Heterothallism in Biflagellate Aquatic Fungi: Preliminary Genetic Analysis:
J. T. Mullins and J. R. Raper .......................................... 1174
Immunoglobulin A Production in Ataxia Telangiectasia: D. E. McFarlin et al. .... 1175
Immunogenicity and Role of Size: Response of Guinea Pigs to Oligotyrosine and
Tyrosine Derivatives: F. Borek, Y. Stupp, M. Sela .................... 1177
Bacterial Stimulation of Sporangium Production in Phytophthora cinnamomoni:
G. A. Zentmyer .......................................................... 1178
Quenching of DNA Phosphorescence: I. Isenberg, S. L. Baird, Jr., R. Rosenbluth .. 1179
Allograft Survival: Effect of Antisera to Thymus Glands and Lymphocytes:
H. Nagaya and H. O. Sieker ......................................... 1181
Iodine: Accumulation by Balanoglossus gigas: F. B. De Jorge et al. ............ 1182
Phosphatase Mutants in Aspergillus nidulans: G. Dorn .................. 1183
Hearing Sensitivity in Bats: J. I. Dalland ................................ 1185
Evoked-Potential Correlates of Stimulus Uncertainty: S. Sutton et al. ............ 1187

ASSOCIATION AFFAIRS  AAAS Annual Meeting: Steroid Hormones and the Pill .......... 1189

MEETINGS  Arabidopsis Research: G. Röbchen; Forthcoming Events ................. 1192

COVER
The great horned owl (Bubo virginianus) is widely distributed throughout the timbered regions of North, Central, and South America, from the arctic regions to the Straits of Magellan. It is a ravenous feeder on a great variety of animal life, and a generous provider for its young. Almost any living creature that walks, crawls, flies, or swims, except the larger mammals, is its prey. See review of Encyclopedia of the Life Sciences, page 1151. [Ellen Kolansky, Science]
