonged Survival of Brain after Carotid–Jugular Interposition: R. J. White et al. ........................................ 779

Efficiency of the Conditioned Eyelid Response: I. Martin and A. B. Levey ........................................ 781

Comments on Reports: Convection Plumes and Insects: M. Rigby ........................................ 783

ASSOCIATION AFFAIRS

Materials Science in Dentistry, Medicine, and Pharmacy ........................................ 784

MEETINGS

Radiation Trapped in Earth's Magnetic Field: B. M. McConnell; Photon and Electron Impact: V. H. Dibeler; Canadian Plant Physiology: J. A. Webb; Hermaphroditic Fish: J. W. Atz; Forthcoming Events ........................................ 785

COVER

A drop of water making contact with the top of another drop. If the relative velocity between two colliding drops is less than about 40 centimeters per second, the two drops approach each other and interact sufficiently to produce visible deformation. The drops recoil without coalescence if their initial relative kinetic energy is small and if no appreciable electric field is superimposed. See page 695. [Ross Gunn, American University]
