Physiological Predetermination: Imbibition, Respiration, and Growth of Lima Bean Seeds: L. W. Woodstock and B. M. Pollock

Neurosecretory Supply to the Epidermis of an Insect: S. H. P. Maddrell

Histamine Synthesis and Gastric Secretion after Portacaval Shunt: J. E. Fischer and S. H. Snyder

Crystal and Molecular Structure of a Phospholipid Component: 1-alpha-Glycerophosphorylcholine Cadmium Chloride Trihydrate: M. Sundaralingam and L. H. Jensen

Circadian Rhythms in Male Ants of Five Diverse Species: E. S. McCluskey

Organ Weights in Primates and Other Mammals: W. R. Stahl

Phenylketonuria: Limit in Capacity of Pre-Weanling Rats To Oxidize beta-Phenylacetate and Other alpha-Hydroxy Acids: F. B. Goldstein

Oncogenicity of the Simian Adenoviruses: R. N. Hull et al.

Bacterial Contamination of Some Carbonaceous Meteorites: J. Oró and T. Tornabene

Exchangeable Mass: Determination without Assumption of Isotopic Equilibrium: P.-E. E. Bergner

Frog Retina: Detection of Movement: D. Finkelstein and O.-J. Grüsser

Growth Hormone: Important Role in Muscular Exercise in Adults: W. M. Hunter, C. C. Fonseka, R. Passmore

Lysosomal and Free Acid Phosphatase in Salivary Glands of Chironomus tentans: K. S. Schin and U. Clever

Codominance of Visual Pigments in Hybrid Fishes: W. N. McFarland and F. W. Munz

Comments on Reports: Decision Theory in Studies of Discrimination in Animals: J. A. Nevin

ASSOCIATION AFFAIRS

AAAS Annual Meeting: Physical Sciences: R. Colvig

MEETINGS

Cancer Research: D. N. Ward; Forthcoming Events

COVER

The mechanical properties of high polymers crystallized from a melt depend largely upon the nature of the connecting material between thin, ribbon-like crystals. The transmission electron micrograph, shadow-cast at 23 degrees, shows fibrinous links between aggregates of crystals in a thin film of polyethylene (about x 65,000). See page 1026.
