I've found it!!

MY BEST BUY IN LIFE INSURANCE

Have you discovered low-cost TIAA coverage?

For example,

A $50,000 POLICY COSTS ONLY $98 at age 30. Here's how:

<table>
<thead>
<tr>
<th>Age at Issue</th>
<th>25</th>
<th>30</th>
<th>35</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual Premium (Payable only 16 Years)</td>
<td>$134.00</td>
<td>$159.00</td>
<td>$206.50</td>
</tr>
<tr>
<td>Cash Dividend End of First Year</td>
<td>55.50</td>
<td>61.00</td>
<td>70.50</td>
</tr>
<tr>
<td>First Year Net Premium</td>
<td>$78.50</td>
<td>$98.00</td>
<td>$136.00</td>
</tr>
</tbody>
</table>

*These dividends are based upon the 1966 dividend scale and are, of course, not guaranteed.

This is a plan of level premium Term insurance which provides its largest amount of protection initially, reducing by schedule each year over a 20-year period to recognize decreasing insurance needs. There are several other insurance periods, and Home Protection policies are available at all ages under 56.

ARE YOU ELIGIBLE FOR TIAA? Yes, if you are employed by a college, university, private school, or other nonprofit educational or scientific institution that qualifies for TIAA eligibility.

Send the coupon for the new Life Insurance Guide and a personal illustration of TIAA policies for your age.

Forthcoming Events

February

15–17. Radiotracer Applications in Aerospace, symp., Dayton, Ohio. (P. Polishuk, Flight Dynamics Laboratory, Wright-Patterson AFB, Ohio)

16–17. Voluntary Health, 2nd natl. conf., Chicago, Ill. (Dept. of Community Health and Health Education, American Medical Assn., 535 N. Dearborn St., Chicago)

16–18. Practical Space Applications, symp., San Diego, Calif. (C. Tross, Box 931, Rancho Santa Fe, Calif.)

16–19. National Soc. of College Teachers of Education, Chicago, Ill. (E. H. Goldenstein, Administration Bldg., 415, Univ. of Nebraska, Lincoln 68508)

16–19. Institute of Management Sciences, annual mtg., Dallas, Tex. (W. M. Campbell, Atlantic Refining Co., P.O. Box 2819, Dallas 75221)

17–19. American Educational Research

Ranzi (Milan) discussed his results on specific induction by nucleic acid preparations from different organs.

Two special systems were then taken up in greater detail—the embryo of the sea urchin and the hemoglobin-synthesizing system. S. Spiegelman showed some new approaches using both in vitro systems and hybridization techniques. P. R. Gross (Providence) dealt mainly with early protein synthesis in the embryos and its activation. This latter problem, especially from the point of view of activation and controls, was discussed by A. Monroy (Palermo), M. Nemer (Philadelphia), J. Runnström (Stockholm and Naples), and A. S. Spirin (Moscow). The last session was devoted to the synthesis of hemoglobin, a subject which has recently contributed much to the progress of our knowledge of the mechanism of protein synthesis; the discussion was led by P. A. Marks (New York) and C. Baglioni (Naples).

The sponsoring institutions were the Italian National Research Council, the International Union of Biological Sciences, and NATO. It is hoped that this type of interdisciplinary discussion can be resumed at a second international workshop, planned for the spring of 1967 in northern Italy.

Only WELCH Vacuum Pumps offer these 6 benefits!

30 YEARS OF VACUUM PUMP "KNOW-HOW" stands behind Duo-Seal Vacuum Pumps... the most reliable mechanical vacuum pump you can own.

IMMEDIATE SHIPMENT FROM FOUR KEY LOCATIONS: New York, N.Y.; Skokie (Chicago), Illinois; San Carlos (San Francisco) and North Hollywood (Los Angeles), Calif. Also stocked at authorized Welch Duo-Seal dealers throughout U.S.A., Canada and the world.

FOUR REPAIR FACILITIES WITH REPLACEMENT PUMP POOLS: Forget about lengthy down-times. Phone the nearest of the above facilities for prompt shipment of an exchange pump.

FULL REPAIR/REPLACEMENT GUARANTEE: All Duo-Seal Vacuum Pumps carry a no-charge repair or replacement guarantee for one full year from date of delivery.

REDUCED INSTALLATION TIME: No water connections to make. . . no need to bolt down base. Merely plug it into a proper electrical outlet and switch on the pump motor.

WELCH VACUUM SALES PERSONNEL ARE HIGHLY QUALIFIED: Their business is vacuum, nothing else. Feel free to call on them for consultation on your vacuum requirements.

Welch Duo-Seal Vacuum Pumps range in capacities from 21 to 1400 liters/minute and in ultimate from 2 x 10^-4 to 5 x 10^-7 Torr. Twelve models in all.

Latest addition to the Welch Duo-Seal Vacuum Pump Line, Model 1376, 10 cfm pumping speed, ultimate vacuum of 1 x 10^-4 Torr.

AMINCO-CHANCE* DUAL-WAVELENGTH SPECTROPHOTOMETER

Detects small transmission changes between alternating monochromatic light beams, through highly turbid media, as a function of time. Instrument has been used successfully in cytochrome oxidase investigations; oxidative phosphorylation; photosynthesis;** metabolic control systems and reaction kinetics, and spectral studies of intermediate compounds in the range: 200 to 1000 mμ.** Conventional single-beam spectrophotometers are unsuitable for such studies because of the large non-specific light scattering changes that often accompany transmission changes when dealing with highly turbid solutions. Detects and records (near maximum lamp output), transmission changes as small as 0.05% through samples transmitting only 1% of the incident light. Records, simultaneously, changes in transmission, oxygen content, and fluorescence.** Send for New Bulletin 2383 SF4

AMERICAN INSTRUMENT CO., INC./8030 GEORGIA AVE., SILVER SPRING, MARYLAND 20910

**With certain accessories. Accessories available include: Rapid Mixing Chamber/Fluorescence Attachment/Oxygen Monitor (Platinum Electrode)/Anaerobic Cell/Rapid Stirrer/Double Cell Changer/1 x 2 cm Cell Block (for insertion of accessories out of light path)/Lamps and Power Supplies: Tungsten /Tungsten-Iodine/ Xenon/Deuterium/Mercury/Mercury Calibration/Infrared Sensitive PMT/1, 2, or 3 Pen Recorders/Dual Channel Oscilloscope / Oscilloscope Camera/Storage Oscilloscope....
Here are some old beaker covers

Here's the new one

Now you can do away with sandwich wrap and other makeshift beaker lids. New Mallinckrodt AR® plastic beakers are available with rigid covers in all sizes. These are also the beakers with the exclusive "no-drip lip" that stops pouring instantly as you tilt it back. There's never a leftover drop to run down the side and mess up your work area. You don't have to clean up after AR beakers, because they don't leave rings and puddles on your workbench.

Send for the complete AR Plastics catalog. New ideas in labware from the people who think past the product. Stocked for immediate shipment by your lab supplier.

**WHY DISPENSE FROM OPEN CONTAINERS?**
(You Don't with L/I Automatic REPIPETS* and Dilutors*)

No dirt, particulates, moisture or CO₂ can contaminate your reagents when you use L/I instruments. Because every L/I REPIPETS and Dilutor has an air filter, fits air-tight directly on your reagent vessel, and is supplied with an air inlet tube and plastic cap. A wad of cotton in the cap keeps out particulates. Moisture and CO₂ are removed by attaching Aquasorb® or Malcosorb® filters.

L/I REPIPETS and Dilutors dispense and dilute any reagent, hot or cold, with a guaranteed accuracy of 1%, reproducibility ±0.1%. Volumes? From microliters to deciliters. Cleanup? None.

Dilutors $89.50, including complete set of tips for highest precision in all ranges. REPIPETS $45. Immediate delivery in 1, 10, 20 and 50 ml sizes. Write for six-page brochure which gives complete details and specific clinical and chemical procedures.

*Patents Pending, REPIPETS (REpetitive PIPETS) and Dilutors

QUIT YOUR RUNNING AROUND 

Now there's an on-the-bench Blackstone HT Ultrasonic Cleaner for every job imaginable!

Blackstone's HT (Heated Tank) Series gives you controlled ultrasonic cleaning right at the work station, without wasting parts to a central cleaning station.

HT Tank Sizes: Available in 72, 144 and 216 sq. in. capacities—providing greater flexibility in meeting a wider range of needs. HT Power Outputs: Available in 100, 200, 300 and 500 watts.

Other nice things about a Blackstone:
- Rounded Corner 316 L Stainless Steel Tanks—for corrosion-resistance and easy maintenance.
- 316 L Stainless Steel Housing and Baked Enamel Panels—for maximum chemical protection.
- Thermostatically Controlled Heaters—maintain solution temperatures from ambient to 190°F.
- High Efficiency Lead Zirconate Titanate Transducers—mechanically held by a retainer which is silver-brazed to the tank bottom, assuring long, trouble-free life.

Give us a sample of your work: Perhaps the material you're cleaning can be cleaned better, more efficiently with Blackstone ultrasonics. So send us a sample. We'll report right back to you—at no charge, of course.

BLACKSTONE ULTRASONICS, INC.
600 Howard Street • Sheffield, Pa.

607
Eight* samples on the same gel slab; compare and analyze them together.

The serum samples above have been separated simultaneously on a single gel slab. Electrophoretic conditions were identical for each sample.

- To prepare: pour in single gel solution (not eight) and apply samples directly into sample slots.
- After running, stain together, destain together, and evaluate together.
- Total procedure requires less working time than any other method.

Twelve place sample slot former also available.

Circle Reader Service Card for data sheets and bibliography.

THE KLETT FLUORIMETER

Quantitative Ultraviolet Monitoring

FOR $845.00

- Built-in recorder monitors true linear absorbance in two ranges; 0 to 0.5 and 0 to 2.5.
- Unique design eliminates need for base line compensation.
- Automatically controls a fraction collector to deposit each UV-absorbing fraction into a separate collecting tube.

The ISCO Model UA is the only UV monitor with a bandwidth so narrow that it conforms rigorously to Beer's absorption law, and does it without changing wave lengths! Bandwidth is so narrow that precise quantitative results will be obtained if the flow stream absorbs any light at 254 m,u, regardless of the wavelength of maximum absorption. Other ultraviolet analyzers operating at a fixed wavelength have so wide a bandwidth (even though more than 95% of their light may be at 254 m,u) that they shift their maximum response to other wavelengths at higher absorbances. They can only detect the presence, not the quantity, of UV absorbing fractions.

*0.6 m,u at one thousandth peak intensity.

ISCO

VICKERS Excellence... in Polarizing Microscopes gives you significant new performance advantages in chemical, mineralogical or petrographic studies. Here are a few particular examples:

ANALYSIS OF POLARIZED LIGHT — no other polarizing microscope gives you facilities as complete as those designed into the Vickers for the quantitative analysis of polarized light. The swing-out polarizer is graduated and rotatable through 360°. The analyzer unit is rotatable through 180°.

Compensators may be rotated through 90° and provision is made for rotation either independently or linked with analyzer rotation to a precision of 0.1°. With this facility you can, for example rotate a simple mica compensator below the analyzer, eliminating the necessity for an expensive insertable "elliptic compensator". Compensators and graduated wedges may be inserted and read either in the analyzer unit, or just above the objective back lens (where graduations on a quartz wedge can be read over the interference figure) or, by using the Wright slotted ocular, above the Bertrand Lens. In this position compensators can be used equally well on the specimen image or its interference figure. In a few words, the Vickers design enables the most precise and convenient execution of all analyses, from the simplest to the most sophisticated. MICROSCOPE STAGE — the new ball-bearing stage is built to a new standard of smooth, easy motion, stability and precision operation. This is achieved by a unique manufacturing method involving preparation of the ball-race bearing surfaces by optical lens working techniques.

FLAT FIELD PERFORMANCE — the Microplan flat field objectives can be supplied strain-free in magnifications of 10x, 20x and 40x. This is the widest available range of strain-free, specially corrected objectives, giving you wide, absolutely flat fields of view from 50x to 700x. These examples are only examples — there is so much more which deserves your consideration,— other optical and mechanical design features, the wide range of models for research and routine applications, the unequalled selection of special accessory equipment. Our catalog tells the whole story. May we send it to you?
